## VIVOHOME VH215-R

### VIVOHOME Solar Fountain Bird Bath

Model: VH215-R

Instruction Manual

#### IMPORTANT SAFETY INFORMATION

Please read all instructions carefully before assembly and use. Retain this manual for future reference.

- **Stability:** To prevent tipping, especially in windy conditions, fill the hollow pedestal and base with sand or gravel. Utilize the included ground stakes to secure the bird bath firmly into the ground.
- **Water Safety:** Ensure the bird bath is filled with clean, fresh water for the health and safety of visiting birds. Regularly clean the bowl to prevent algae buildup.
- **Solar Pump:** The solar pump operates on sunlight. Do not attempt to power it with alternative electrical sources. Keep the solar panel clean for optimal performance.
- **Freezing Temperatures:** In areas with freezing temperatures, drain all water from the bird bath and store the unit indoors to prevent damage from ice expansion.

#### PACKAGE CONTENTS

Verify that all components are present before beginning assembly:

- Bird Bath Bowl (1)
- Pedestal (1)
- Base (1)
- Solar Fountain Pump (1)
- Nozzle Set (4 types)
- Fountain Stabilizer Rods (4)
- Ground Stakes (3)

#### ASSEMBLY INSTRUCTIONS

Assembly of the VIVOHOME Solar Fountain Bird Bath is designed to be quick and tool-free.

1. **Assemble the Pedestal:** Screw the pedestal onto the base by turning clockwise until secure.
2. **Attach the Bowl:** Screw the bird bath bowl onto the top of the pedestal by turning clockwise until secure.
3. **Ensure Stability:** For enhanced stability, especially in windy areas, the hollow pedestal and base can be filled with sand or gravel. Additionally, use the three provided ground stakes to anchor the base firmly into the soil.
4. **Solar Fountain Pump Setup:**
  - Insert the four stabilizer rods into the designated slots on the underside of the solar pump.
  - Place the assembled solar pump into the center of the bird bath bowl. The rods should rest against the rim of the bowl to keep the pump centered and stable.
  - Select your desired nozzle from the set of four and firmly attach it to the pump's water outlet.

## OPERATING INSTRUCTIONS

The VIVOHOME Solar Fountain Bird Bath is designed for simple operation, relying on natural sunlight.

- Placement:** Position the bird bath in an area that receives direct and ample sunlight throughout the day. The solar pump requires direct sunlight to operate effectively.
- Fill with Water:** Fill the bird bath bowl with clean water, ensuring the solar pump is fully submerged. The pump will not operate if the water level is too low.
- Automatic Operation:** Once exposed to sufficient sunlight and submerged in water, the solar pump will automatically begin to spray water. The spray height and pattern will vary based on the intensity of the sunlight and the chosen nozzle.
- Nozzle Selection:** Experiment with the four included nozzles to achieve different water spray patterns. Gently pull off the current nozzle and push on a new one to change the effect.
- Flow Control:** The solar pump features a 3-level flow control mechanism, allowing adjustment of the water flow intensity.

6. **Auto Shut-Off:** The pump is equipped with an auto shut-off feature that activates when water levels are too low, protecting the pump from dry running and extending its lifespan.

## MAINTENANCE

Regular maintenance ensures the longevity and optimal performance of your bird bath and solar fountain.

- **Cleaning the Bowl:** The bird bath bowl features a twist-off design for easy removal. Regularly remove the bowl, empty old water, and clean it with a soft brush and mild soap to prevent algae and mineral buildup. Rinse thoroughly before refilling.
- **Cleaning the Solar Pump:** Periodically clean the solar pump to ensure continuous operation. Remove any debris, leaves, or dirt from the solar panel and the pump's filter. A clogged pump will reduce or stop water flow.
- **Winter Storage:** Before the first frost, completely drain the bird bath and solar pump. Clean all components and store them in a dry, protected area indoors to prevent damage from freezing water.
- **Weather Resistance:** The polyresin construction is designed to resist sun, rain, and freezing. However, proper winterization is recommended for prolonged product life.
