## 4. SETUP AND ASSEMBLY INSTRUCTIONS

The Mellow 12-inch Metal Platform Bed Frame features an easy quick-lock assembly system, requiring no additional tools beyond those included in the package. Assembly can typically be completed in minutes.

### Assembly Steps:

1. Unpack all components and lay them out on a clean, flat surface. Refer to the package contents image to identify each part.
2. Connect the main frame sections using the quick-lock mechanism. Ensure each connection clicks securely into place.
3. Attach the support legs to the designated points on the frame. Tighten all bolts using the provided hex key.
4. Unfold the steel slats and place them onto the frame. The slats are designed to fit snugly and provide even support.
5. For models with anti-slip tape on the slats, peel off only the top vinyl strip to expose the adhesive surface. This helps prevent the mattress from sliding.
6. Double-check all connections to ensure they are tight and secure before proceeding.

## 6. MAINTENANCE

---

Regular maintenance will help prolong the life and performance of your bed frame.

- **Cleaning:** Wipe the metal frame with a damp cloth and mild detergent as needed. Avoid abrasive cleaners.
- **Bolt Check:** Periodically inspect all bolts and connections. Re-tighten any loose bolts to maintain stability and prevent noise.
- **Under-Bed Area:** Regularly clean the area under the bed frame to prevent dust accumulation.

## 7. TROUBLESHOOTING

---

If you encounter any issues with your Mellow bed frame, refer to the following common solutions:

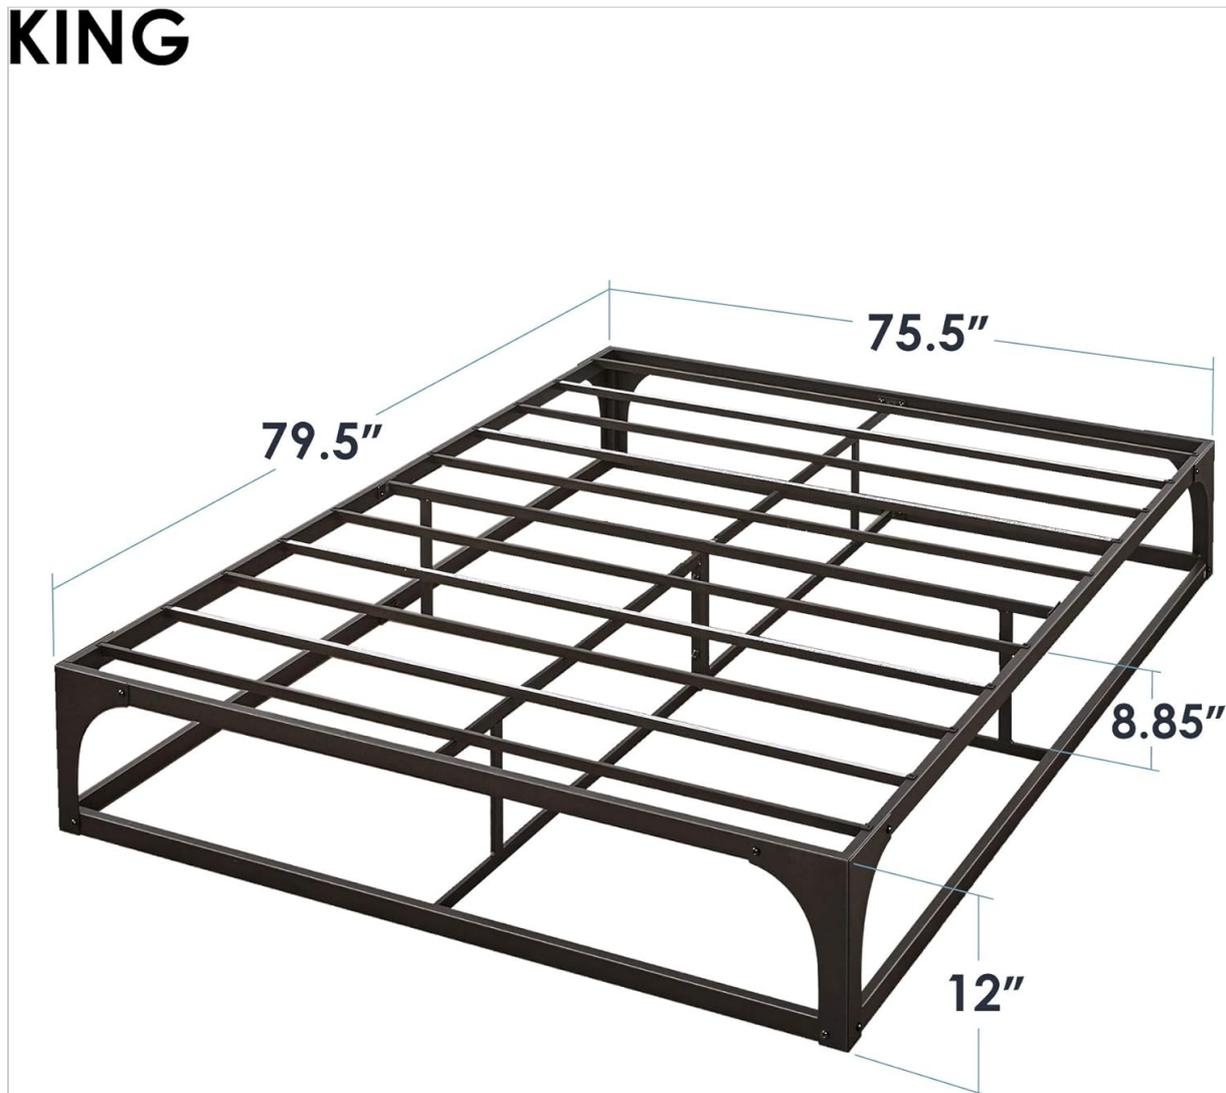

- **Squeaking Noises:** If the frame begins to squeak, check all bolts and connections. Loose connections are the most common cause of noise. Tighten any loose bolts.
- **Mattress Sliding:** Ensure the anti-slip tape on the slats is properly exposed (if applicable). If the mattress continues to slide, a non-slip mattress pad can be placed between the mattress and the slats.

- **Instability:** Verify that the bed frame is placed on a flat, even surface. Check all leg connections and frame joints for tightness.
