› Fette Filter Replacement Vacuum Dust Bin Filters for Black and Decker SVF11 (6-Pack) Instruction Manual

Fette Filter 1209

Fette Filter Replacement Vacuum Dust Bin Filters for Black and Decker SVF11 (6-Pack)

Model: 1209

INTRODUCTION

This manual provides instructions for the Fette Filter 6-Pack Replacement Vacuum Dust Bin Filters, designed for use with specific Black and Decker 2-in-1 Cordless Lithium Stick Vacuums. These pleated filters are intended to replace Black and Decker part SVF11, ensuring continued filtration performance for your vacuum cleaner.

The filters are compatible with the following Black and Decker vacuum models:

- HSV320J
- HSV420J
- HSV520J
- HSV320J32
- HSV420J42
- HSV520J01
- SVA420B
- SVA520B

Using these replacement filters helps maintain optimal vacuum performance and contributes to a cleaner home environment by effectively capturing dust particles.

INSTALLATION INSTRUCTIONS

Follow these steps to install your new Fette Filter replacement vacuum dust bin filter:

1. Ensure the vacuum cleaner is turned off and unplugged (if applicable) before beginning installation.
2. Locate the dust bin on your Black and Decker 2-in-1 Cordless Lithium Stick Vacuum.
3. Remove the dust bin from the vacuum according to your vacuum's specific instructions.
4. Open the dust bin and carefully remove the old filter. Dispose of the old filter responsibly.
5. Insert the new Fette Filter replacement filter into the dust bin, ensuring it is seated correctly and securely. The filter is designed for a perfect fit.
6. Close the dust bin and reattach it to the vacuum cleaner.
7. The vacuum is now ready for use with the new filter.

OPERATING WITH THE FILTER

The Fette Filter replacement filter is an integral component of your vacuum's filtration system. It captures fine dust and debris, preventing them from recirculating into the air. For optimal performance, ensure the filter is always clean and properly installed before operating your vacuum.

A properly functioning filter contributes to:

- **Effective Dust Capture:** Traps particles to maintain air quality.
- **Consistent Suction:** Prevents blockages that can reduce vacuum power.
- **Vacuum Longevity:** Protects the motor from dust and debris.

MAINTENANCE AND CLEANING

To ensure the longevity and effectiveness of your Fette Filter replacement filters, regular maintenance is recommended:

1. **Regular Cleaning:** The filters are washable and reusable. After each use or as needed, remove the filter from the dust bin.
2. **Washing:** Rinse the filter under clean, running water until the water runs clear. Avoid using harsh detergents or brushes that could damage the pleated material.
3. **Drying:** Allow the filter to air dry completely before reinserting it into the vacuum. Ensure it is thoroughly dry to prevent mold or mildew growth and to maintain proper suction.
4. **Replacement Frequency:** For optimal performance and air quality, it is recommended to replace your filter every 1 to 3 months, depending on usage frequency and the amount of debris collected.

WASHABLE & REUSABLE

Simply rinse with clean water and completely air dry before reusing filters. Lasts you longer - saving money & inconvenience

TROUBLESHOOTING

If you encounter issues with your vacuum's performance after installing a new filter, consider the following:

- **Reduced Suction:**
 - Check if the filter is clogged with fine dust or debris. Clean the filter as per the maintenance instructions.
 - Ensure the filter is completely dry before reinstallation. A damp filter can impede airflow.

- Verify that the filter is correctly seated in the dust bin and the dust bin is properly attached to the vacuum.

- **Filter Does Not Fit:**

- Confirm that your vacuum model number is listed in the compatible models section of this manual (HSV320J, HSV420J, HSV520J, HSV320J32, HSV420J42, HSV520J01, SVA420B, SVA520B).
- While these filters are designed to replace Black and Decker part SVF11, slight variations in vacuum models can occur. Double-check your vacuum's specific filter requirements.

PRODUCT SPECIFICATIONS

Brand	Fette Filter
Item Model Number	1209
Compatible Part Number	SVF11 (Black and Decker)
Compatible Devices	Black and Decker 2-in-1 Cordless Lithium Stick Vacuums Models HSV320J, HSV420J, HSV520J, HSV320J32, HSV420J42, HSV520J01, SVA420B, SVA520B
