Operating Instructions

Your Craftmade PHA52W4 ceiling fan is operated via pull chains for fan speed and light control. It also features a reverse function for seasonal use.

- **Fan Speed Control:** Pull the fan chain repeatedly to cycle through the three available speeds (High, Medium, Low) and Off.
- **Light Control:** Pull the light chain to turn the integrated LED light On or Off.
- **Reverse Function:** A switch located on the fan motor housing allows you to change the direction of blade rotation.
 - **Downward Airflow (Summer):** Set the switch for counter-clockwise rotation to create a cooling breeze.
 - **Upward Airflow (Winter):** Set the switch for clockwise rotation to circulate warm air trapped near the ceiling.
- **Optional Controls:** This fan is compatible with Craftmade remote and wall controls (Part Number: UCI-2000-2), sold separately. Refer to the instructions provided with the optional control for pairing and operation.

Maintenance

Regular maintenance ensures optimal performance and longevity of your ceiling fan.

- **Cleaning:** Periodically clean the fan blades and motor housing with a soft, damp cloth. Do not use abrasive cleaners or solvents, as these can damage the finish.
- **Blade Screws:** Check all blade screws annually to ensure they are tight. Loose screws can cause wobbling and noise.
- **Light Kit:** The LED light kit is integrated and not designed for user replacement. If the light fails, contact customer

support.

- **Lubrication:** The fan motor is permanently lubricated and does not require additional oiling.

Troubleshooting

Before attempting any repairs, ensure power is disconnected at the circuit breaker.
