3. ASSEMBLY INSTRUCTIONS

Follow the step-by-step instructions provided in the included detailed building manual. The general assembly process involves interlocking bricks using pins and the pin driver tool.

Key Assembly Steps:

1. **Identify Bricks:** Refer to your instruction manual to identify the correct bricks for each step.
2. **Position Bricks:** Place the bricks according to the manual's diagrams. Ensure they align correctly.
3. **Insert Pins:** Once bricks are aligned, insert the provided pins through the designated holes to secure them.
4. **Use Pin Driver:** Use the pin driver tool to gently turn the pins 90 degrees. This action expands the pins, creating a secure, interlocking connection between the bricks.
5. **Verify Connection:** Ensure each connection is firm. The patented interlocking system makes the model sturdy and resistant to falling apart.

4. MAINTENANCE

Cleaning

To clean your JEKCA model, gently wipe it with a soft, dry cloth. For more stubborn dust or dirt, a slightly damp cloth can be used, followed by immediate drying. Avoid using harsh chemicals or abrasive cleaners, as these may damage the plastic bricks.

Storage

Store the assembled model in a stable location away from direct sunlight and extreme temperatures to prevent discoloration or material degradation. If disassembling for storage, keep all bricks, pins, and the pin driver organized to facilitate future reassembly.

5. TROUBLESHOOTING

Loose Connections

If a section of your model feels loose, ensure that the pins are fully inserted and turned 90 degrees using the pin driver. A properly turned pin creates a secure connection. Re-check the corresponding steps in the instruction manual.

Missing Pieces

Carefully review the package contents list and your workspace. If you believe a piece is genuinely missing, please contact JEKCA customer support for assistance.

Difficulty with Pin Insertion

Ensure the bricks are perfectly aligned before attempting to insert pins. Do not force pins. If resistance is met, re-check alignment. The pin driver should be used to gently turn the pin, not to push it forcefully.
