Konnected 6 Zones

Konnected Alarm Panel Instruction Manual

Model: 6 Zones | Brand: Konnected

1. INTRODUCTION TO THE KONNECTED ALARM PANEL

The Konnected Alarm Panel is a smart device designed to integrate your existing wired alarm system with modern smart home platforms. It allows you to transform traditional wired sensors (such as door/window contacts, motion detectors, and glass break sensors) into smart devices, providing enhanced monitoring and automation capabilities without recurring monthly fees. This panel is compatible with leading smart home ecosystems including SmartThings, Amazon Alexa, and Home Assistant, enabling seamless control and notifications directly from your smartphone or other smart devices.

2. SETUP GUIDE

2.1. Unboxing and Component Identification

Your Konnected Alarm Panel kit includes the main circuit board, necessary wiring accessories, and mounting hardware. The panel is compact and designed for easy integration into your existing alarm system's enclosure.

Overview of the Konnected Alarm Panel kit, highlighting its 6-zone capacity, included accessories, built-in Wi-Fi, and no required fees.

2.2. Wiring Your Existing Sensors

The Konnected panel connects directly to your existing wired sensors. Carefully disconnect the wires from your old alarm panel and connect them to the corresponding terminals on the Konnected board. Ensure proper polarity and secure connections for reliable operation.

Illustrative diagram showing how the Konnected panel integrates various wired sensors like door/window, motion, glass break, siren, and strobe into a smart home system.

2.3. Connecting to Wi-Fi

After wiring, power on your Konnected panel. It will broadcast its own Wi-Fi network. Use your smartphone or computer to connect to this network. Once connected, open a web browser and navigate to the provided IP address (usually 192.168.4.1) to access the Konnected setup page. Select your home Wi-Fi network and enter your password. The device will then connect to your home network.

2.4. SmartThings and Cloud Integration

Download the Konnected app from your phone's app store (Apple App Store or Google Play Store). Ensure your phone and the Konnected module are on the same network. The app will guide you through discovering and registering your device with the Konnected Cloud. This cloud-based integration facilitates faster and easier setup with SmartThings and other compatible platforms. You will then assign zones (e.g., "Front Door," "Kitchen Window") to each connected sensor within the app.

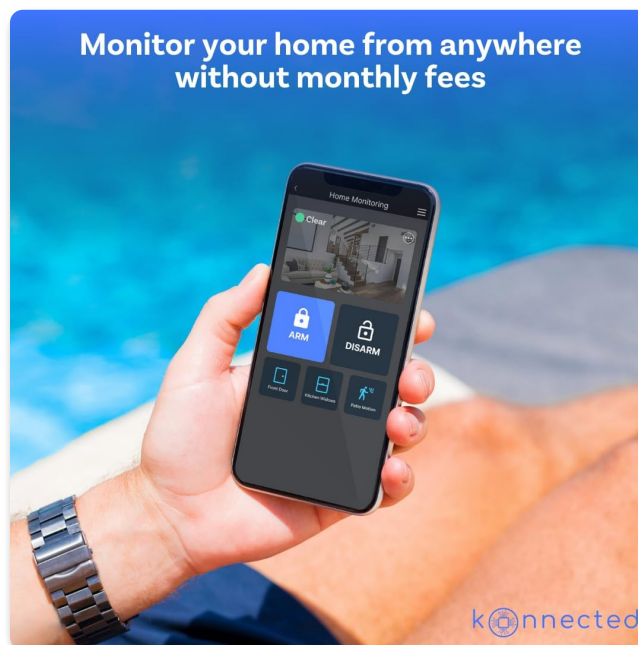

3. OPERATING YOUR KONNECTED SYSTEM

3.1. Testing Sensors

After setup, it is crucial to test each connected sensor. Open and close each door or window, or trigger motion sensors, and verify that the status updates correctly within your Konnected app or integrated smart home platform (e.g., SmartThings). This confirms that the physical connections and software configurations are functioning as intended.

3.2. Remote Monitoring

With the Konnected Alarm Panel, you can monitor your home's security status from anywhere using your smartphone. Receive instant notifications for triggered sensors, arm or disarm your system remotely, and check the real-time status of all connected zones. This feature provides peace of mind and control over your home's security, all without any recurring monthly fees.

A user monitoring their home remotely via the Konnected app, emphasizing the "monitor your home from anywhere without monthly fees" benefit.

3.3. Custom Automations

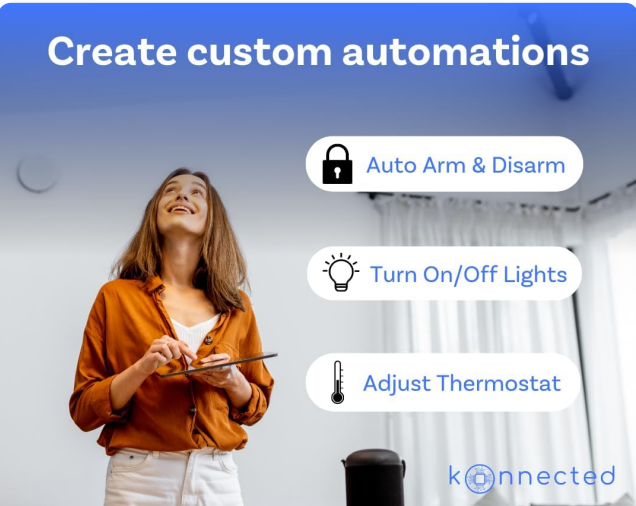

Leverage the power of your smart home platform to create custom automations based on your Konnected sensors. For example, you can set up rules to automatically arm or disarm your system when you leave or arrive home, turn lights on/off when a door opens, or adjust your thermostat based on motion detection. The possibilities for enhancing your home's intelligence and convenience are extensive.

Create custom automations

 Auto Arm & Disarm

 Turn On/Off Lights

 Adjust Thermostat

With Konnected, your wired sensors become smart and can trigger other smart devices in your home.

Examples of custom automations possible with Konnected: Auto Arm & Disarm, Turn On/Off Lights, and Adjust Thermostat.

4. MAINTENANCE

The Konnected Alarm Panel requires minimal maintenance. Periodically check all wired connections to ensure they remain secure. Ensure your home Wi-Fi network is stable and provides adequate signal strength to the panel. Software updates for the Konnected firmware are released periodically and can be applied through the Konnected app or web interface to ensure optimal performance and access to new features.

5. TROUBLESHOOTING

- **Device Offline:** If your Konnected panel appears offline, first check your home Wi-Fi network. Ensure the panel is powered on and the blue LED is solid (indicating a stable connection). Try power cycling the Konnected panel by unplugging and re-plugging its power adapter.
- **Sensor Not Responding:** Verify the physical wiring connection for the specific sensor. Ensure the wires are securely fastened to the correct terminals on the Konnected board. Test the sensor directly to confirm it is functioning mechanically.
- **Setup Issues:** If you encounter difficulties during initial setup, ensure your smartphone/computer is connected to the Konnected device's temporary Wi-Fi network before accessing the web interface. Double-check your home Wi-Fi password. For persistent issues, consult the Konnected online support documentation or community forums.

6. SPECIFICATIONS

Feature	Detail
Brand	Konnected
Model Number	6 Zones
Color	Black

Power Source	AC Power
Compatible Devices	Smartphone
Connectivity Technology	Wireless, Wired
Installation Type	Plug In
Alert Type	Motion
Item Dimensions (L x W x H)	2.48 x 1.38 x 0.75 inches
Item Weight	11.3 ounces (0.32 Kilograms)
Control Method	App
Sensor Technology	Wired
Connector Type	Wi-Fi

6.1. What's in the Box

- Sensors (as per product listing)
- Konnected Alarm Panel (main board)
- Wiring accessories
- Mounting hardware
- Power adapter

7. WARRANTY INFORMATION

Please refer to the official Konnected website or your purchase documentation for detailed warranty information regarding your Konnected Alarm Panel.
