APPS2Car Adjustable Tablet Tripod Mount Adapter User Manual

Brand: APPS2Car | Model: IP2-T4

1. PRODUCT OVERVIEW

The APPS2Car Adjustable Tablet Tripod Mount Adapter is a versatile accessory designed to securely attach most tablets and cell phones (up to 11 inches) to any standard tripod, monopod, or selfie stick equipped with a 1/4-inch-20 thread. This mount enhances your ability to capture stable photos, record videos, and participate in hands-free activities by providing a stable platform for your device.

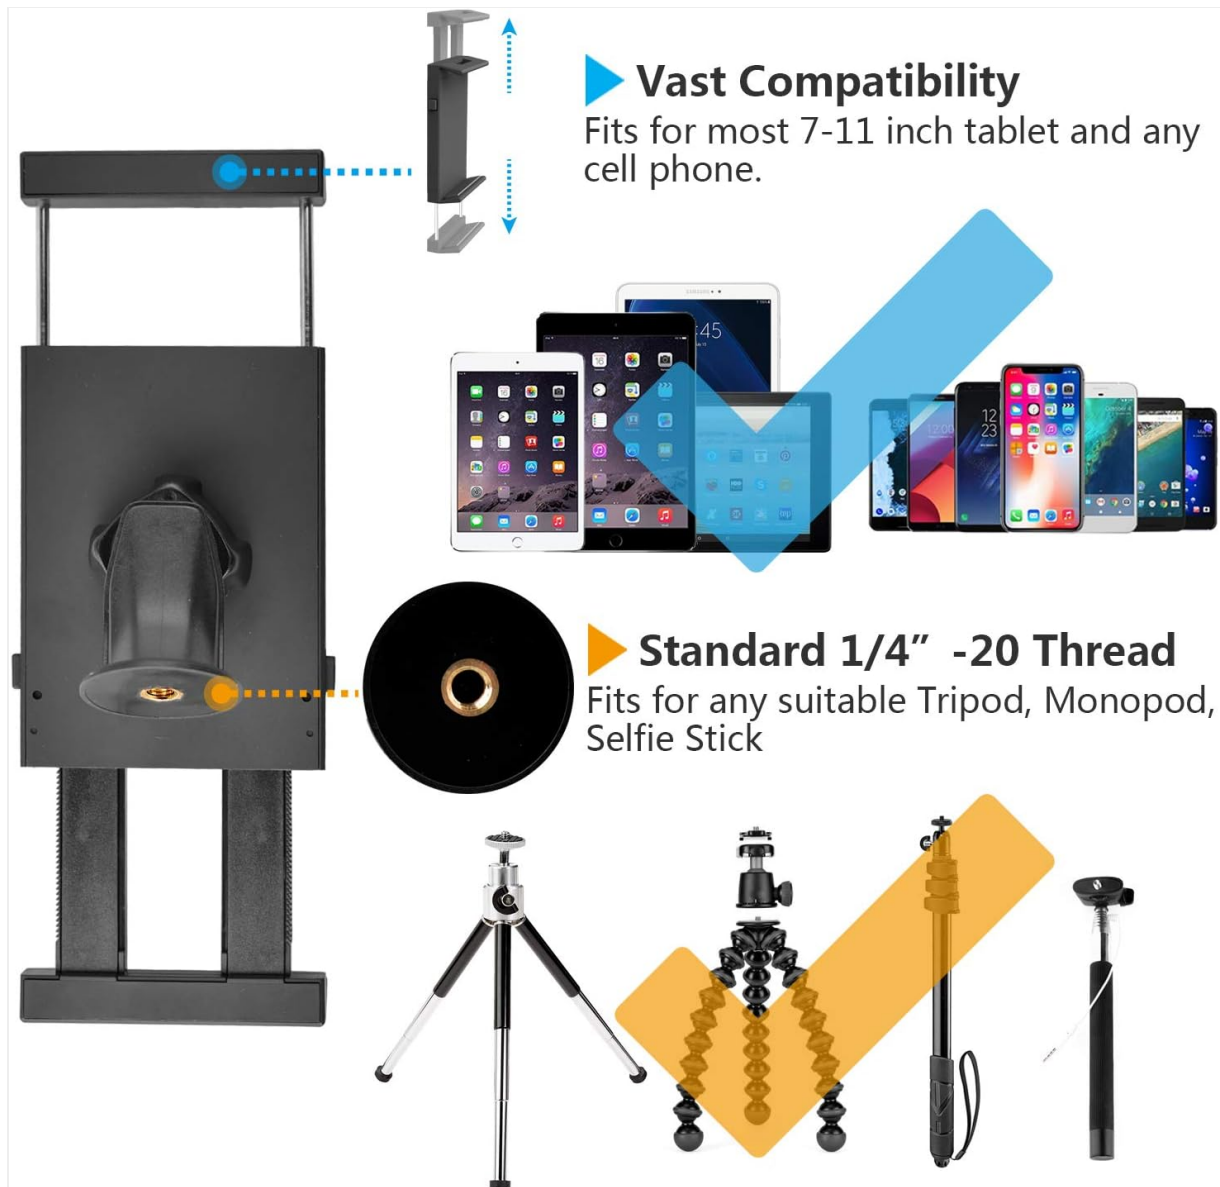

The APPS2Car Tablet Tripod Mount Adapter securely holds a tablet, demonstrating its primary function when attached to a standard tripod (tripod not included).

2. SETUP GUIDE

2.1 Attaching to a Tripod

1. Locate the standard 1/4-inch-20 threaded hole at the base of the APPS2Car mount.

2. Align this threaded hole with the 1/4-inch-20 screw on your tripod, monopod, or selfie stick.
3. Gently screw the mount onto the tripod until it is securely fastened. Do not overtighten.

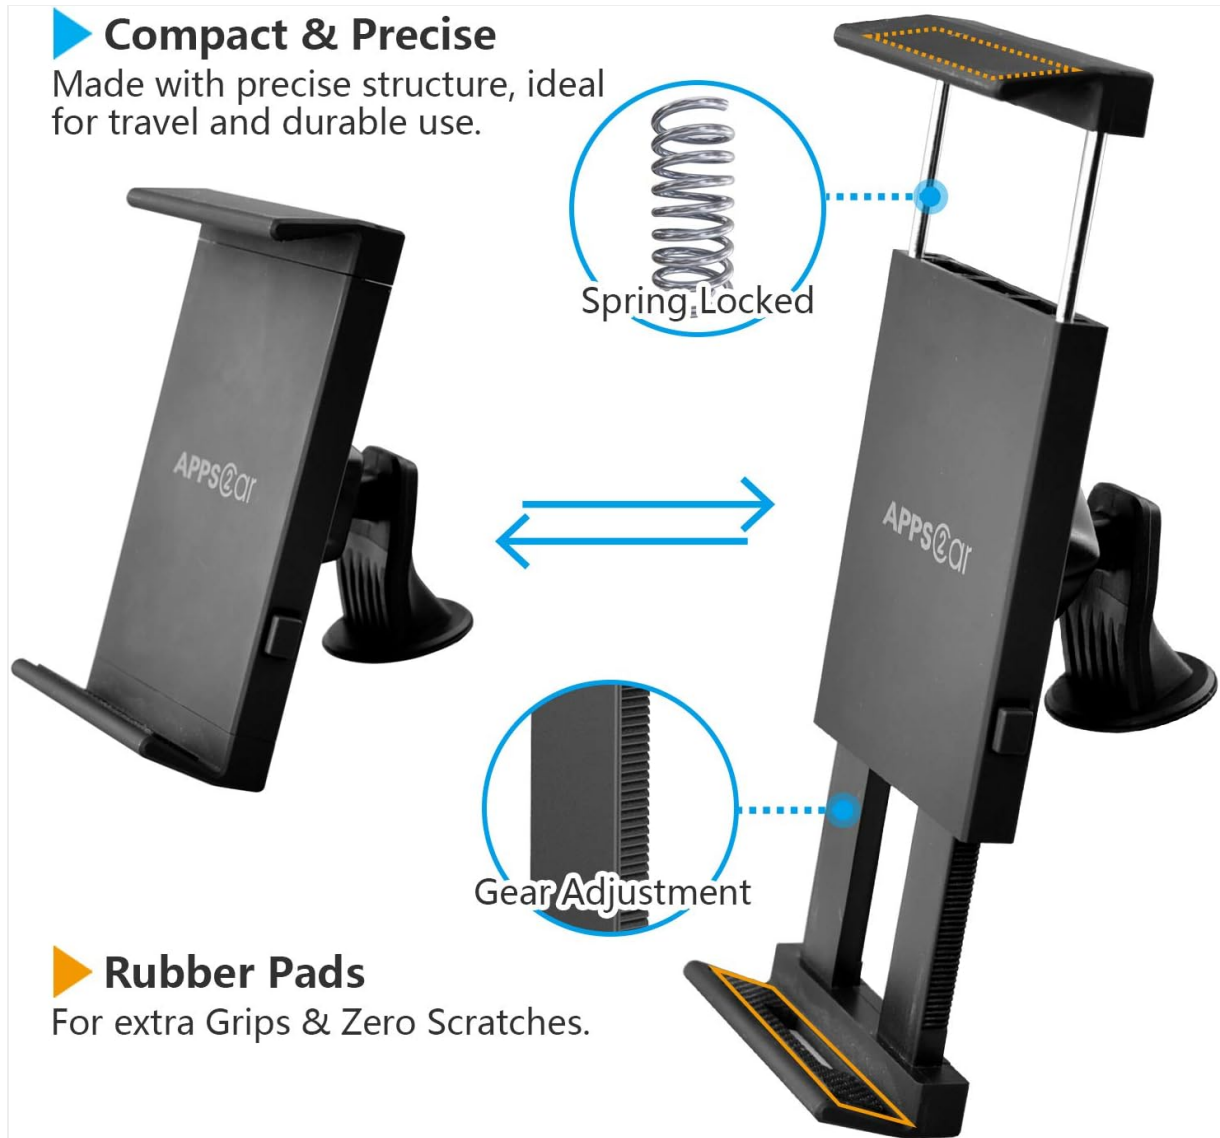

This graphic emphasizes the broad compatibility of the mount with most 7-11 inch tablets and cell phones. It also clearly shows the standard 1/4-inch-20 thread, indicating its universal fit for tripods, monopods, and selfie sticks.

2.2 Mounting Your Device

1. Identify the two-side buttons on the mount. These control the adjustable lower jaw.
2. Press both two-side buttons simultaneously to release the lower jaw and extend it to accommodate your device's size.
3. The upper jaw is spring-loaded. Pull the upper jaw upwards to create enough space for your tablet or cell phone.
4. Carefully insert your device between the jaws, ensuring it is centered and the rubber pads provide a secure grip.
5. Release the upper jaw, allowing the spring-locked system to firmly hold your device in place. Ensure the device is stable before use.

► Compact & Precise

Made with precise structure, ideal for travel and durable use.

► Rubber Pads

For extra Grips & Zero Scratches.

The image details the compact and precise structure of the mount, featuring a spring-locked mechanism for secure device holding, gear adjustment for precise sizing, and integrated rubber pads designed to provide extra grip and prevent scratches on devices.

3. OPERATION

3.1 Adjusting Device Position

The APPS2Car tablet mount features an innovative flexible ballhead joint construction, allowing for 360-degree rotation and tilting. This enables both vertical and horizontal application of your device.

- To rotate your device, gently turn the mount on the ballhead joint to achieve the desired orientation (portrait or landscape).
- To tilt your device, adjust the ballhead joint to angle your screen up or down as needed for optimal viewing or recording.

▶ Adjustable Phone Mount

Perfect for taking selfies, group photos, filming, vlogging and steady tripod shots.

A detailed view of the mount highlights its adjustable phone holding capability, demonstrating how it can rotate 360 degrees and accommodate both horizontal and vertical orientations for optimal viewing and recording.

3.2 Versatile Applications

This mount is ideal for a variety of hands-free uses:

- **Video Recording:** Achieve stable and professional-looking video footage.
- **Photo Shoots:** Take steady photos, including selfies and group shots.
- **Live Streaming/Music:** Perfect for stable live broadcasts or displaying sheet music.
- **Video Calls:** Conduct hands-free video conferences or online meetings.

This image illustrates the versatility of the APPS2Car mount, showcasing its application in diverse settings such as parties, kitchens, travel, and daily activities, effectively upgrading a standard tripod for multi-use tablet holding.

4. CARE AND MAINTENANCE

- **Cleaning:** Wipe the mount with a soft, damp cloth. Avoid using harsh chemicals or abrasive cleaners, which can damage the material.
- **Storage:** When not in use, store the mount in a cool, dry place away from direct sunlight and extreme temperatures.
- **Inspection:** Periodically check for any signs of wear or damage, especially to the spring mechanism and rubber pads, to ensure continued secure operation.

5. TROUBLESHOOTING

Issue	Possible Cause	Solution
Device does not fit or is loose.	Jaws not fully extended or device size exceeds limits.	Ensure both two-side buttons are pressed to fully extend the lower jaw. Confirm your device is within the 7-11 inch screen size compatibility.

Issue	Possible Cause	Solution
Mount feels unstable on tripod.	Mount not securely tightened to tripod.	Ensure the mount is firmly screwed onto the tripod's 1/4-inch-20 screw.
Device slips or scratches.	Rubber pads are worn or dirty.	Clean the rubber pads. If pads are significantly worn, contact customer support for assistance.

6. PRODUCT SPECIFICATIONS
