## Connectivity

Universal connectivity options include Bluetooth 5.3 for stable wireless streaming from smartphones/tablets, and wired connections via optical, AUX, and USB ports. It works seamlessly with smart TVs, 4K TVs, PCs, projectors, and gaming consoles (HDMI not supported).

## DSP with 3 Equalized Modes

### Music Mode

Rich bass, delivering a resonant musical journey

### Movie Mode

Immersive experience, capturing every cinematic detail

### News Mode

Crystal-clear vocals, enhancing clarity in spoken words

### Connection Options

- **Optical (SPDIF) Connection:** Connect the optical cable from the soundbar's optical port to your TV's optical output. Ensure protective caps are removed from the cable ends. You will need to change your TV's audio output to optical or external speaker and set the audio format to PCM. Disable Dolby and DTS on your TV, Netflix, Amazon Prime Video, HBO, Hulu, YouTube, and other streaming video apps, as the soundbar does not support these formats.

Your browser does not support the video tag.

- **AUX Connection:** Connect the 3.5mm audio cable from the soundbar's AUX port to your device's audio output. Note that the AUX port cannot be used as a headphone jack.
- **USB Connection:** The USB interface is suitable only for playing audio from a U disk or updating the firmware. It cannot supply power to the soundbar.
- **Bluetooth Connection:** To pair your device, ensure the soundbar is powered on and in Bluetooth mode (indicated by 'bt' on the LED display). On your smartphone or tablet, go to Bluetooth settings and select
