## Puig 9770H

# Puig 9770H Touring Screen User Manual

Model: 9770H | For BMW F750GS (2018-2021)

## 1. INTRODUCTION

---

This manual provides essential information for the installation, operation, and maintenance of your Puig 9770H Touring Screen. Designed specifically for the BMW F750GS models from 2018 to 2021, this touring screen enhances rider comfort by providing improved wind protection.

Please read this manual thoroughly before attempting installation or use to ensure proper function and safety.

## 2. SAFETY INFORMATION

---

Always prioritize safety during installation and operation. Failure to follow these instructions may result in injury or damage to the product or motorcycle.

- Ensure the motorcycle is stable and on a level surface before beginning installation.
- Turn off the motorcycle engine and remove the key.
- Wear appropriate personal protective equipment, such as gloves and eye protection.
- Do not overtighten fasteners, as this can damage components. Refer to specific torque specifications if available in the motorcycle's service manual.
- Regularly inspect the touring screen and mounting hardware for any signs of wear, damage, or looseness.
- **Proposition 65 Warning:** This product may contain chemicals known to the State of California to cause cancer and birth defects or other reproductive harm. Wash hands after handling.

## 3. PACKAGE CONTENTS

---

Verify that all components are present and undamaged before proceeding with installation.

- 1 x Puig 9770H Touring Screen (Smoke color)
- Mounting Hardware Kit (specific components may vary, refer to included diagram)
- Installation Instructions (this manual)

## 4. SETUP AND INSTALLATION

---

Installation of the Puig 9770H Touring Screen is designed to be straightforward. It is recommended to have basic mechanical skills and tools for this procedure.

### 4.1 Tools Required (Not Included)

- Hex key set (Allen wrenches)
- Torx bit set (if applicable for existing fasteners)
- Socket wrench set
- Soft cloth

### 4.2 Installation Steps

1. **Prepare the Motorcycle:** Park the motorcycle on its center stand or a paddock stand on a firm, level surface. Ensure the engine is off and cool.
2. **Remove Existing Windscreen:** Carefully locate and remove the bolts securing the original windscreen. Keep the original rubber washers, as they may be required for the new installation.
3. **Position the New Screen:** Align the Puig 9770H Touring Screen with the mounting points on the motorcycle.
4. **Install Mounting Hardware:** Use the provided mounting hardware to secure the new screen. It is crucial to use the

original rubber washers from the stock windscreen if they provide a better fit and prevent vibration.

5. **Tighten Fasteners:** Hand-tighten all bolts initially to ensure proper alignment. Once aligned, progressively tighten all fasteners evenly. Avoid overtightening.
6. **Final Check:** Gently push and pull on the installed screen to ensure it is securely mounted and does not wobble. Verify that all fasteners are tight.

## 5. OPERATING CONSIDERATIONS

---

The Puig 9770H Touring Screen is designed to improve aerodynamic protection and rider comfort. While it does not have adjustable features, its design provides a significant upgrade over standard screens.

- **Wind Protection:** The increased height and curvature of the touring screen are intended to deflect wind and debris away from the rider's torso and helmet, reducing fatigue on long rides.
- **Visibility:** The smoke tint provides glare reduction while maintaining clear visibility through the screen. Ensure your riding position allows for clear vision over or through the screen.
- **Vibration:** Some minor vibration at higher speeds may occur, which is typical for aftermarket screens. Ensure all mounting points are secure to minimize this.

## 6. MAINTENANCE

---

Proper maintenance will extend the life and maintain the clarity of your Puig Touring Screen.

- **Cleaning:** Clean the screen regularly with mild soap and water using a soft, non-abrasive cloth. Avoid harsh chemicals, ammonia-based cleaners, or abrasive materials, as these can scratch or damage the screen's surface.
- **Inspection:** Periodically check all mounting bolts for tightness. Vibrations from riding can cause fasteners to loosen over time. Inspect the screen for cracks or deep scratches that could impair visibility or structural integrity.
- **Storage:** When not in use for extended periods, store the motorcycle in a shaded area or cover the screen to protect it from prolonged exposure to direct sunlight, which can cause material degradation.

## 7. TROUBLESHOOTING

---

This section addresses common issues you might encounter with your touring screen.

Problem	Possible Cause	Solution
Excessive Vibration	Loose mounting bolts; missing rubber washers.	Check and tighten all mounting bolts. Ensure all rubber washers are in place and properly seated.
Reduced Wind Protection	Incorrect installation angle (unlikely for fixed screen); rider height.	Verify correct installation as per Section 4. Consider an additional deflector if buffeting persists (not included).
Scratches/Cloudiness	Improper cleaning methods; abrasive materials used.	Clean only with mild soap, water, and a soft cloth. Avoid harsh chemicals. Minor scratches may be polished with specialized plastic polish (use with caution).

## 8. SPECIFICATIONS

---

Attribute	Detail
Model	PUIG 9770H
Part Number	9770H
Brand	Puig
Color	Smoke
Exterior Finish	Painted
Style	Protection, Safety
Auto Part Position	Front
Number of Pieces	1
Installation Type	Standard Installation
Item Weight	2.2 pounds (approx. 1 kg)

Attribute	Detail
Product Dimensions (L x W x H)	26.08 x 17.02 x 4.11 inches (approx. 66.24 x 43.23 x 10.44 cm)
Compatible Motorcycle Models	BMW F750GS (2018-2021)

## 9. WARRANTY AND SUPPORT

---

Puig products are manufactured to high quality standards. For specific warranty information, please refer to the warranty card included with your product or visit the official Puig website. Keep your proof of purchase for any warranty claims. For technical support or inquiries regarding your Puig 9770H Touring Screen, please contact Puig customer service through their official channels. Contact information can typically be found on their website or product packaging.
