- **Storage:** When not in use, store the keyboard in a clean, dry environment away from extreme temperatures and direct sunlight.

6. Troubleshooting

If you encounter issues with your keyboard, try the following solutions:

- **Keyboard Not Responding:**
 - Ensure the USB cable is securely connected to both the keyboard and the computer.
 - Try connecting the keyboard to a different USB port on your computer.
 - Test the keyboard on another computer to determine if the issue is with the keyboard or the original computer.
 - Restart your computer.
- **Specific Keys Not Working:**
 - Check for any physical obstructions under the non-functional keys.
 - Clean the keyboard as described in the Maintenance section.
 - Ensure no software conflicts are present (e.g., macro software interfering with standard key functions).
- **Backlighting Issues:**
 - If your model features adjustable backlighting, ensure it is not turned off or set to the lowest brightness level. Consult the Genius website for specific key combinations to control backlighting.
