

## ecobee SmartSensor

# ecobee Smart Sensor 2-Pack User Manual

Model: SmartSensor (EB-RSHM2PK-01)

## 1. INTRODUCTION

The ecobee Smart Sensor is designed to enhance the functionality of your ecobee smart thermostat by providing accurate temperature and occupancy readings in specific rooms. This allows your thermostat to make informed adjustments, optimizing comfort and energy efficiency throughout your home. The Smart Sensor detects when a room is occupied using infrared technology and communicates this information wirelessly to your ecobee smart thermostat, prompting automatic temperature adjustments.

Image: Two ecobee Smart Sensors, designed for discreet placement.

## 2. WHAT'S IN THE BOX

Your ecobee Smart Sensor 2-Pack includes the following components:

- 2 x ecobee Smart Sensors
- 2 x Detachable Stands
- 2 x Self-adhesive Wall Mounting Brackets
- 2 x Lithium Metal Batteries (pre-installed)
- 1 x Installation Guide

**Quick and easy installation using the stand or mounting bracket with a five-year battery lifespan.**

Image: All components included in the Smart Sensor 2-pack packaging.

### **3. SETUP AND INSTALLATION**

#### **3.1 Pairing with your ecobee Thermostat**

1. Ensure your ecobee smart thermostat is powered on and connected to Wi-Fi.
2. Open the ecobee app on your smartphone or tablet.

3. Navigate to the 'Sensors' section within the app.
4. Follow the on-screen instructions to add a new sensor. This typically involves scanning the QR code located on the back of the Smart Sensor.
5. Once paired, the sensor will appear in your ecobee app, and you can assign it to a specific room.

## 3.2 Placement Guidelines

Proper placement of your Smart Sensor is crucial for accurate readings and optimal performance.

- **Height:** Place the Smart Sensor at least 5 feet (1.5 meters) above the floor.
- **Location:** Position sensors in rooms where you want to monitor temperature and occupancy, such as bedrooms, living areas, or offices.
- **Avoid Obstructions:** Ensure the sensor has a clear line of sight within the room and is not blocked by furniture or curtains.
- **Environmental Factors:** Avoid placing sensors near heat sources (e.g., direct sunlight, lamps, vents) or cold drafts, as this can affect temperature accuracy.
- **Mounting Options:** Use the included satin-steel stand for tabletop placement or the self-adhesive wall mounting brackets for wall installation. The sensor attaches magnetically to either option.
- **Range:** The Smart Sensor communicates wirelessly with your ecobee thermostat from up to 60 feet, even through walls and floors.

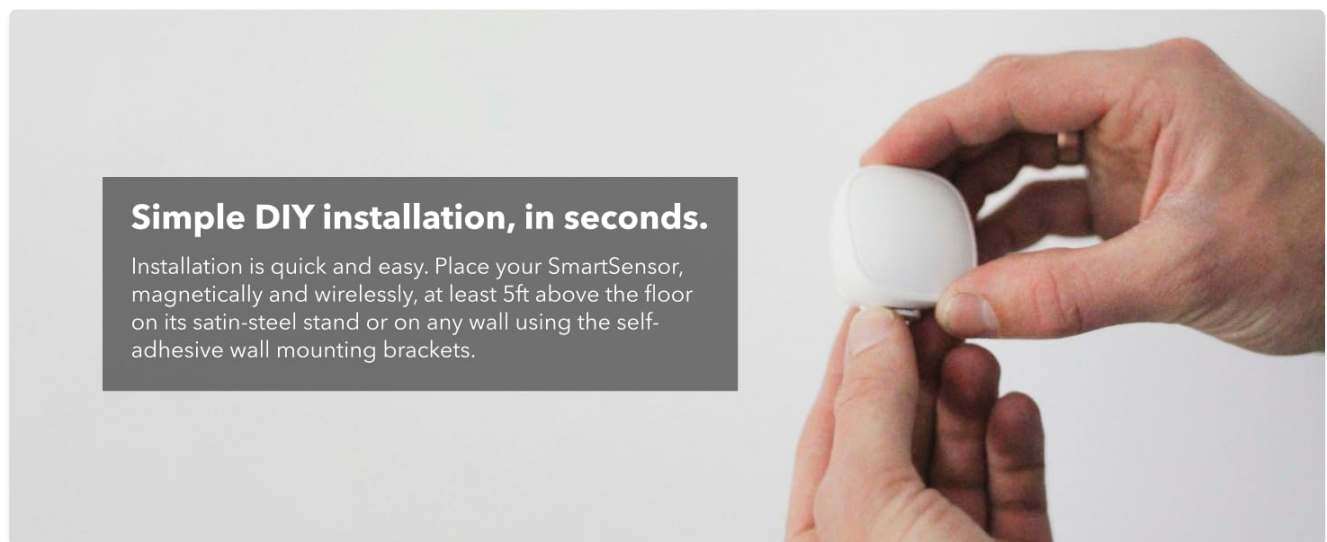

Image: Simple installation process for the Smart Sensor.

# Place sensors in different rooms for whole home comfort.

Image: Sensors can be placed in various rooms to optimize comfort.

## 4. OPERATING INSTRUCTIONS

### 4.1 Temperature and Occupancy Detection

The Smart Sensor continuously monitors both temperature and occupancy in its assigned room. When occupancy is detected, the sensor communicates this to your ecobee thermostat. Your thermostat can then prioritize the temperature in that specific room, ensuring comfort where it's needed most. If no occupancy is detected, the thermostat can adjust settings to save energy.

### Comfort when it matters most.

Place SmartSensor in your bedroom and say goodbye to those moments that are either too hot or too cold throughout the night.

Image: Placing a Smart Sensor in a bedroom helps maintain comfortable temperatures during the night.

## 4.2 Using the ecobee App

The ecobee app provides comprehensive control and monitoring capabilities for your Smart Sensors:

- **View Room Temperatures:** See the current temperature in each room where a Smart Sensor is placed.
- **Adjust Settings:** Modify which sensors your thermostat uses for temperature averaging, allowing you to prioritize comfort in occupied rooms.
- **Occupancy History:** Review occupancy patterns to understand energy usage.

**View the temperature in a particular room right from the ecobee app.**

Image: The ecobee app allows viewing and adjusting room temperatures from your smartphone.

### **4.3 Smart Security Features (Subscription Required)**

When integrated with an ecobee Smart Security subscription, your Smart Sensors can detect unexpected motion, providing an additional layer of home security.

- **Motion Detection:** Sensors detect movement when your Smart Security system is armed.
- **Real-time Alerts:** Receive instant notifications on the ecobee app if motion is detected while you are away.
- **Arm/Disarm Assistant:** Reminders to arm your home when leaving and disarm upon return.

**Sends notifications when motion is detected with ecobee Smart Security.**

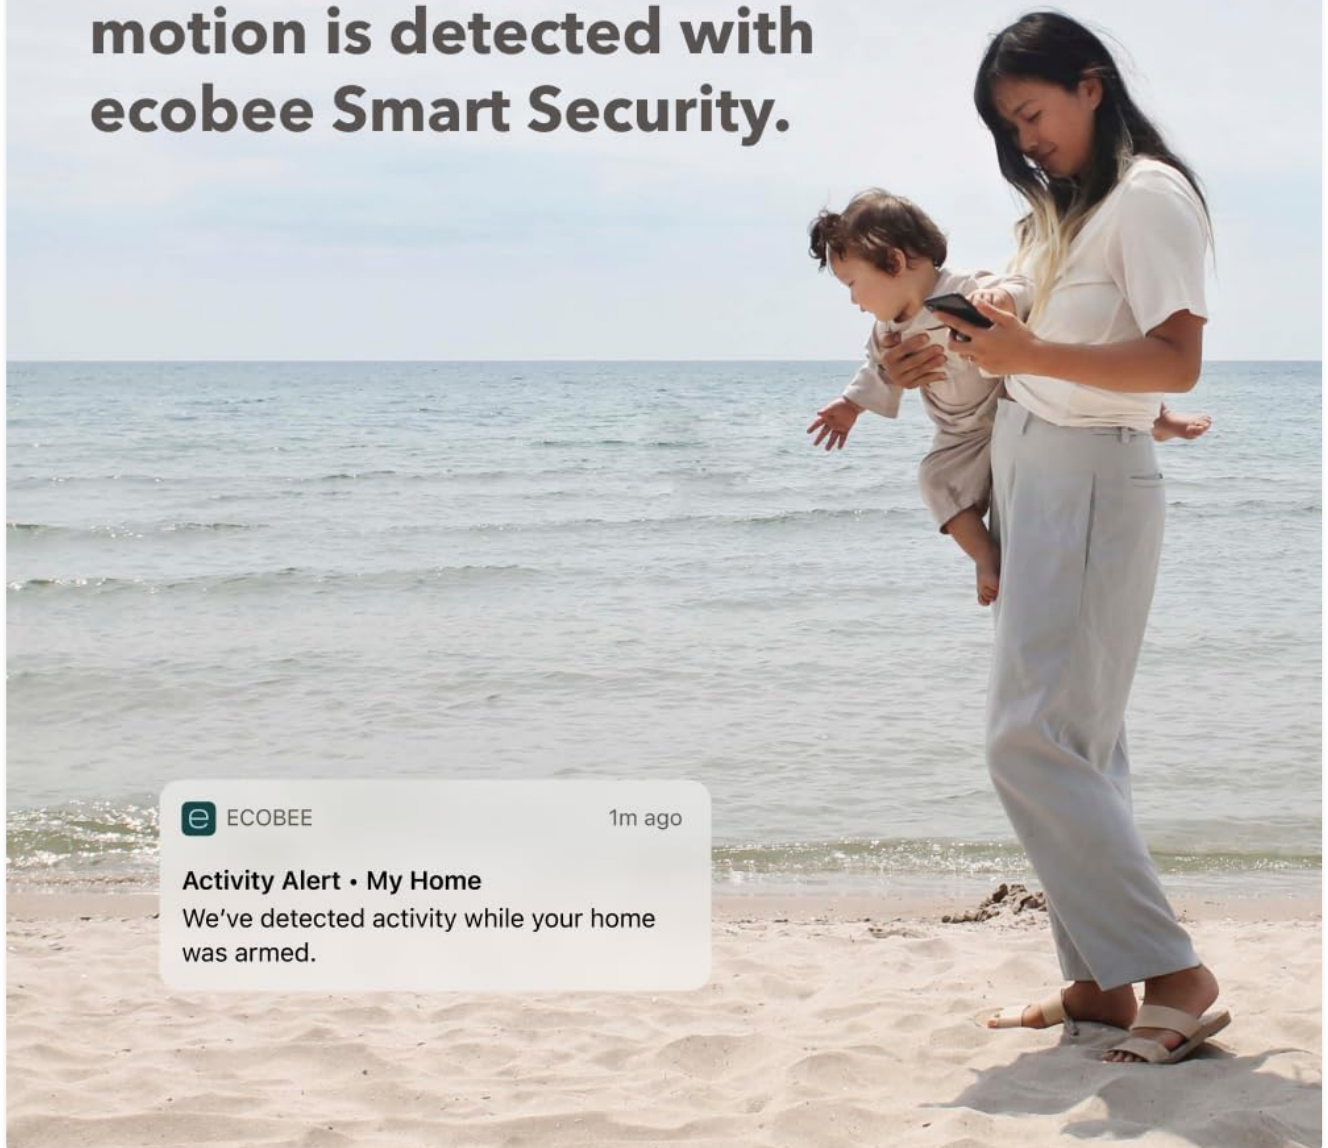

Image: Receive activity alerts on your ecobee app when motion is detected with Smart Security.

## **Unlock even more from SmartSensor with Smart Security.**

With an ecobee Smart Security subscription, it can detect unexpected motion. When Smart Security is armed, you get real-time alerts on the ecobee app, so you know what's happening at home when you're not there.

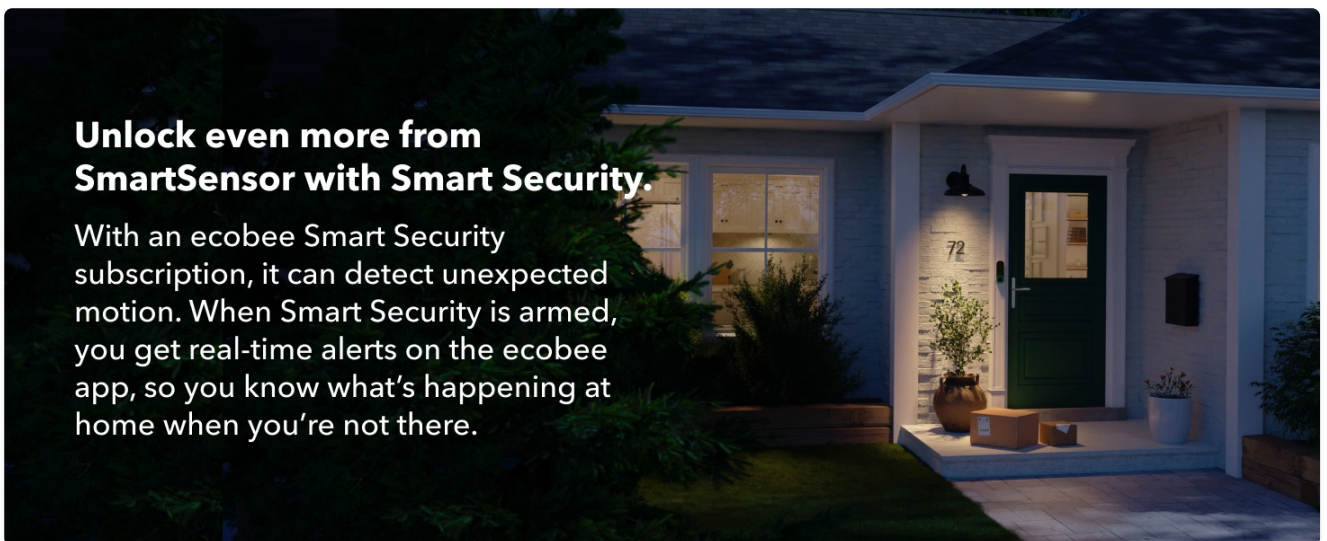

Image: Smart Security features enhance the functionality of your Smart Sensors.

## 5. MAINTENANCE

### 5.1 Battery Replacement

Each Smart Sensor is powered by a single coin-cell lithium battery, designed to last up to 5 years under normal usage. When the battery level is low, you will receive a notification through the ecobee app.

1. Gently twist the back cover of the Smart Sensor to open it.
2. Remove the old coin-cell battery.
3. Insert a new CR2032 coin-cell lithium battery, ensuring the positive (+) side faces up.
4. Replace the back cover, twisting it until it clicks securely into place.

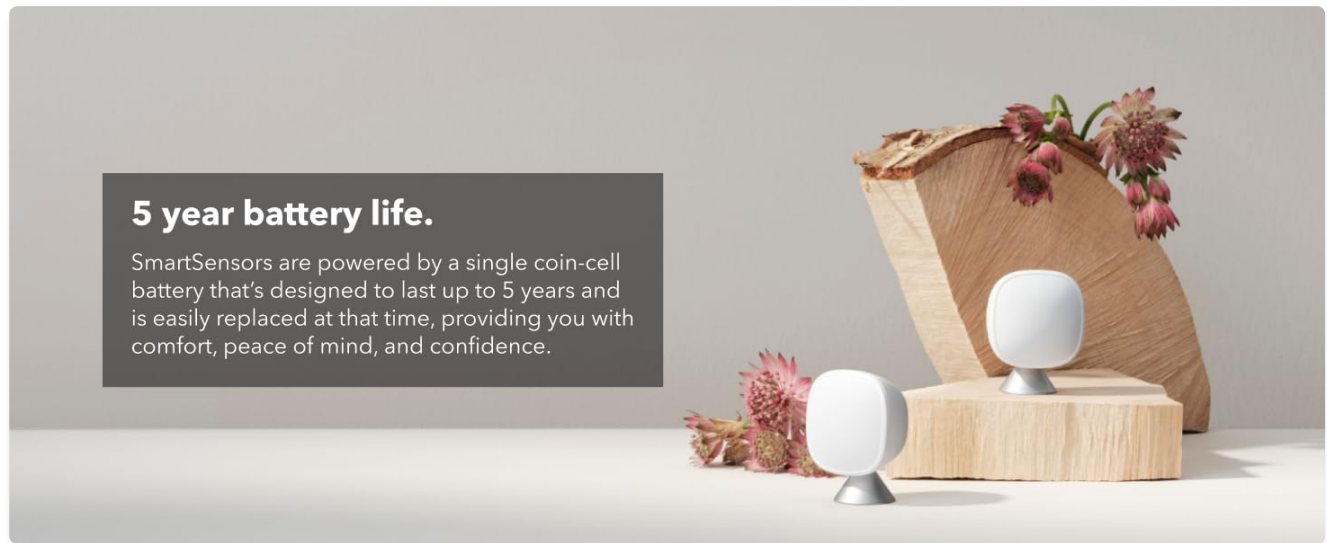

Image: Smart Sensors feature a long-lasting 5-year battery life.

### 5.2 Cleaning

To maintain optimal performance, periodically clean your Smart Sensor. Use a soft, dry cloth to wipe the exterior. Avoid using abrasive cleaners or solvents, as these can damage the sensor's finish or internal components.

## 6. TROUBLESHOOTING

If you encounter issues with your ecobee Smart Sensor, refer to the following common solutions:

- **Sensor Not Connecting/Reconnecting:**

- Ensure your ecobee thermostat is online and powered.
- Check the Smart Sensor's battery. Replace if low or depleted.
- Bring the sensor closer to the thermostat to rule out range issues.
- Try re-pairing the sensor through the ecobee app.
- If power was interrupted, allow a few minutes for the sensor to attempt reconnection automatically.

- **Inaccurate Temperature Readings:**

- Verify sensor placement. Ensure it is not in direct sunlight, near vents, or other heat/cold sources.
- Allow up to 24 hours for the sensor to acclimate to its environment and provide stable readings.

- Compare readings with a reliable thermometer placed in the same location.

• **Occupancy Not Detected:**

- Ensure the sensor's view is not obstructed by furniture, plants, or other objects.
- Confirm the sensor is placed at the recommended height (at least 5 feet from the floor).
- Check the sensor's settings in the ecobee app to ensure occupancy detection is enabled for the desired comfort profile.

7. SPECIFICATIONS

Feature	Detail
Brand	ecobee
Model Number	SmartSensor (EB-RSHM2PK-01)
Color	White
Power Source	Battery Powered
Battery Type	1 x Lithium Metal (CR2032) per sensor
Battery Life	Up to 5 years
Maximum Wireless Range	60 feet (through walls and floors)
Mounting Type	Wall Mount or Stand
Compatible Devices	ecobee smart thermostats
Product Dimensions	8"D x 5"W x 2"H (Package Dimensions)
Item Weight	5.9 ounces (total package)
Operating Temperature	Up to 113°F (45°C)
Material	Plastic
UPC	627988021119

8. WARRANTY INFORMATION

The ecobee Smart Sensor 2-Pack is covered by a **3-Year Limited Warranty**. This warranty covers defects in materials and workmanship under normal use. For full details regarding warranty terms, conditions, and how to make a claim, please refer to the official ecobee website or contact customer support.

## 9. CUSTOMER SUPPORT

For further assistance, technical support, or to provide feedback, please visit the official ecobee support website or contact their customer service team. You can typically find contact information and FAQs on the ecobee website:

## 2 PACK

Enhance the way your customers experience comfort.

With SmartSensor placed in multiple rooms, your customers can set an average temperature for their home and experience better comfort throughout.

**SMARTER CONTROL**  
Heat more or cool cold spots to bring your average temperature where you want it, keeping your customers a whole home comfortable.

**HIGH-TESTED SENSES**  
Select temperature sensing for room-specific comfort where your customers want it, when they want it.

**FARTHER SAVINGS**  
Monitor the temperature to start heating when your customer is still asleep, keeping their energy bill in check.

ecobee for Pro

Smart Thermostat **ENHANCED**

Delivering automatic savings and comfort.

5-year warranty with professional installation, seamless integration into smart home systems, and advanced occupancy sensor technology.

Why pros love us.

**Simple**

Covers with everything needed for a quick and easy installation, including screws and dry-wall plugs, even pre-wired with a color-coded, PSC, wiring diagram and a quick start guide.

**Reliable**

Doesn't need charging, or other power sources. Included Power Extender Kit for hardwired installation without a C-wire.

**Built to last**

Designed with quality materials to last for 10 years, including leading 5-year warranty when installed by a professional.

**Seamless integrations**

Works with the most popular smart home systems and is the only smart thermostat that doubles as a security hub to monitor unexpected activity.\*

works with

ecobee | SmartBuildings

**Support Hours**

Available Mon-Fri 9am-5pm (PST) and Sat-Sun 9am-5pm (PST) | support@ecobee.com | ecobee.com/contractors

Why homeowners love us.

**Automatic savings**

Homeowners save up to 26%\* per year on heating or cooling costs. ENERGY STAR® certified.

**Comfort**

Automatically adjusts to the desired temperature when homeowners are home or sleeping. No more or less costs the home before homeowners arrive home.

**Enhanced design**

Beautifully designed with thicker glass, a larger screen for easier navigation, no need advanced sensors, and an indicator to show the heating and cooling status.

**Doubles as home monitoring hub**

Personal detection to alert of issues when homeowners are away, and house detection to verify of sudden temperature drops.

\*Requires smart energy adoption required. \*Temperature is below 60°F (16°C).

ecobee | SmartSensor

5-year battery life  
Designed to last longer

PIR Sensor

Energy savings with  
temperature and  
occupancy detection

Flexible positioning

Use the standard or  
remote on a wall or shelf. It  
holds tight to a wall, shelf,  
and more.

Wall-mount

Use with standard or  
PIR to the wall or shelf. Get  
remote PIR on a shelf.

Magnetic Mount

The remote thermostat sensor with a sixth  
sense for your comfort and peace of mind.

Comfort where you need it

Place sensors in the rooms that matter most  
to experience comfort for days with you.

Designed for longevity

SmartSensor comes with a battery life of up  
to 5 years.

Easy installation

No wires, no tools in seconds. Use the app  
to wirelessly connect SmartSensor with  
ecobee thermostats.

Set up made simple

Scan the QR code and learn more about pairing your ecobee SmartSensor in  
a few simple steps. You'll also discover a convenient how-to video located  
in the "Setup and Troubleshooting" section of the app.

## To start using your Smart Thermostat:

- 1 Download the ecobee mobile app.

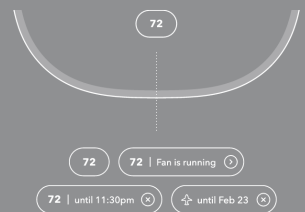

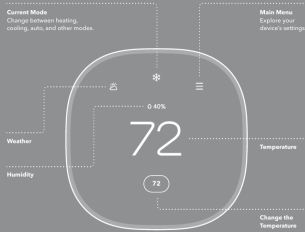

- 2 Create an ecobee account.

- 3 Follow the **add device** instructions in the app, then ensure your device is connected to Wi-Fi.

Our dedicated Customer Support staff is standing by. Visit [ecobee.com/get-help](https://ecobee.com/get-help) if you need assistance or access support directly in the app.

## Get to know your Smart Thermostat.

### More than just temperature changes.

Here you'll see the temperature that your Smart Thermostat is heating or cooling to. You'll also see other things that your Smart Thermostat is doing, like running the fan, setting temperature holds, and more. You can always tap here to change the temperature and cancel an action by tapping the 'x'.

## How Bryant and ecobee make your home comfortable and energy efficient.

- Connected.** Utilizing Bryant's digital tools, dealers can gather system settings and equipment data, with homeowner opt-in, to provide quicker and more efficient service.
- Expertly Installed.** When installed by a Bryant contractor, homeowners can trust their smart thermostat is configured to optimally run their heating and cooling equipment.
- Comfort Settings.** Comfort settings are your ideal temperatures for when you're at home, away, or sleeping. Your Smart Thermostat will use these to ensure your home is always comfortable and energy efficient.
- Schedules.** Setting up a schedule that matches your real routine is an easy way to save on energy costs. ecobee will also send you recommendations to improve your schedule to save even more.
- Smart Home & Away.** Your ecobee for Bryant Smart Thermostat automatically adjusts heating and cooling for comfort when you're home and energy savings when you're away.
- Works with SmartSensors.** Can be paired with SmartSensors to help with hot or cold spots throughout the home. Sold separately.
- Integrate with other smart home ecosystems.** Your ecobee for Bryant Smart Thermostat works with Amazon Alexa, Apple HomeKit, Google Assistant, Samsung SmartThings, and IFTTT, so you can customize your home the way you want.

Congratulations on purchasing an ecobee for Bryant Smart Thermostat with patent-pending, IntelliSense™ Technology.

When you pair your thermostat with Preferred™ series equipment, and opt-in to data sharing, the IntelliSense experience begins. Your dealer will be able to:

- Remotely view the operational health of your system.
- Use digital tools to provide more efficient customer service and remotely troubleshoot your system.

Visit [Bryant.com](https://Bryant.com) to learn more about this and other products to make your home more comfortable and energy efficient.
