Amazon Basics ABP606UWH

Amazon Basics 6-Outlet Surge Protector with 2 USB Ports (1000 Joules) User Manual

Model: ABP606UWH

1. Introduction

The Amazon Basics 6-Outlet Surge Protector with 2 USB Ports is designed to provide power distribution and surge protection for your electronic devices. It features six standard AC outlets and two USB charging ports, making it ideal for home and office use. This manual provides essential information for the safe and effective operation and maintenance of your surge protector.

2. Safety Information

Please read and understand all safety instructions before using this product. Failure to follow these instructions may result in electric shock, fire, or property damage.

- **Indoor Use Only:** This surge protector is intended for indoor use in dry locations only. Do not expose to moisture or water.
- **Electrical Rating:** Do not exceed the electrical rating of 15A/125V/1875W.
- **Grounding:** Ensure the surge protector is plugged into a properly grounded 3-prong outlet.
- **Overload Protection:** The surge protector includes overload protection. If the circuit breaker trips, reduce the load and press the reset button.
- **Children and Pets:** Keep out of reach of children and pets.
- **Avoid Daisy Chaining:** Do not plug one surge protector into another.
- **Extension Cords:** Do not use with extension cords unless absolutely necessary and ensure the extension cord is rated for the load.

3. Product Features

The Amazon Basics Surge Protector offers the following key features:

- **6 AC Power Outlets:** Provides power for multiple electronic devices.
- **2 USB Charging Ports:** Conveniently charge smartphones, tablets, and other USB-powered devices.
- **1000 Joule Surge Protection:** Shields connected electronics from power surges and voltage spikes.
- **6-Foot Extension Cord:** Offers flexibility in placement.
- **Power Switch with Reset Button:** Controls power to all outlets and acts as a circuit breaker.
- **Protected Indicator Light:** Confirms active surge protection.

4. Setup

Follow these steps to set up your surge protector:

1. **Unpack:** Carefully remove the surge protector from its packaging.

2. **Placement:** Place the surge protector on a flat, stable surface or mount it to a wall or under a desk using the integrated mounting holes (mounting hardware not included). Ensure it is in a dry, indoor location away from heat sources and direct sunlight.
3. **Plug In:** Plug the surge protector's 6-foot power cord into a standard, grounded 3-prong AC wall outlet.
4. **Power On:** Press the power switch to the 'ON' position. The green 'Protected' indicator light should illuminate, confirming that surge protection is active.
5. **Connect Devices:** Plug your electronic devices into the AC outlets and/or USB ports.

5. Operating Instructions

Using your Amazon Basics Surge Protector is straightforward:

- **AC Outlets:** Plug your devices directly into any of the six AC outlets. These outlets are designed to accommodate various plug sizes.
- **USB Ports:** Use the two USB ports to charge compatible devices. The USB ports provide 2.4A total output.
- **Power Switch:** The illuminated power switch controls the power to all connected devices. Press it to turn the surge protector ON or OFF.
- **Surge Protection Indicator:** The green 'Protected' light indicates that the surge protection feature is active and your devices are shielded. If this light is off, the surge protection has been compromised, and the unit should be replaced.

Image 5.2: Detail of the AC outlets.

6. Maintenance

To ensure optimal performance and longevity of your surge protector:

- **Cleaning:** Disconnect the surge protector from the wall outlet before cleaning. Wipe the exterior with a soft, dry cloth. Do not use liquid or aerosol cleaners.
- **Inspection:** Periodically inspect the power cord and the surge protector for any signs of damage, such as frayed wires or cracked casing. If damage is found, discontinue use and replace the unit.
- **Environmental Conditions:** Keep the surge protector in a cool, dry place, away from direct sunlight, excessive heat, and moisture.

7. Troubleshooting

If you encounter issues with your surge protector, refer to the following common problems and solutions:

- **No Power to Devices:**

- Ensure the surge protector is firmly plugged into a working wall outlet.
- Check if the power switch is in the 'ON' position.
- Press the reset button on the power switch. If it trips repeatedly, you may be overloading the unit. Reduce the number of connected devices.

- **'Protected' Indicator Light is Off:**
  - If the green 'Protected' light is off, it indicates that the surge protection components have absorbed a significant surge and are no longer providing protection. The unit will still function as a power strip, but your devices are no longer protected from surges. It is recommended to replace the surge protector.
- **USB Ports Not Charging:**
  - Ensure the surge protector is powered on.
  - Verify that your USB cable is functioning correctly.
  - Check if your device is compatible with USB charging.

8. Specifications
