4.1 Understanding the Interlocking System

JEKCA blocks are connected using pins and a pin driver (screwdriver). This system ensures a strong and stable structure once assembled.

4.2 General Assembly Steps

1. **Preparation:** Unpack all components and organize the bricks by color or type as indicated in your detailed building manual.

3. **Connect Blocks:** As shown in Image 4.1 and 4.2, align the blocks, insert the connecting pins through the designated holes, and then use the provided pin driver to turn the pins 90 degrees. This locks the blocks securely in place.

5. DISPLAY AND STABILITY

6. MAINTENANCE

To maintain the appearance of your JEKCA model, gently dust it with a soft, dry cloth. For more stubborn dirt, a slightly damp cloth can be used, but avoid excessive moisture or harsh cleaning agents, which may damage the plastic.

7. TROUBLESHOOTING

7.1 Missing or Damaged Parts

If you find any missing or damaged bricks or pins upon opening the package, please contact JEKCA customer support with your product model number and details of the missing/damaged parts. Do not attempt to force ill-fitting parts.

7.2 Difficulty Connecting Blocks

Ensure that the pins are fully inserted before attempting to turn them with the pin driver. If a pin is difficult to turn, check for proper alignment of the blocks and ensure no debris is obstructing the pinhole. Do not apply excessive force, as this may damage the blocks or pins.
