2. SETUP

2.1 Unboxing and Initial Charge

Upon unboxing, ensure all components are present. The vacuum requires an initial charge of approximately 270 minutes to fully power the lithium-ion battery. The convenient docking station stores and charges the machine, ensuring it is always ready for use.

2.2 Assembly

The Dyson V11 Torque Drive can be configured in two primary forms:

- **Stick Vacuum:** Attach the wand to the main unit and then connect the desired cleaner head (e.g., Torque Drive head) to the end of the wand.
- **Handheld Vacuum:** For quick clean-ups or cleaning difficult places, detach the wand and connect accessories directly to the main unit.

3. OPERATING INSTRUCTIONS

3.1 Power Modes and LCD Display

The vacuum features three power modes (Eco, Auto, Boost) controlled via a push button. The integrated LCD screen provides real-time performance information, including selected power mode, remaining run time, filter maintenance reminders, and blockage reports.

3.2 Dynamic Load Sensor (DLS) System

The DLS system automatically adjusts the motor speed between carpets and hard floors, optimizing suction for deep cleaning across different surfaces without manual intervention.

3.3 Included Tools and Their Uses

- **Torque Drive Head:** Automatically adapts suction and power for deep cleaning different floor types.
- **Mini-Motorized Tool:** Ideal for removing pet hair and dirt from upholstery and tight spaces.
- **Crevice Tool:** Designed for cleaning narrow gaps and edges.
- **Stubborn Dirt Brush:** Features stiff bristles for dislodging dried-on and stubborn dirt.
- **Soft Dusting Brush:** Soft bristles for gentle dusting of delicate surfaces.
- **Combination Tool:** A two-in-one tool with a wide nozzle and brush for quick switching between cleaning and dusting tasks.
- **Wand Storage Clip:** Conveniently stores tools on the wand.

4. MAINTENANCE

4.1 Emptying the Dustbin

The Dyson V11 Torque Drive features a bagless design. To empty, hold the vacuum over a trash receptacle and push the red lever to release the contents. Your hands will not need to touch the dirt.

4.2 Filter Maintenance

The whole-machine filtration system captures 99.97% of microscopic dust particles as small as 0.3 microns. The LCD screen will provide reminders when the HEPA filter needs cleaning. Refer to the on-screen instructions for proper filter maintenance.

4.3 Battery Life

The 7-cell lithium-ion batteries provide up to 60 minutes of fade-free power. Actual runtime may vary based on power mode, floor type, and attachments used. The LCD screen displays the remaining battery life.

5. TROUBLESHOOTING

The LCD screen provides real-time blockage reports. If a blockage is detected, follow the on-screen instructions to clear the obstruction. Regular maintenance, including emptying the bin and cleaning the filter, can prevent common issues.
