AUVON A5111

AUVON Plug-in Night Light User Manual

Model: A5111

Product Overview

The AUVON Plug-in Night Light is designed to provide convenient and energy-efficient illumination in your home. Featuring both a motion sensor and a dusk-to-dawn sensor, it offers versatile lighting options to suit various needs. Its compact design ensures it does not block adjacent outlets, making it a practical addition to any room.

This image displays four AUVON Plug-in Night Lights, highlighting their compact form factor and warm white illumination. Each light is designed to plug directly into a standard electrical outlet.

Key Features

- **Dual Sensor Technology:** Equipped with an independent dusk-to-dawn sensor and a motion sensor for intelligent operation.
- **Adjustable Brightness:** Offers 5-step dimming and stepless dimming from 1 to 50 lumens to customize light intensity.
- **Energy Efficient:** Low power consumption (maximum 1.3W) for cost-effective operation.
- **Compact Design:** Leaves the second outlet free for other devices.
- **Safety Features:** Features superior V-0 fire-resistant casing and over-current protection.
- **Brightness Memory:** Retains the last brightness setting when power remains connected.

This image provides an internal view of the night light, highlighting its key components designed for safety and performance. These include an industry-leading sensor, an imported chip with overcurrent protection, a V-0 fire-proof casing, and a copper plug to reduce heat and prevent short circuits.

Setup and Installation

Installation of the AUVON Night Light is straightforward. Simply plug the unit into a standard electrical outlet. The compact design ensures that the second outlet remains accessible for other devices.

The compact design of the AUVON night light ensures that it does not obstruct the second electrical outlet, allowing other devices to be plugged in simultaneously.

Operating Instructions

Operating Modes

The AUVON Night Light features two primary operating modes, selected via a switch on the unit:

- **AUTO Mode:** In this mode, the motion sensor is active. The light will automatically turn on when motion is detected within a 3-5 meter (10-16 feet) range and 120° angle in dark conditions. It will then auto-off after 60 seconds of no detected motion, conserving energy.
- **NIGHT Mode:** In this mode, only the light sensor is active. The night light will automatically turn on when ambient light is insufficient (dark conditions) and turn off when conditions become bright. It remains on throughout the night if darkness persists.

This diagram illustrates the two user-friendly operating modes: Auto Mode and Night Mode. In Auto Mode, the light activates when motion is detected in darkness and turns off at dawn. In Night Mode, the light automatically turns on at dusk and off at dawn, remaining on throughout the night.

This image demonstrates the advanced motion sensing capabilities of the night light. It can detect motion within a range of 3-5 meters (approximately 10-16 feet) and a 120-degree angle, ensuring reliable activation when movement is present.

Brightness Adjustment

The night light's brightness can be adjusted to your preference:

- **5-Step Dimming:** Short-press the brightness button to cycle through 5 preset brightness levels.
- **Stepless Dimming:** Long-press the brightness button to smoothly adjust the brightness within the 1-50 lumen range. Release the button when the desired brightness is reached.

The light will remember your last brightness setting if the power remains connected.

The night light offers adjustable brightness. A short press allows for 5-step dimming, while a long press enables stepless dimming, providing brightness levels from 1 to 50 lumens to suit various lighting needs.

Maintenance

To ensure optimal performance and longevity of your AUVON Night Light, follow these simple maintenance guidelines:

- **Cleaning:** Unplug the device before cleaning. Use a soft, dry cloth to wipe the surface. Do not use abrasive cleaners, solvents, or harsh chemicals, as these may damage the unit.
- **Placement:** Ensure the light sensor and motion sensor are not obstructed by furniture, curtains, or other objects, as this may affect their functionality.
- **Storage:** If storing the night light for an extended period, unplug it from the outlet and keep it in a cool, dry place.

Troubleshooting

If you encounter any issues with your AUVON Night Light, please refer to the following common troubleshooting steps:

- **Light does not turn on:**
  - Ensure the night light is securely plugged into a working electrical outlet.
  - Check the mode switch (OFF/AUTO/NIGHT) to ensure it is not set to 'OFF'.
  - In AUTO mode, ensure there is sufficient darkness and motion within the sensor's range.
  - In NIGHT mode, ensure there is sufficient darkness for the light sensor to activate.
- **Light stays on constantly:**
  - In AUTO mode, ensure there is no continuous motion within the sensor's range.
  - In NIGHT mode, ensure the ambient light is bright enough for the light sensor to deactivate the light. Avoid placing the light in areas that remain consistently dark.
- **Motion sensor is not responsive:**
  - Ensure the night light is set to AUTO mode.
  - Verify that the sensor lens is clean and unobstructed.
  - Confirm that the motion is within the specified range (3-5 meters) and angle (120°).

If the issue persists after trying these steps, please contact AUVON customer support for further assistance.

Specifications

Attribute	Detail
Brand	AUVON
Model Number	A5111
Product Dimensions	2.17"D x 2.17"W x 1.5"H
Item Weight	5.6 Ounces
Lamp Type	Night Light
Shade Color	White
Shade Material	Plastic
Switch Type	Push Button
Light Source Type	LED
Power Source	Plug-in Electric
Voltage	120 Volts
Brightness	1-50 Lumens (Adjustable)
Color Temperature	2700 Kelvin (Warm White)
Indoor/Outdoor Usage	Indoor
Included Components	4 Night Lights, 1 User Manual

Usage Scenarios

The AUVON Night Light is versatile and can be used in various indoor settings to provide subtle and effective illumination:

- **Bedrooms:** Provides a soft glow for nighttime navigation without disturbing sleep.
- **Bathrooms:** Ideal for late-night visits, preventing the need for bright overhead lights.
- **Hallways & Stairs:** Enhances safety by illuminating pathways and steps.
- **Children's Rooms:** Offers a comforting light for children.
- **Kitchens:** Useful for quick trips to the kitchen at night.

AUVON night lights are shown illuminating a bedroom, bathroom, hallway, and kitchen, demonstrating their versatile application in various home environments.

Warranty and Support

AUVON provides a **24-month warranty** for this product. For any technical assistance or warranty claims, please contact AUVON customer support. Our team is dedicated to ensuring your satisfaction and providing reliable support.
