glacio Clear Ice Maker Set Instruction Manual

Brand: glacio | Model: XJ-RGPE-LTAP-parent2

Introduction

This instruction manual provides detailed guidance for the proper use and maintenance of your glacio Clear Ice Maker Set. Designed to produce crystal clear, slow-melting ice cubes, this set enhances the quality of your beverages by minimizing dilution. Please read these instructions thoroughly before first use to ensure optimal performance and longevity of your product.

Product Components

The glacio Clear Ice Maker Set includes the following components:

- **Outer Insulated Container:** A black container designed to facilitate directional freezing, pushing impurities to the bottom.
- **Silicone Ice Molds:** Two silicone molds that form the clear ice cubes.
- **Inner Tray/Separator:** A plastic tray that holds the silicone molds and separates the clear ice from the cloudy ice formed at the bottom.

Figure 1: Overview of the glacio Clear Ice Maker Set, showing the insulated container, the ice molds, and a clear ice cube in a glass.

Setup and First Use

1. **Clean Components:** Before first use, wash all components (insulated container, silicone molds, and inner tray) with warm, soapy water. Rinse thoroughly and allow to air dry. The components are dishwasher safe.
2. **Assemble Molds:** Place the two silicone ice molds into the designated slots on the inner tray. Ensure they are seated correctly.
3. **Fill Container:** Fill the outer insulated container with water up to the indicated fill line. This line is typically a vertical slot or mark on the inside of the container. Using filtered water is recommended for the clearest ice.
4. **Insert Molds:** Carefully lower the assembled inner tray with the silicone molds into the water-filled insulated container. As you lower it, water will fill the molds. Ensure the inner tray is fully seated. Some water may overflow into the grooves on top; this is normal.
5. **Freeze:** Place the entire assembled unit into your freezer. For optimal clear ice formation, allow at least 24 to 36 hours for the ice to freeze completely. Avoid leaving the container in the freezer for excessively long periods (e.g., several days) as this can cause the entire water block to freeze solid, making ice removal difficult.

Figure 2: The insulated container with the inner tray and silicone molds.

Operating Instructions: Ice Removal

After the recommended freezing time, your clear ice cubes are ready for removal:

1. **Remove from Freezer:** Take the entire ice maker set out of the freezer.
2. **Separate Components:** Gently pull the inner tray with the silicone molds upwards and out of the insulated container. You may need to work it up on each side until about half an inch is exposed, then it can usually be pulled straight up. The cloudy ice will remain in the bottom of the insulated container.
3. **Extract Ice Cubes:** Carefully separate the silicone molds from the inner tray. Then, gently flex the silicone molds to release the clear ice cubes. The ice cubes should come out easily.
4. **Serve:** Place your perfectly clear ice cubes into your preferred beverage. These large, dense cubes melt slowly, preserving the flavor of your drink.

Care and Maintenance

- **Cleaning:** All components are dishwasher safe. Alternatively, wash by hand with warm water and mild dish soap. Rinse thoroughly to remove any soap residue.
- **Drying:** Allow all parts to air dry completely before reassembling or storing to prevent water spots or odors.
- **Storage:** Store the ice maker set in a clean, dry place when not in use.
- **Regular Use:** For best results, use and clean the ice maker regularly.

Troubleshooting

Problem	Possible Cause	Solution

Problem	Possible Cause	Solution
Ice cubes are not clear.	Impurities in water; insufficient freezing time.	Use filtered or distilled water. Ensure the unit freezes for at least 24-36 hours.
Difficulty removing ice cubes.	Unit left in freezer too long; molds stuck.	Do not leave the unit in the freezer for more than 36 hours. If stuck, run a small amount of warm water over the outside of the container to loosen the ice block at the bottom. Gently work the inner tray out. Do not force.
Ice cubes shatter when handled.	Sudden temperature change.	Avoid rinsing clear ice cubes with warm water immediately after removal, as this can cause them to crack or shatter.

Specifications

- **Material:** Silicone (molds), Plastic (container/tray)
- **Color:** Black
- **Ice Shape:** Cube
- **Number of Cavities:** 2
- **Product Dimensions (L x W x H):** 5.04" x 8.82" x 7.83"
- **Dishwasher Safe:** Yes
- **Material Type Free:** BPA Free
- **Item Weight:** 2.57 pounds

Warranty and Support

Specific warranty information for the glacio Clear Ice Maker Set is not provided in this manual. For any product support, warranty claims, or further inquiries, please refer to the contact information provided at the point of purchase or visit the official glacio website.

Ask a question about this manual

Ask about setup, troubleshooting, compatibility, parts, safety, or missing instructions. Manuals+ will review the question and use this page's manual context to help answer it.
