Geepas GFL4647

Geepas GFL4647 Rechargeable LED Flashlight User Manual

Model: GFL4647

Introduction

Thank you for choosing the Geepas GFL4647 Rechargeable LED Flashlight set. This manual provides essential information for the safe and efficient operation, maintenance, and care of your new flashlights. Please read these instructions thoroughly before first use and retain them for future reference.

Package Contents

The Geepas GFL4647 set includes the following items:

- One (1) Geepas GFL4647 Large Rechargeable LED Flashlight
- One (1) Geepas Compact Rechargeable LED Penlight
- One (1) Switching Adapter for charging
- Internal, non-removable batteries (pre-installed in both flashlights)

Product Features

The Geepas GFL4647 flashlights offer a range of features designed for reliability and performance:

- **Rechargeable Design:** Both flashlights feature built-in recharging units for convenience.
- **Durable Construction:** Crafted from Aluminium with an Anodized Finish for enhanced durability.
- **LED Light Source:** Utilizes bright LED technology for efficient illumination.
- **Robust Protection:** Water Resistant, Shock Resistant, and Corrosion Resistant for use in various environments.
- **Extended Usage:** Provides approximately 4.5 hours of continuous operation on a full charge.
- **Long Battery Life:** High-quality internal battery designed for up to 1500 recharge cycles.
- **Long Beam Distance:** The larger flashlight offers a real range distance of up to 1500 meters.
- **Regulated Intensity:** Optimized electronics ensure consistent light output.
- **Certified Quality:** ESMA Certified for quality assurance.

Setup

Initial Charging

Before first use, it is recommended to fully charge both flashlights. The batteries are internal and non-removable.

1. Locate the charging port on each flashlight. For the larger flashlight, this is typically covered by a rubber seal to maintain water resistance.
2. Connect the provided switching adapter to a suitable power outlet.
3. Insert the charging cable's connector into the flashlight's charging port.
4. Allow the flashlight to charge until the charging indicator (if present) signals a full charge, or for several hours for the initial charge.
5. Once charging is complete, disconnect the adapter and securely close the charging port cover to maintain water resistance.

Operating Instructions

Using the Large GFL4647 Flashlight

- To turn the flashlight ON, press the power button located on the side of the body.
- Press the button again to cycle through different light modes (if available) or to turn the flashlight OFF.

Using the Compact LED Penlight

- To turn the penlight ON, press the power button, typically located at the end or side of the penlight.
- Press the button again to turn the penlight OFF.

Charging

To maintain optimal performance, recharge your flashlights when the light output diminishes. The internal batteries are designed for long-term use and many recharge cycles.

- Always use the original Geepas switching adapter provided with your set.
- Ensure the charging port is clean and dry before connecting the adapter.
- Avoid overcharging by disconnecting the adapter once the flashlight is fully charged.
- If the flashlight will not be used for an extended period, charge it periodically (e.g., every 3-6 months) to preserve battery health.

Maintenance

Proper care will extend the life and performance of your Geepas flashlights.

- **Cleaning:** Wipe the exterior of the flashlights with a soft, dry cloth. Do not use abrasive cleaners or solvents.
- **Storage:** Store the flashlights in a cool, dry place away from direct sunlight and extreme temperatures.
- **Battery Care:** As mentioned, recharge periodically if not in use to prevent deep discharge.
- **Water Resistance:** Ensure all caps and charging port covers are securely closed to maintain water resistance.

Troubleshooting

If you encounter issues with your flashlights, refer to the following common solutions:

- **Flashlight not turning on:**
  - Ensure the battery is charged. Connect to the charger and allow sufficient time to charge.
  - Verify the power button is fully pressed.
- **Light is dim or flickering:**
  - The battery may be low. Recharge the flashlight fully.
- **Charging not working:**
  - Check if the charging adapter is properly connected to both the power outlet and the flashlight.
  - Ensure the power outlet is functional.
  - Inspect the charging cable and port for any visible damage.

If these steps do not resolve the issue, please contact Geepas customer support for further assistance.

Specifications

Feature	Detail
Model Number	GFL4647
Light Source Type	LED
Body Material	Aluminium with Anodized Finish
Power Source	Battery Powered (Rechargeable)
Battery Type	Internal/Non-removable Lithium Ion
Usage Hours	Approximately 4.5 Hours
