4.2. Basic Assembly Steps

The general assembly process involves three main actions:

1. **Connect Bricks:** Align the studs of one brick with the holes of another.
2. **Insert Pins:** Once bricks are aligned, insert the provided pins through the designated holes.
3. **Turn Pins:** Use the pin driver to turn the pins 90 degrees. This action expands the pin inside the bricks, creating a secure, interlocking connection.

- **Display:** Place the model on a flat, stable surface to prevent accidental falls.
- **Interaction:** While durable, avoid excessive force or dropping the model to maintain its integrity.

6. MAINTENANCE

To keep your JEKCA T-Rex 01S-M02 model in optimal condition:

- **Cleaning:** Gently wipe the model with a dry, soft cloth to remove dust. Avoid using harsh chemicals or abrasive materials.
- **Storage:** If disassembling for storage, keep all bricks and pins organized in a container to prevent loss. Store in a cool, dry place away from direct sunlight.

7. TROUBLESHOOTING

If you encounter difficulties during assembly, consider the following:

- **Instructions are difficult to follow:** Carefully re-read the specific steps in the included building manual. Pay close attention to the diagrams and ensure you are using the correct bricks and pins for each step. Sometimes, taking a short break and returning with fresh eyes can help.
- **Bricks not connecting securely:** Ensure the pins are fully inserted and rotated 90 degrees using the pin driver. An incomplete turn will result in a loose connection.
- **Missing parts:** Double-check all packaging materials. If parts are genuinely missing, refer to the support section for contact information.
