WHAT'S IN THE BOX

Please verify that all components are present in the packaging:

- Vivitar DRC-333 Air Defender X Camera Drone

- Remote Control
- Lithium Polymer Battery
- USB Charging Cable
- Spare Propellers (typically included)
- User Manual (this document)

SETUP

1. Charging the Battery

The drone is powered by a Lithium Polymer battery. Ensure it is fully charged before each flight.

1. Connect the charging cable to the drone's battery port.
2. Plug the other end of the charging cable into a suitable USB power source (e.g., computer USB port, USB wall adapter).
3. The charging indicator light will show the charging status. A full charge typically takes approximately 120 minutes.
4. Disconnect the charger once charging is complete.

2. Installing Propellers

If the propellers are not pre-installed, securely attach them to the correct motors. Ensure you match propeller type (e.g., A or B) to the corresponding motor as indicated on the drone or in a separate quick start guide.

3. Remote Control Setup

Insert the required batteries into the remote control (battery type typically specified on the remote or packaging). Attach your smartphone to the bracket on the controller for First Person View (FPV) functionality.

4. App Installation and Connection

Download the companion smartphone app for the Vivitar DRC-333 from your device's app store (e.g., Apple App Store, Google Play Store).

1. Enable Wi-Fi on your smartphone.
2. Connect to the drone's Wi-Fi network (e.g.,
