Vaporesso LUXE Nano Kit

Vaporesso LUXE Nano Kit 80W User Manual

Model: LUXE Nano Kit

IMPORTANT SAFETY INFORMATION

Please read this manual carefully before using your Vaporesso LUXE Nano Kit to ensure safe and optimal performance. Keep this manual for future reference.

- Keep the device away from water and other conductive liquids.
- Do not expose the device to extreme temperatures (below 0°C or above 45°C).
- Do not drop, throw, or abuse the device, as this may cause damage.
- Use only the original charging cable provided.
- Keep out of reach of children and pets.
- E-liquids may contain nicotine, which is an addictive chemical. Not recommended for non-smokers, pregnant or breastfeeding women, or individuals with heart conditions.
- Dispose of the device and battery responsibly according to local regulations.

PACKAGE CONTENTS

The Vaporesso LUXE Nano Kit package typically includes the following items:

- 1 x Vaporesso LUXE Nano Mod (with built-in 2500mAh battery)
- 1 x SKRR-S Mini Tank (3.5ml)
- 1 x QF Meshed Coil 0.2Ω (Pre-installed)
- 1 x QF Strip Coil 0.15Ω
- 1 x Replacement Glass Tube (3.5ml)
- 1 x USB Charging Cable
- 1 x O-Ring Set
- 1 x User Guide
- 1 x Warranty Card

Image: All components included in the Vaporesso LUXE Nano Kit, neatly arranged. This includes the mod, tank, two coils, a spare glass tube, USB cable, O-rings, and documentation.

PRODUCT OVERVIEW

The Vaporesso LUXE Nano Kit is a compact and powerful vaping device, combining the LUXE Nano Mod with the SKRR-S Mini Tank. It features an intuitive interface and a comfortable design.

SETUP GUIDE

1. Charging the Device

Before first use, fully charge the device. Connect the USB charging cable to the micro-USB port on the bottom of the mod and plug the other end into a suitable USB power source (e.g., wall adapter, computer USB port). The screen will indicate charging status.

2. Installing the Coil

1. Unscrew the base of the SKRR-S Mini Tank.
2. Screw a new QF coil firmly into the base. Ensure it is seated correctly.
3. Prime the coil by dripping a few drops of e-liquid onto the cotton wicking ports of the coil.

Image: A disassembled view of the Vaporesso LUXE Nano Kit, illustrating how the coil is inserted into the tank base before reassembly.

3. Filling the Tank

1. To fill the tank, push the top cap to the side at the arrow indicator to reveal the filling port.
2. Insert the nozzle of your e-liquid bottle into the filling port and squeeze to fill the tank. Avoid filling into the central airflow tube.
3. Once filled, push the top cap back into place until it clicks securely.
4. After filling a new coil, let the tank stand for at least 5-10 minutes to allow the e-liquid to fully saturate the coil. This prevents dry hits.

Image: The Vaporesso LUXE Nano Mod and SKRR-S Mini Tank separated, demonstrating the tank's structure for filling and maintenance.

4. Attaching the Tank to the Mod

Screw the filled SKRR-S Mini Tank onto the 510 connection of the LUXE Nano Mod. Ensure it is finger-tight, but do not overtighten.

OPERATING INSTRUCTIONS

Power On/Off

To turn the device on or off, press the power button (large button on the side) 5 times rapidly within 2 seconds.

Adjusting Wattage

The LUXE Nano Kit operates in Variable Wattage (VW) mode. Use the adjustment buttons (usually located below the screen) to increase or decrease the wattage. Refer to the recommended wattage range printed on your coil for optimal performance.

Vaping

Once the device is powered on and the tank is filled and primed, press and hold the power button while inhaling from the mouthpiece. Release the button when you finish inhaling.

Screen Display

The TFT color screen displays important information such as current wattage, battery level, coil resistance, puff counter, and vaping duration. Navigate through menus and settings using the adjustment buttons as per the on-screen prompts.

MAINTENANCE

Cleaning the Tank

Regularly clean your tank to prevent e-liquid residue buildup. Disassemble the tank, rinse all components (except the coil) with warm water, and allow them to air dry completely before reassembly.

Replacing the Coil

Coils are consumable parts and need to be replaced regularly, typically every 1-2 weeks depending on usage and e-liquid. Follow the coil installation steps in the Setup Guide.

Battery Care

To prolong battery life, avoid fully discharging the battery frequently. Charge the device before the battery level drops too low. Store the device in a cool, dry place when not in use.

TROUBLESHOOTING

- "No Atomizer" / "Check Atomizer" Error:** Ensure the tank is screwed on properly and the coil is correctly installed and making contact. Try cleaning the 510 connection on both the mod and tank.
- "Low Battery" Warning:** Recharge the device using the provided USB cable.
- No Vapor Production:** Check battery level, ensure the device is powered on, verify coil installation, and confirm the tank has e-liquid.
- Leaking:** Ensure all O-rings are intact and properly seated. Check if the coil is screwed in tightly. Avoid overfilling the tank.
- Burnt Taste:** This indicates a dry or old coil. Prime new coils properly and replace old coils. Ensure wattage is within the recommended range for your coil.

SPECIFICATIONS

Feature	Specification
Brand	Vaporesso
Model	LUXE Nano Kit
Battery Capacity	2500mAh (Built-in)
Wattage Output	5-80W
Tank Capacity	3.5ml (SKRR-S Mini Tank)
