## SETUP INSTRUCTIONS

1. **Install SIM Card:** Open the back cover of the router. Carefully insert your 4G SIM card into the designated SIM card slot. Ensure the card is inserted correctly according to the diagram.
2. **Install Micro SD Card (Optional):** If you wish to use external storage, insert a Micro SD card (up to 32GB, not included) into the Micro SD card slot.
3. **Install Battery:** Place the provided battery into its compartment, ensuring the contacts align. Close the back cover securely.
4. **Charge Device:** Connect the router to a power source using the supplied USB charging cable. The battery indicator will show charging status.
5. **Power On:** Press and hold the power button (usually located on the front or side) until the device powers on and indicators light up.

**Equipped with a standard Micro SD card slot, up to 32GB  
(SD card is NOT included)**

## OPERATING INSTRUCTIONS

1. **Connect to Wi-Fi:** On your smartphone, tablet, or computer, search for available Wi-Fi networks. Select the network name (SSID) displayed on the router's screen or label (e.g., 4GMIFI\_4767). Enter the Wi-Fi password (e.g., 1234567890) when prompted.
2. **Access Web Interface:** Open a web browser on a connected device and enter the router's IP address (e.g., 192.168.0.1) into the address bar. Log in using the default username (admin) and password (admin) to configure settings.
3. **Multi-User Access:** The router supports connection for up to 10 users simultaneously, providing stable signal for all connected devices.

**Support to restore the factory settings, you can make this setting when necessary, clear all the data, re-set the router**

**WIFI name: 4GMIFI\_4767**  
**WIFI password: 1234567890**

## MAINTENANCE

- **Charging:** Charge the device using the provided USB cable and a standard 5V/1A power adapter. Avoid using incompatible chargers.
- **Battery Care:** To prolong battery life, avoid extreme temperatures and do not overcharge the device. If the device will not be used for an extended period, charge it partially before storage.
- **Cleaning:** Use a soft, dry cloth to clean the router. Do not use liquid cleaners or solvents.

# USB Charging

Convenient charging method, computer, notebook, car charger, charging treasure, etc. can provide charging for the router

## TROUBLESHOOTING

- **No Signal/Cannot Connect:**
  - Ensure the SIM card is correctly inserted and active.
  - Check if the device is within a 4G LTE coverage area.
  - Restart the router.
- **Slow Internet Speed:**
  - Reduce the number of connected devices.
  - Move closer to the router for a stronger signal.
  - Check your data plan with your service provider.
- **Cannot Access Web Interface:**
  - Ensure your device is connected to the router's Wi-Fi.

- Verify the IP address (192.168.0.1) is entered correctly.
- Try a different web browser.
- **Reset to Factory Settings:** If issues persist, you can restore the router to its factory settings. Locate the reset button (often a small pinhole) and press it with a thin object for about 5-10 seconds while the device is powered on. This will clear all data and settings.
