## IRON °FLASK 2520

# IRON °FLASK Hydration Flask User Manual

Model: 2520 | Brand: IRON °FLASK

## 1. PRODUCT OVERVIEW

---

The IRON °FLASK Camping & Hiking Hydration Flask is a versatile and durable water bottle designed to keep your beverages at optimal temperatures. Featuring double-walled, vacuum-insulated stainless steel construction, it ensures your drinks remain cold for up to 24 hours and hot for up to 12 hours. This leak-proof and BPA-free flask comes equipped with three interchangeable lids to suit various hydration needs.

## 2. KEY FEATURES

- **Double Wall Insulation:** Designed to prevent sweating and maintain beverage temperature. Keeps drinks cold for up to 24 hours and hot for up to 12 hours.

# DOUBLE WALL INSULATED

Image 2.1: Illustration of the double-wall vacuum insulation technology, demonstrating its ability to keep liquids cold or hot.

- **Three Interchangeable Lids:** Includes a Carabiner Straw Lid with two straws, a Flip Lid, and a Stainless Steel Lid. The stainless steel lid features a plastic interior for functionality.

# ONE BOTTLE THREE LIDS

With  
2 Straws

Image 2.2: The three distinct lids provided with the IRON FLASK: Flip Lid, Carabiner Straw Lid, and Stainless Steel Lid.

- **Premium 18/8 Stainless Steel:** Constructed from food-grade 18/8 stainless steel, ensuring the flask is BPA-free, non-toxic, and will not impart metallic tastes or rust.
- **Leak-Proof Design:** All included lids are designed to be leak-proof, providing secure transport of your beverages.

Image 2.3: Detail of the wide mouth and straw lid, emphasizing the sweatproof and leakproof construction.

- **Durable Powder Coat Finish:** The exterior features a powder-coated finish for enhanced durability and grip.

### 3. SETUP

1. **Initial Cleaning:** Before first use, hand wash the flask and all lids thoroughly with warm, soapy water. Rinse completely and allow to air dry.
2. **Lid Assembly:**
  - **Carabiner Straw Lid:** Insert one of the provided straws firmly into the designated opening on the underside of the lid.
  - **Flip Lid:** Ensure the flip mechanism operates smoothly.
  - **Stainless Steel Lid:** Verify the internal plastic seal is properly seated.
3. **Secure Lids:** Always ensure the chosen lid is screwed on tightly to prevent leaks.

### 4. OPERATING INSTRUCTIONS

#### 4.1 Filling Your Flask

- Unscrew the desired lid from the flask.

- Pour your chosen beverage into the wide mouth opening. Do not overfill; leave some space at the top to accommodate the lid and prevent spills.
- Securely screw the lid back onto the flask until it is hand-tight.

## 4.2 Using the Lids

- **Carabiner Straw Lid:** Flip up the straw mouthpiece to drink. The integrated carabiner allows for easy attachment to bags or gear.
- **Flip Lid:** Press the button or lift the tab to open the drinking spout. Close firmly to seal.
- **Stainless Steel Lid:** This lid provides a tight seal for maximum temperature retention. Unscrew completely to drink.

## 4.3 Temperature Retention

The double-wall vacuum insulation is designed to keep cold liquids cold for up to 24 hours and hot liquids hot for up to 12 hours. For best results:

- For cold drinks, pre-chill the flask with ice water for a few minutes before filling.
- For hot drinks, pre-heat the flask with hot water for a few minutes before filling.

## 5. MAINTENANCE AND CARE

---

Proper care will extend the life and performance of your IRON °FLASK.

- **Hand Wash Only:** The flask and all lids should be hand washed with warm, soapy water. Do NOT use a dishwasher, as this can damage the insulation and exterior finish.
- **Cleaning Straws:** Use the provided straw brush to clean the inside of the straws thoroughly.
- **Drying:** Allow all components to air dry completely before reassembling or storing to prevent odor and mildew.
- **Storage:** Store the flask with the lid off to allow for air circulation.
- **Avoid Abrasives:** Do not use abrasive cleaners or scrubbers, as they can scratch the finish.

## 6. TROUBLESHOOTING

Problem	Possible Cause	Solution
Flask is leaking.	Lid not properly secured or seal is dislodged/damaged.	Ensure lid is screwed on tightly. Check the silicone gasket/seal inside the lid and around the mouth of the bottle for proper placement and any damage. Replace if necessary.
Beverage not staying cold/hot.	Lid not sealed, extreme external temperatures, or flask not pre-chilled/pre-heated.	Verify the lid is tightly sealed. Avoid leaving the flask in direct sunlight or extreme cold for extended periods. Pre-chill or pre-heat the flask before filling.
Metallic taste in drink.	Improper cleaning or residue from previous use.	Thoroughly hand wash the flask and lids with warm, soapy water. Ensure all residue is removed. The 18/8 stainless steel is designed not to impart taste, so ensure it's clean.

## 7. SPECIFICATIONS

Attribute	Detail
Brand	IRON °FLASK
Model Name	Wide Mouth Straw (Model 2520)
Capacity	40 Ounces (approx. 2.5 Pounds)
Color	Midnight Black
