### 3. SETUP AND INITIAL USE

Follow these steps for initial setup and to ensure a comfortable fit:

- Unpack:** Carefully remove the sneakers from their packaging.
- Inspect:** Check the sneakers for any visible damage or manufacturing defects.

3. **Insert Foot:** Open the Velcro straps wide and slide your foot into the shoe.
4. **Adjust Straps:** Secure the Velcro straps firmly but comfortably. Ensure they are not too tight to restrict circulation, nor too loose to allow excessive movement.
5. **Check Fit:** Walk a few steps to assess the fit. Your toes should have a small amount of space at the front, and your heel should feel secure without slipping. The 4E width is designed to provide ample room for wider feet.

## 4. OPERATING INSTRUCTIONS

---

The WM-6000 sneakers are designed for general walking, light sports, and everyday wear. To maximize comfort and benefit from their features:

- **Proper Wearing:** Always ensure the Velcro straps are properly fastened before engaging in any activity to prevent injury and ensure stability.
- **Foot Movement:** The Twin Flex system in the sole is engineered to support the natural bending motion of your foot. Allow your foot to move naturally, and the shoe will provide responsive support.
- **Comfort for Wider Feet:** The 4E design provides extra width. If you have wider feet, you should experience a comfortable, non-constricting fit.
- **Activity Suitability:** While durable, these sneakers are best suited for activities that do not require specialized athletic footwear (e.g., intense running, professional sports).

## 5. CARE AND MAINTENANCE

---

Proper care will extend the life and appearance of your ASAHI WM-6000 sneakers:

- **Cleaning the Upper:** For the Polyester/PVC upper, wipe with a damp cloth and mild soap. Avoid harsh chemicals or abrasive cleaners.
- **Cleaning the Insole:** The removable insole can be hand-washed with mild soap and water. Rinse thoroughly and allow to air dry completely before placing it back into the shoe.
- **Drying:** Always air dry your sneakers at room temperature. Avoid direct sunlight or heat sources, as this can damage the materials.
- **Storage:** Store sneakers in a cool, dry place away from direct sunlight when not in use.
- **Avoid Machine Washing:** Do not machine wash or tumble dry, as this can damage the shoe's structure and materials.

## 6. TROUBLESHOOTING
