INTRODUCTION

This manual provides essential instructions for the setup, operation, maintenance, and troubleshooting of your Crosley T150A Modern 2-Speed Bluetooth Turntable System. Please read this manual thoroughly before using your new turntable to ensure proper function and longevity of the product.

The Crosley T150A is designed to deliver a complete audio experience, allowing you to enjoy your vinyl collection and stream digital music via Bluetooth. It features a variable weighted tone arm, two-speed playback, and includes stereo speakers for immediate use.

PACKAGE CONTENTS

Before proceeding with setup, ensure all components are present:

- Crosley T150 Unit
- Turntable Platter
- Drive Belt
- Stereo Speakers (2)
- Speaker Wires (2)
- 45 RPM Adapter
- Power Adapter
- User Manual (this document)

SETUP INSTRUCTIONS

1. Unpacking and Placement

Carefully remove all components from the packaging. Place the turntable unit on a stable, level surface away from direct sunlight, heat sources, and excessive vibration.

2. Platter and Belt Installation

- Place the metal platter onto the turntable spindle.
- Locate the drive belt. Carefully stretch the belt around the inner rim of the platter and then around the motor pulley. Ensure the belt is not twisted.

3. Speaker Connection

Connect the included stereo speakers to the turntable unit using the provided speaker wires. Match the positive (+) and negative (-) terminals on both the turntable and the speakers. The included speakers provide 30 watts of sound.

4. Tonearm Setup

The moving magnet cartridge is pre-mounted and aligned at the factory. The aluminum tonearm features an adjustable counterweight. For initial setup, ensure the counterweight is set according to the manufacturer's recommendations (refer to the quick start guide if provided, or adjust for proper tracking force to prevent skipping and record wear).

5. Power Connection

Connect the power adapter to the DC 12V input on the rear of the turntable unit, then plug it into a wall outlet.

OPERATING INSTRUCTIONS

1. Power On/Off

Locate the power switch on the rear of the unit. Flip it to the 'On' position to power on the turntable. Flip to 'Off' when not in use.

2. Playing Records

- Place a record on the platter.
- Select the appropriate speed (33 1/3 or 45 RPM) using the speed selector knob. Use the 45 RPM adapter for singles.
- Gently lift the tonearm using the cueing lever and position the stylus over the desired track on the record.
- Lower the tonearm slowly using the cueing lever. The record will begin to play.
- At the end of the record, manually lift the tonearm and return it to its rest.

3. Pitch Control

Use the pitch control knob to fine-tune the playback speed of your records. Adjust it slightly to achieve the desired audio pitch.

4. Bluetooth Streaming

The turntable features a built-in Bluetooth receiver, allowing you to stream digital music from a compatible device (e.g., smartphone, tablet) to the included speakers. Activate Bluetooth on your device and select 'Crosley T150A' from the list of available devices to pair.

5. External Audio System Connection

The built-in, switchable preamp and RCA outputs allow you to connect the turntable to an existing audio system or powered speakers. Connect RCA cables from the 'AUDIO OUT' ports on the turntable to the corresponding input on your external amplifier or receiver.

MAINTENANCE

1. Stylus and Cartridge Care

Regularly inspect the stylus for dust or debris. Use a soft brush to gently clean the stylus from back to front. The cartridge uses a standard 1/2" mount, allowing for replacement or upgrade as needed. Refer to the cartridge manufacturer's instructions for specific replacement procedures.

2. Turntable Cleaning

Wipe the turntable unit and speakers with a soft, dry cloth. Avoid using harsh chemicals or abrasive cleaners. Keep the platter and belt free from dust and oils.

3. Belt Maintenance

Periodically check the drive belt for wear or stretching. If the belt appears loose or the platter speed becomes inconsistent, the belt may need to be replaced.

TROUBLESHOOTING

If you encounter issues with your Crosley T150A turntable, consult the following common troubleshooting steps:

- **No Power:** Ensure the power adapter is securely connected to both the turntable and a working wall outlet. Check the power switch on the rear of the unit.
- **No Sound:** Verify that the speakers are correctly connected to the turntable. If using external speakers, ensure they are powered on and the correct input is selected on your amplifier. Check volume levels on both the turntable and any connected devices.
- **Skipping Records:** Ensure the turntable is placed on a stable, level surface. Adjust the tonearm counterweight to achieve the recommended tracking force. Clean the stylus for any debris. Ensure records are clean and free of dust.
- **Inconsistent Playback Speed:** Check that the drive belt is properly seated around the platter and motor pulley. The belt may need to be replaced if it is worn or stretched.
- **Bluetooth Pairing Issues:** Ensure the turntable's Bluetooth receiver is active and your streaming device is within range. Forget the device from your streaming device's Bluetooth settings and attempt to re-pair.
