Geedel Rotary Cheese Grater Instruction Manual

Model: EU-336AR1 | Brand: Geedel

INTRODUCTION

The Geedel Rotary Cheese Grater is a versatile kitchen tool designed to simplify food preparation. It features three interchangeable stainless steel blades for slicing, shredding, and fine grinding, making it ideal for various ingredients such as cheese, fruits, vegetables, and nuts. Its user-friendly design prioritizes safety and ease of cleaning, ensuring a convenient and efficient cooking experience.

SETUP AND ASSEMBLY

Follow these steps to assemble your Geedel Rotary Cheese Grater:

1. Place the main body of the grater on a clean, smooth countertop.
2. Twist the suction base knob to the "LOCK" position to secure the grater firmly to the surface.
3. Insert your desired stainless steel blade (slicing, shredding, or fine grinding) into the transparent barrel. Ensure it clicks securely into place.
4. Attach the handle to the side of the transparent barrel, aligning it with the blade's mechanism.
5. Place the food pusher into the top opening of the transparent barrel.

To operate, insert your food item into the top opening. Use the food pusher to gently guide the food towards the blade while turning the handle. The powerful suction base ensures stability during use, protecting your hands from the blades.

MAINTENANCE AND CLEANING

The Geedel Rotary Cheese Grater is designed for easy cleaning. All parts are detachable for thorough washing:

1. Twist the suction base knob to the "RELEASE" position to detach the main body from the countertop.
2. Press the release button on the transparent barrel to detach it from the main body.
3. Remove the handle and the installed blade.
4. All detachable parts are top-rack dishwasher safe. For manual cleaning, rinse under a stream of water for a few seconds. Use a brush if necessary to remove any stuck food particles from the blades.
5. Ensure all components are completely dry before reassembling or storing.

Bionic Suction Base

Better secures the grater onto the counter.

Premium Drum Blade

Made of 430 stainless steel, BPA Free, safe & durable.

Detachable Design

For easier cleaning and storage.

TROUBLESHOOTING

- **Grater not sticking to countertop:** Ensure the countertop surface is clean, dry, and smooth. The suction base works best on non-porous surfaces like marble or glass. Twist the knob firmly to the "LOCK" position.
- **Food getting stuck in the spout:** The transparent barrel has an inclined curvature designed to reduce jamming. If food accumulates, stop turning the handle, remove the food pusher, and gently clear the spout before resuming. For larger quantities, process in smaller batches.
- **Blades not rotating smoothly:** Ensure the blade is correctly inserted and clicked into place. Check for any large food pieces obstructing the rotation.
