WOPET Wopet Automatic Pet Feeder

WOPET Automatic Cat Feeder with Camera

INSTRUCTION MANUAL

Introduction

Thank you for choosing the WOPET Automatic Cat Feeder with Camera. This smart pet feeder is designed to provide convenience and peace of mind, ensuring your pets are fed on schedule and allowing you to monitor them remotely. With its 7L capacity, app control, HD camera, and voice recording features, it offers a comprehensive solution for modern pet care.

Setup Guide

Follow these steps to set up your WOPET Automatic Cat Feeder:

1. **Unpack the Feeder:** Carefully remove all components from the packaging, including the main feeder unit, food tray, power adapter, and any included accessories.

2. **Assemble the Food Tray:** Attach the food tray securely to the main feeder unit. Ensure it clicks into place to prevent accidental detachment.
3. **Power Connection:** Connect the included power adapter to the feeder's power port and plug it into a wall outlet. For battery backup, insert 3 D-size batteries (not included) into the battery compartment at the bottom of the unit. It is recommended to use both power sources for uninterrupted operation during power outages.
4. **Download the App:** Search for the "WOPET" or "Wopet Lifestyle" app in your smartphone's App Store (iOS) or Google Play Store (Android) and install it.
5. **Connect to Wi-Fi:** Open the WOPET app and follow the on-screen instructions to connect your feeder to your home's 2.4GHz Wi-Fi network. Ensure your phone is also connected to a 2.4GHz network during the initial setup.

Operating Instructions

Once set up, you can control your WOPET feeder using the smartphone app:

- **Scheduling Feeds:** Use the app to set up to 6 meals per day. For each meal, you can customize the portion size (up to 20 portions) to meet your pet's dietary needs.
- **Manual Feeding:** Dispense food instantly by using the manual feed option in the app.
- **Voice Recording:** Record a 10-second personalized voice message through the app. This message will play automatically at each scheduled feeding time to call your pet to their meal.
- **HD Camera Monitoring:** The integrated HD camera allows you to view your pet in real-time through the app. You can also capture photos and videos of your pet.
- **Two-Way Audio:** Utilize the built-in microphone and speaker to talk to your pet remotely, providing comfort and interaction even when you're away.

Maintenance

Regular maintenance ensures the longevity and hygienic operation of your feeder:

- **Cleaning:** The food tank and food bowls are detachable for easy cleaning. Hand wash these components with mild soap and water, then rinse thoroughly and dry completely before reassembling.
- **Refilling:** Monitor the food level through the transparent window on the front of the feeder. Refill as needed to ensure your pet never runs out of food. The top lock mechanism helps prevent pets from accessing the food directly.
- **Battery Check:** Periodically check the D-size backup batteries (if installed) to ensure they are functioning correctly, especially if relying on them during power outages.

Troubleshooting

Here are some common issues and their potential solutions:

- **Feeder Not Connecting to Wi-Fi:** Ensure your Wi-Fi network is 2.4GHz, as the feeder does not support 5GHz networks. If you have a dual-band router with a single SSID, try separating the 2.4GHz and 5GHz bands or setting up a guest network on 2.4GHz. Keep the feeder close to the router during setup.
- **Food Dispensing Errors/Jams:** Check for any food blockages in the dispenser mechanism. Ensure the food bowl is not overfilled, which can cause food to back up. Use dry kibble of appropriate size for the feeder.
- **Remote Access Issues:** If you cannot connect to the feeder when away from home, ensure your home Wi-Fi network is stable and the feeder is properly connected. Verify that the app has necessary permissions on your phone and that your phone's data connection is active.
- **Camera View Limitations:** The camera's angle may not always show the food bowl directly. Consider adjusting the feeder's placement or using a small mirror to reflect the view of the food bowl if direct monitoring of food consumption is critical.
- **Red Indicator Light Stays On:** This may indicate a dispensing error or low food level. Check the food tank and clear any jams.

Specifications

Feature	Detail
Brand	WOPET
Model Number	Wopet Automatic Pet Feeder
Capacity	7L / 29 cups
Dimensions (LxWxH)	9.8 x 13.7 x 15.3 inches
Item Weight	2.2 pounds (1 Kilogram)
Material	Plastic
Color	White-1
Power Supply	Power Adapter (included) or 3 x D Batteries (not included)
Special Features	Timer, Voice Recording, HD Camera, Speaker, App Control
Target Species	Cats, Dogs (All Breed Sizes)
