- Do not attach or hang items on any part of the bunk bed that are not designed for use with the bed; for example, but not limited to, hooks, belts, or jump ropes.
- Always use the provided ladder for access to the top bunk.
- Keep children away from the assembly area until assembly is complete.
- This product contains chemicals known to the State of California to cause cancer and birth defects or other reproductive harm.

Setup and Assembly

Assembly of the Acme Allentown Bunk Bed requires two adults. Please ensure you have all parts and tools listed in the packaging before beginning. Follow the step-by-step instructions provided in the separate assembly guide included with your product packaging.

General Assembly Steps:

1. **Unpack Components:** Carefully remove all parts from the packaging and lay them out on a soft, clean surface to prevent scratches. Verify all parts are present against the parts list.
2. **Assemble Bed Frames:** Begin by assembling the headboards and footboards for both the upper and lower bunks. Attach side rails to form the bed frames.
3. **Install Slat Systems:** Secure the mattress support slats within both bed frames. Ensure they are evenly spaced and firmly attached.
4. **Stack Bunks:** Carefully lift and place the upper bunk frame onto the lower bunk frame, aligning the connecting pins and securing them with the provided hardware.
5. **Assemble Storage Ladder:** Construct the storage ladder unit according to the instructions, ensuring all drawers slide smoothly.
6. **Attach Storage Ladder:** Securely attach the storage ladder to the bunk bed frame using the designated hardware.
7. **Assemble Trundle Unit:** Assemble the trundle bed frame and install its wheels.
8. **Final Checks:** Once assembled, double-check all bolts, screws, and fasteners to ensure they are tight and secure.

Operating Instructions

Using the Bunk Beds:

- **Top Bunk Access:** Always use the integrated storage ladder to access the top bunk. Ensure a firm grip on the ladder rails.
- **Bottom Bunk:** The bottom bunk is easily accessible.

Operating the Trundle Bed:

- **To Extend:** Gently pull the trundle unit from underneath the bottom bunk. It is equipped with wheels for smooth movement.
- **To Retract:** Push the trundle unit back underneath the bottom bunk until it is fully recessed.
- **Conversion to Bed:** The trundle can be converted into a pull-out twin-size bed by removing the center panel board, if applicable to your model. Refer to your specific assembly guide for details.

Using the Storage Ladder:

- The storage ladder features multiple drawers for convenient storage. Pull drawers open gently and push them closed firmly.

- Avoid overloading drawers to ensure smooth operation and prevent damage.

Maintenance and Care

Proper care will extend the life and appearance of your bunk bed.

- **Cleaning:** Wipe surfaces with a soft, damp cloth. Avoid harsh chemicals or abrasive cleaners, as these can damage the finish.
- **Hardware Checks:** Periodically check all bolts, screws, and fasteners to ensure they remain tight. Re-tighten as necessary to maintain structural integrity.
- **Wood Care:** Protect the wood finish from direct sunlight and extreme temperature changes. Use coasters or pads under hot or wet items.
- **Drawer Maintenance:** Ensure drawer glides are free of debris for smooth operation. If drawers become stiff, a small amount of silicone lubricant can be applied to the glides.

Troubleshooting

If you encounter issues with your bunk bed, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Bed feels wobbly or unstable.	Loose hardware.	Check and tighten all bolts, screws, and fasteners. Ensure the bed is on a level surface.

Problem	Possible Cause	Solution
Trundle drawer is difficult to pull out or push in.	Obstruction in the glides; misaligned wheels; overloaded drawer.	Clear any obstructions. Check if wheels are properly aligned and free of debris. Reduce load in the drawer.
Squeaking noises from the bed.	Loose connections; friction between wood parts.	Re-tighten all hardware. Apply a small amount of furniture wax or silicone spray to contact points if necessary.
Storage ladder drawers stick.	Overloaded; debris in glides; misaligned.	Reduce contents. Clean glides. Check alignment and re-adjust if possible.
