Camera Features

The Pixel 3 XL camera is designed to capture high-quality photos and videos with ease. Key features include:

- **Group Selfies:** Utilize the wide-angle front camera to fit more people into your selfies without a selfie stick.
- **Portrait Mode:** Create professional-looking photos with a blurred background effect, focusing on your subject.
- **Top Shot:** Automatically captures multiple frames before and after your shutter press, suggesting the best moment.
- **Night Sight:** Enhances low-light photography, allowing for bright and detailed images in dark environments.

This video demonstrates some of the key features and design aspects of the Google Pixel 3 XL, including its camera capabilities and overall aesthetic.

Google Assistant

Access the Google Assistant by squeezing the sides of your phone or by saying "Hey Google." The Assistant can help you with tasks such as setting reminders, getting directions, making calls, sending messages, and providing information.

Battery Management

The Pixel 3 XL features an all-day battery. To optimize battery life, the phone intelligently limits usage for apps you don't frequently use. You can monitor battery usage and enable Battery Saver mode in the Settings menu.

Call Screen

Utilize the Call Screen feature to screen unknown callers and block spam or nuisance calls. When an unknown number calls, you can tap "Screen call" to have the Google Assistant answer and transcribe the conversation in real-time, allowing you to decide whether to pick up.

Digital Wellbeing

Manage your screen time and focus with Digital Wellbeing tools. Set app timers, turn off visual notifications, and use Wind Down mode to gradually prepare for sleep by turning the screen to grayscale.

Maintenance

- **Cleaning:** Use a soft, lint-free cloth to clean the screen and body of your phone. Avoid abrasive materials or harsh chemicals.
- **Protection:** Consider using a protective case and screen protector to guard against drops and scratches.
- **Software Updates:** Keep your device's software updated to ensure optimal performance, security, and access to new features. Updates are typically downloaded automatically and can be installed from the Settings menu.
- **Storage Management:** Regularly review and delete unnecessary files, photos, and apps to free up storage space and maintain device speed.

Troubleshooting

Issue	Possible Solution
Phone not turning on	Ensure the battery is charged. Connect to a charger for at least 15 minutes, then try powering on again. If unresponsive, perform a force restart by holding the power button for 10-15 seconds.
Battery drains quickly	Check battery usage in Settings to identify power-hungry apps. Reduce screen brightness, disable unnecessary features like Bluetooth/GPS when not in use, and enable Battery Saver mode.
Apps are slow or crashing	Clear app cache (Settings > Apps > [App Name] > Storage > Clear cache). Ensure apps and system software are updated. If an app consistently crashes, try uninstalling and reinstalling it.
Screen display issues (e.g., discolored, hazy)	Check display settings (Settings > Display) for color correction or night light modes that might be enabled. If the issue persists after a restart and software update, it may indicate a hardware problem requiring professional service.
Phone is locked (not unlocked as expected)	Ensure the latest software updates are installed. Sometimes, an initial system update is required to fully activate the unlocked status. If issues persist, contact your carrier or the seller.
