TecTecTec ULT-G

TecTecTec ULT-G Golf GPS Watch Instruction Manual

BY TECTECTEC

Product Overview

The TecTecTec ULT-G Golf GPS Watch is a stylish, lightweight, and multi-functional device designed to enhance your golf game. It features Bluetooth connectivity for free course updates, an easy-to-operate interface with four navigation buttons, and provides distances to the front, back, and middle of the green. It also measures shot distances and offers automatic hole progression. Preloaded with over 38,000 courses worldwide, the watch is durable, water and dust resistant, and boasts a long battery life of up to 2.5 rounds on a single charge.

The ULT-G watch provides real-time data directly on your wrist, minimizing delays and keeping your game fluid.

Bluetooth Connectivity

The ULT-G features Bluetooth connectivity to connect the watch to your smartphone for free course updates. This ensures you always have the most current course data without additional charges or subscriptions.

Care and Maintenance

Durability and Water Resistance

The ULT-G Golf GPS Watch is built with a durable design and features water and dust resistance, assisting you in various weather conditions on the course. It is designed to withstand the elements and remain

reliable.

Battery Life and Charging

The watch's battery is designed to last through approximately 2.5 rounds of golf before needing to be recharged. To charge, use the proprietary USB charging cable included in the box. Ensure a proper connection for efficient charging.

Troubleshooting

Common Issues and Solutions

- **Issue: Difficulty charging.**
Solution: Ensure the proprietary USB charging cable's clip and pins are correctly aligned with the watch's charging contacts. A firm and precise connection is required.
- **Issue: GPS course location not working or watch not updating courses.**
Solution: Ensure the watch has a clear view of the sky for satellite connection. Connect the watch to your smartphone via Bluetooth and use the companion app to manually update courses. If issues persist, check for firmware updates and perform a soft reset by pressing and holding the four corner buttons until 'BOOT' appears, then release.
