nanoblock Dragon Ball Z Master Roshi Building Kit Instruction Manual

Model: NBDB006

1. PRODUCT OVERVIEW

This nanoblock kit allows you to construct a detailed micro-sized model of Master Roshi from the Dragon Ball Z series. Master Roshi is an expert fighter, teacher of Goku, and creator of the signature "Kamehameha" finishing move. This kit is part of the Character Collection series and is designed for ages 8 and up, with a difficulty level of 2 out of 5. The finished model stands approximately 2.2 inches tall and consists of 120 pieces. nanoblock pieces are as small as 4mm x 4mm x 5mm, enabling intricate detail and realism in your creations.

3. SAFETY INFORMATION

WARNING: This product contains small parts which are considered a choking hazard. Not suitable for children

under 3 years. Recommended age is 8 years and up.

Always keep small parts away from young children and pets. Ensure all pieces are accounted for during and after assembly to prevent accidental ingestion.

4. ASSEMBLY INSTRUCTIONS

Follow the detailed step-by-step instructions provided within your nanoblock kit. The assembly process typically involves:

1. **Preparation:** Unpack all pieces and organize them by color or shape if desired. Ensure you have a clean, flat surface to work on.
2. **Step-by-Step Building:** Refer to the included instruction booklet. Each step will illustrate which blocks to use and where to place them. Pay close attention to the orientation of the blocks.
3. **Precision:** Due to the micro-size of nanoblocks, precision is key. Use tweezers (not included) if necessary for placing very small pieces.
4. **Verification:** After completing each section or the entire model, double-check against the images in the manual to ensure all pieces are correctly placed and the structure is stable.

5. OPERATING (DISPLAY AND HANDLING)

Once assembled, your nanoblock Master Roshi figure is intended for display and collection. While durable, the micro-sized connections can be delicate. Handle the model with care to prevent pieces from detaching.

- **Display:** Place your model on a stable, flat surface away from direct sunlight, excessive heat, or humidity to preserve its colors and structural integrity.
- **Handling:** Avoid dropping the model or applying excessive force, as this may cause it to break apart.

6. MAINTENANCE

To keep your nanoblock model in optimal condition:

- **Cleaning:** Gently dust the model with a soft brush or a can of compressed air. Avoid using water or chemical cleaners, as these may damage the plastic or fade colors.
- **Storage:** If disassembling for storage, keep all pieces in a sealed container to prevent loss and protect them from dust.

7. TROUBLESHOOTING

- **Missing Pieces:** Carefully check the packaging and your work area. If a piece is genuinely missing, contact customer support (see Section 9).
- **Difficulty Assembling:** Review the instruction manual carefully. Ensure you are using the correct pieces and orientations for each step. Sometimes, taking a break and returning to the assembly can help.
- **Model Instability:** Re-examine the connections. Ensure all blocks are firmly pressed together. Loose connections can lead to an unstable model.
