Morfone MF-ICT-01

Morfone Silicone Ice Cube Trays (3-Pack, Model MF-ICT-01)

Instruction Manual

1. INTRODUCTION

Thank you for choosing Morfone Silicone Ice Cube Trays. This manual provides essential information for the proper setup, operation, and maintenance of your new ice cube trays. Please read these instructions carefully before first use to ensure optimal performance and longevity of the product.

2. PRODUCT FEATURES

- **100% Food Grade Silicone:** Manufactured from BPA-free and non-toxic silicone, ensuring safe contact with food and beverages. Each tray measures approximately L 7.08 x W 4.92 x H 1.10 inches, with individual ice cubes being 1 x 1 inch.
- **Multi-purpose Use:** Suitable for various applications including making ice for drinks (cocktails, whiskey), preparing baby food portions, creating chocolate snacks, or freezing homemade butter confectionery. Can also be used to keep seafood fresh.
- **Removable Lid & Stackable Design:** Each tray includes a removable lid for convenient stacking in the freezer, which also helps to keep ice cubes clean and free from freezer odors. Note: Do not overfill trays, as the lid may not stay secure during transfer if liquids exceed the tray capacity.
- **Easy Release:** The non-stick and flexible silicone material allows for easy removal of ice cubes. A gentle twist of the tray or a press on the underside of each cube facilitates release.
- **Dishwasher Safe:** The silicone trays are safe for cleaning in a dishwasher, simplifying maintenance. Lids are not dishwasher safe and should be hand-washed.

3. SETUP

1. **Unpack:** Carefully remove the ice cube trays and lids from their packaging.
2. **Initial Cleaning:** Before first use, wash the silicone trays and lids with warm soapy water. Rinse thoroughly and allow them to air dry completely. The trays are dishwasher safe, but the lids should be hand-washed.

4. OPERATING INSTRUCTIONS

1. **Fill the Trays:** Fill each compartment with water or your desired liquid (juice, coffee, broth, etc.). Avoid overfilling to prevent spillage and ensure the lid fits properly.
2. **Place the Lid:** Gently place the removable lid on top of the filled tray. The lid helps prevent spills and protects the contents from freezer odors.
3. **Freeze:** Place the lidded tray in your freezer. For best results, ensure the tray is placed on a flat surface.
4. **Release Ice Cubes:** Once frozen, remove the tray from the freezer. To release the ice cubes, gently

twist the silicone tray. For individual cubes, press on the bottom of each compartment.

5. **Serve:** Add the released ice cubes to your beverages or use them as desired.

Easy to Use

1

Fill the trays with water/soda/fruits/ice cream

2

Cover the lid then put them into the freezer

3

Pop them out with your thumb from behind

4

Add the ice cubes to your drinks

Versatile Applications

- **Beverages:** Ideal for chilling cocktails, whiskey, iced coffee, and other drinks.
- **Baby Food:** Freeze pureed baby food in convenient single-serving portions.
- **Desserts:** Create small chocolate squares or other frozen treats.
- **Cooking:** Freeze herbs in oil, broth, or other liquid ingredients for future use.

5. MAINTENANCE AND CLEANING

- **Dishwasher Cleaning:** The silicone ice cube trays are dishwasher safe. Place them on the top rack for best results.
- **Hand Washing:** For lids, or if hand washing is preferred, use warm water with a mild dish soap. Rinse thoroughly to remove all soap residue.
- **Drying:** Allow all components to air dry completely before storing to prevent water spots or mildew.
- **Storage:** Store the trays with their lids in a clean, dry place. The stackable design helps save freezer space.

6. TROUBLESHOOTING

- **Ice Cubes Difficult to Release:** If ice cubes are not releasing easily, try twisting the tray more vigorously or pressing firmly on the bottom of each individual cube. Ensure the trays were not overfilled, which can cause cubes to fuse together.
- **Lid Not Staying Secure:** This usually occurs if the tray is overfilled. Reduce the amount of liquid in the compartments to allow the lid to sit flush and secure.
- **White Film on Ice Cubes:** A white film can sometimes appear on ice cubes due to hard water deposits. Using filtered water can help mitigate this issue. The silicone material itself does not cause this film.

7. SPECIFICATIONS

Feature	Detail
Brand	Morfone
Model Number	MF-ICT-01
Material	Silicone
Color	Blue/Purple/Green (3-pack)
Product Dimensions (each tray)	7.08"L x 4.92"W x 1.1"H
Individual Ice Cube Size	1" x 1"
Number of Cubes per Tray	24
