2. SAFETY INFORMATION

- **Anti-Tipping Device:** For safety reasons, it is imperative to fix the product to the wall using the provided anti-tipping device. Failure to do so may result in serious injury.
- **Weight Capacity:** Do not exceed the maximum weight capacities for the top surface (30 kg), shelves (20 kg per level), and cabinet interior (15 kg per level). Overloading can cause structural damage or collapse.
- **Placement:** Do not expose the product to strong direct sunlight or high humidity, as this may cause damage to the materials.
- **Assembly:** Assemble the unit on a soft, clean surface to prevent scratches. Ensure all parts are correctly installed and tightened before use.

4. SETUP AND ASSEMBLY

Follow these steps carefully for proper assembly. It is recommended to have two people for assembly.

1. **Prepare the Area:** Clear a spacious, clean, and soft area (e.g., a carpet) to prevent damage to the furniture during assembly.
2. **Identify Parts:** Unpack all components and lay them out. Match each part to the corresponding number in the assembly diagram.
3. **Assemble the Frame:** Begin by attaching the steel frame parts according to the illustrated instructions. Ensure all screws are finger-tightened initially.
4. **Attach Panels:** Secure the engineered wood panels to the steel frame. Pay attention to the orientation of each panel.
5. **Install Shelves:** Insert the open shelves into their designated slots. The cabinet features two adjustable shelves inside the door compartment, allowing for three different height positions.
6. **Attach Door:** Mount the door to the cabinet using the provided hinges. Ensure the door opens and closes smoothly.
7. **Install Adjustable Feet:** Screw the adjustable feet into the bottom of the cabinet legs. These feet help stabilize the unit on uneven floors.
8. **Final Tightening:** Once all parts are in place, fully tighten all screws. Do not overtighten.
9. **Install Anti-Tipping Device:** Securely attach the anti-tipping device to the back of the cabinet and to a solid wall stud. This step is crucial for safety.
