Regular cleaning of your coffee brewing equipment (e.g., coffee maker, Moka pot, French press) is crucial to prevent residue buildup and maintain optimal coffee flavor. Always follow the manufacturer's specific cleaning instructions for your device to ensure longevity and consistent performance.

7. TROUBLESHOOTING

Encountering issues with your coffee? Here are some common problems and solutions:

- **Weak Coffee:** If your coffee tastes too weak, try increasing the amount of coffee grounds used per serving or using a finer grind setting if your equipment allows. Ensure your water is hot enough for proper extraction.
- **Bitter Coffee:** If your coffee tastes bitter, you might be over-extracting. Try reducing the brewing time, using slightly coarser grounds, or lowering the water temperature slightly. Ensure your equipment is clean.
- **No Aroma/Flavor:** Ensure your coffee is fresh and stored correctly. Old coffee or improper storage can lead to a loss of aroma and flavor. Check your water quality.
