## 4. CARE AND MAINTENANCE

To ensure the longevity and appearance of your nanoblock model, follow these care guidelines:

- **Display:** Place your assembled model on a stable, flat surface away from direct sunlight and extreme temperatures to prevent discoloration or warping.
- **Cleaning:** Use a soft, dry brush or a can of compressed air to gently remove dust from the model. Avoid using water or chemical cleaners, as these may damage the plastic.
- **Handling:** Handle the model with care to prevent pieces from detaching. If pieces do come apart, reassemble them according to the instructions.

## 5. TROUBLESHOOTING

### Common Issues and Solutions:

- **Missing Pieces:** Carefully check the packaging and your work area. Due to the small size of nanoblocks, pieces can be easily overlooked. If a piece is genuinely missing, refer to the customer support section for assistance.
- **Difficulty Connecting Pieces:** Ensure the pieces are correctly oriented and aligned. Apply steady, even pressure.

Avoid forcing pieces, as this can cause damage.

- **Model Falls Apart:** Double-check previous steps to ensure all connections are secure. Sometimes a loose connection early in the build can affect stability later on.
- **Instructions Unclear:** Review the diagrams carefully. If a step remains confusing, try looking at the subsequent steps to understand the overall structure.
