2. SAFETY INFORMATION

Always prioritize safety during installation and use. Failure to follow these safety guidelines may result in injury or damage to the product or motorcycle.

- **Read all instructions:** Ensure you understand all steps before beginning installation.
- **Use appropriate tools:** Only use tools specified or recommended for motorcycle maintenance.
- **Wear protective gear:** Always wear safety glasses and gloves during installation.
- **Motorcycle stability:** Ensure the motorcycle is stable and securely supported before starting any work.
- **Tighten fasteners correctly:** All bolts and nuts must be tightened to the manufacturer's specified torque settings. Check tightness periodically.
- **Professional installation:** If you are unsure about any part of the installation process, consult a qualified motorcycle mechanic.

3. PACKAGE CONTENTS

Verify that all components listed below are present in your package before proceeding with installation. If any parts are missing or damaged, contact your GIVI dealer immediately.

- 1x Rear Splash Guard main body
- 1x Mounting bracket set (left and right)
- 1x Hardware kit (bolts, washers, nuts)
- 1x Instruction leaflet (this document)

4. SETUP AND INSTALLATION

Follow these steps carefully to install the GIVI RM2139KIT Rear Splash Guard on your motorcycle.

4.1. Preparation

1. Park the motorcycle on a flat, stable surface and ensure it is securely supported, preferably on a center stand or paddock stand.
2. Allow the exhaust system to cool completely before handling.
3. Gather all necessary tools: Hex keys, wrenches, torque wrench.

4.2. Mounting Bracket Installation

1. Identify the designated mounting points on your motorcycle's swingarm or frame, typically near the rear wheel axle. Refer to your motorcycle's service manual for specific locations if needed.
2. Attach the left mounting bracket to the corresponding mounting point using the provided bolts and washers. Hand-tighten only.
3. Repeat for the right mounting bracket.

Image 4.1: Illustrative image showing the attachment of mounting brackets to the motorcycle frame. Ensure correct orientation.

4.3. Splash Guard Attachment

1. Position the main splash guard body between the two installed mounting brackets.
2. Align the holes on the splash guard with the holes on the brackets.
3. Insert the remaining bolts through the aligned holes and secure with nuts and washers. Hand-tighten all fasteners.
4. Once all components are in place, progressively tighten all bolts to the recommended torque specifications (refer to your motorcycle's service manual or GIVI's specific instructions if provided).

Video 4.1: Installation Guide for GIVI RM2139KIT. This video demonstrates the complete installation process of the rear splash guard, including bracket and main body attachment. (Note: This is a placeholder video URL, actual video would be provided by GIVI).

4.4. Final Check

1. Ensure all bolts are securely tightened.
2. Check for any interference between the splash guard and moving parts of the motorcycle (e.g., wheel, chain, suspension) by rotating the wheel and compressing the suspension.
3. Confirm that the splash guard does not obstruct any lights, reflectors, or license plate.

5. OPERATION

The GIVI RM2139KIT Rear Splash Guard is a passive accessory designed to protect the rider and motorcycle from road spray and debris. Once correctly installed, no further operational steps are required.

- The splash guard functions automatically to deflect water and mud.
- Regularly inspect the splash guard for any signs of damage or loose fasteners, especially after riding in harsh conditions.

6. MAINTENANCE

Proper maintenance will extend the life of your GIVI RM2139KIT Rear Splash Guard and ensure its continued effectiveness.

6.1. Cleaning

- Clean the splash guard regularly with mild soap and water.
- Avoid using abrasive cleaners or solvents, as these can damage the material.
- Rinse thoroughly and dry with a soft cloth.

6.2. Inspection

- Periodically check all mounting bolts and nuts for tightness. Re-tighten if necessary.
- Inspect the splash guard for cracks, chips, or other damage. Replace if significantly damaged.
- Ensure there is no excessive vibration or movement of the splash guard during operation.

7. TROUBLESHOOTING

This section addresses common issues you might encounter with your GIVI RM2139KIT Rear Splash Guard.

Problem	Possible Cause	Solution
Splash guard is loose or vibrating	Mounting bolts are not tightened sufficiently.	Check and tighten all mounting bolts to the recommended torque.

Problem	Possible Cause	Solution
Splash guard interferes with wheel/tire	Incorrect installation or alignment.	Re-check installation steps, ensuring correct positioning and clearance. Adjust if possible, or consult a professional.
Excessive road spray despite installation	Splash guard may be damaged or incorrectly positioned.	Inspect for damage. Ensure the splash guard is correctly aligned to cover the tire's spray path.

8. SPECIFICATIONS

- **Brand:** GIVI
- **Model:** RM2139KIT
- **Auto Part Position:** Rear
- **Manufacturer Part Number:** givi_RM2139KIT
- **ASIN:** B07N866ZL4

9. WARRANTY AND SUPPORT

GIVI products are manufactured to high standards and are covered by a limited warranty against manufacturing defects. For specific warranty terms and conditions, please refer to the documentation provided with your purchase or visit the official GIVI website.

For technical support, missing parts, or warranty claims, please contact your authorized GIVI dealer or the GIVI customer service department. When contacting support, please have your product model (RM2139KIT) and purchase information readily available.
