## 2. PACKAGE CONTENTS

Please verify that all components are present and undamaged before proceeding with installation.

- 1 x Schulte Shower Tray (Model EP212057)
- 1 x Brand Drain
- 1 x Mounting Material Set
- 1 x Installation Manual (this document)

## 3. SAFETY INFORMATION

Read all instructions carefully before installation and use. Failure to follow these instructions may result in personal injury or product damage. Always prioritize safety during installation.

- Ensure the installation area is clean, dry, and structurally sound.
- Use appropriate tools and personal protective equipment (e.g., gloves, safety glasses) during installation.

- If you are unsure about any step, consult a qualified professional plumber or installer.
- Do not stand on the shower tray before it is fully installed, secured, and all sealants have cured.
- Keep small parts and packaging materials away from children.

## 4. INSTALLATION

The Schulte EP212057 shower tray is designed for straightforward installation. A detailed, illustrated guide is included with the mounting materials to assist you through each step. This tray can accommodate minor floor unevenness.

### 4.1 Site Preparation

- Ensure the floor where the shower tray will be placed is clean, level, and capable of supporting the combined weight of the tray, water, and user.
- Verify that the drainage connection point in your bathroom floor is correctly positioned and accessible for the shower tray's drain.

### 4.2 Tray Placement and Leveling

- Carefully position the shower tray in the desired location.
- Adjust the integrated feet (if applicable) or use appropriate leveling shims to ensure the tray is perfectly level in all directions. Use a spirit level for accuracy.

### 4.3 Drain Connection

- Connect the included brand drain to the shower tray's drain opening according to the manufacturer's instructions.
- Ensure all connections are properly sealed and watertight to prevent leaks.
- Connect the drain assembly to your household plumbing system, adhering to all local building and plumbing codes.

### 4.4 Securing the Tray

- Use the provided mounting materials to firmly secure the shower tray to the floor and/or adjacent walls as detailed in the separate installation guide.
- Apply appropriate silicone sealant around the perimeter of the tray where it meets the walls or floor to create a waterproof seal.
- Allow any sealants or adhesives to cure completely before using the shower.

### 4.5 Final Checks

- Perform a water test by running water into the tray and checking for any leaks around the drain connections and sealed edges.
- Ensure water drains efficiently and completely from the tray.

## 5. USAGE

The Schulte EP212057 shower tray is designed for daily use in a bathroom environment. Its extra-flat design provides a comfortable and low-threshold entry, reducing the step-in height to approximately 25 mm, making it accessible.

- This shower tray is suitable for installation in corner shower configurations and with niche doors.
- The high-quality mineral cast material ensures efficient water drainage during showering.

## 6. MAINTENANCE

Regular cleaning and proper maintenance will help preserve the appearance and extend the lifespan of your shower tray.

### 6.1 Daily Cleaning

- After each use, rinse the tray with clean water to remove soap residue, shampoo, and other shower products.
- Wipe down the surface with a soft cloth or squeegee to prevent water spots and limescale buildup.

### 6.2 Deep Cleaning

- Use a mild, non-abrasive bathroom cleaner and a soft sponge or cloth for periodic deep cleaning.
- **Avoid** harsh chemicals, abrasive cleaners, scouring pads, or wire brushes, as these can damage the mineral cast surface.
- For limescale deposits, a diluted vinegar solution or a specialized limescale remover designed for bathroom fixtures can be used. Always follow the product instructions and test on an inconspicuous area first.

### 6.3 Drain Maintenance

- Periodically remove the drain cover and clean any accumulated hair or debris to ensure proper and efficient water drainage.

## 7. TROUBLESHOOTING

This section addresses common issues you might encounter with your shower tray.

### 7.1 Slow Drainage

- **Cause:** Blockage in the drain.
- **Solution:** Remove the drain cover and clean out any hair, soap scum, or other debris. Ensure the plumbing connection is not obstructed.

### 7.2 Leaks Around the Tray

- **Cause:** Improperly sealed drain connections or damaged perimeter sealant.
- **Solution:** Re-check all drain connections for proper sealing and tighten if necessary. Inspect the silicone sealant around the tray edges for cracks or gaps. Clean and reapply sealant if required.

### 7.3 Surface Stains or Discoloration

- **Cause:** Accumulation of limescale, soap scum, or contact with strong dyes.
- **Solution:** For stubborn stains, try a specialized cleaner for mineral cast surfaces, always testing on an inconspicuous area first. Avoid leaving colored products (e.g., hair dye, strong cleaning agents) on the surface for extended periods.
