Superior Electronics SUPCU005 Airco 5000 Universal Air Conditioner Remote Control User Manual

Model: SUPCU005 Airco 5000

INTRODUCTION

The Superior Electronics SUPCU005 Airco 5000 is a universal remote control designed for air conditioning units. It is compatible with over 5000 models from major air conditioner brands, offering a convenient replacement or spare remote. This manual provides essential information for its proper use and maintenance.

SETUP

1. Battery Installation

The remote control requires two AAA batteries (not included). Ensure correct polarity when inserting the batteries.

1. Open the battery compartment cover on the back of the remote control.
2. Insert two AAA batteries, matching the (+) and (-) terminals as indicated inside the compartment.
3. Close the battery compartment cover securely.

2. Programming the Remote Control (Code Search)

There are two main methods to program your remote control: Automatic Search and Manual Code Entry.

Automatic Search Method:

1. Ensure your air conditioner is powered on.
2. Point the remote control towards the air conditioner.
3. Press and hold the **"SET"** button for approximately 3-5 seconds until the code on the remote's display starts flashing.
4. The remote will now automatically cycle through its internal code library. Observe your air conditioner for a response (e.g., a beep, turning on/off, or changing mode).
5. Once your air conditioner responds, immediately press any button (e.g., **"ON/OFF"**) to stop the code search.
6. Test all functions (temperature, mode, fan speed) to ensure the code is correct. If not, repeat the process.

Manual Code Entry Method:

Refer to the included code list (if available) for your air conditioner brand.

1. Ensure your air conditioner is powered on.
2. Press and hold the **"SET"** button for approximately 3-5 seconds until the code on the remote's display starts flashing.
3. Use the **"TEMP+"** or **"TEMP-"** buttons to manually enter the 3-digit code for your air conditioner brand.
4. Once the correct code is displayed, press the **"ON/OFF"** button to confirm and exit programming mode.
5. Test all functions. If the air conditioner does not respond correctly, try the next code listed for your brand or use the automatic search method.

OPERATING INSTRUCTIONS

Familiarize yourself with the main functions of your remote control:

- **ON/OFF:** Powers the air conditioner on or off.
- **MODE:** Cycles through operating modes (e.g., Cool, Heat, Fan, Dry, Auto).
- **TEMP+ / TEMP-:** Adjusts the desired temperature.
- **FAN:** Adjusts the fan speed (e.g., Auto, Low, Med, High).
- **SWING:** Controls the louver swing direction.
- **LIGHT:** Activates or deactivates the remote's LED backlight.
- **TIME ON / TIME OFF:** Sets a timer for the air conditioner to turn on or off automatically.
- **SET:** Used for programming and confirming settings.
- **°C/°F:** Toggles between Celsius and Fahrenheit temperature display.

MAINTENANCE

Battery Replacement:

When the remote control's display becomes dim or the range decreases, it's time to replace the batteries. Follow the battery installation steps in the Setup section. Always replace both batteries at the same time with new AAA batteries.

Cleaning:

Wipe the remote control with a soft, dry cloth. Do not use liquid cleaners or abrasive materials, as these can damage the remote's surface or internal components.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Remote not working / No display	Dead or incorrectly installed batteries.	Replace batteries with new AAA batteries, ensuring correct polarity.

Problem	Possible Cause	Solution
Air conditioner not responding	Incorrect code programmed; remote not pointed at AC unit; obstruction.	<ul style="list-style-type: none">• Re-program the remote using the automatic or manual code search method.• Ensure the remote is pointed directly at the air conditioner's receiver.• Remove any obstructions between the remote and the AC unit.
Only some functions work	Partially compatible code programmed.	Try the next code for your brand or perform an automatic search again to find a more compatible code.
Remote range is poor	Low batteries; infrared emitter obstructed.	Replace batteries. Ensure the remote's infrared emitter (top end) is clean and unobstructed.
