## OPERATING INSTRUCTIONS

The foot rest offers versatile usage options to suit your comfort needs:

### Stationary Use (Flat Side Up)

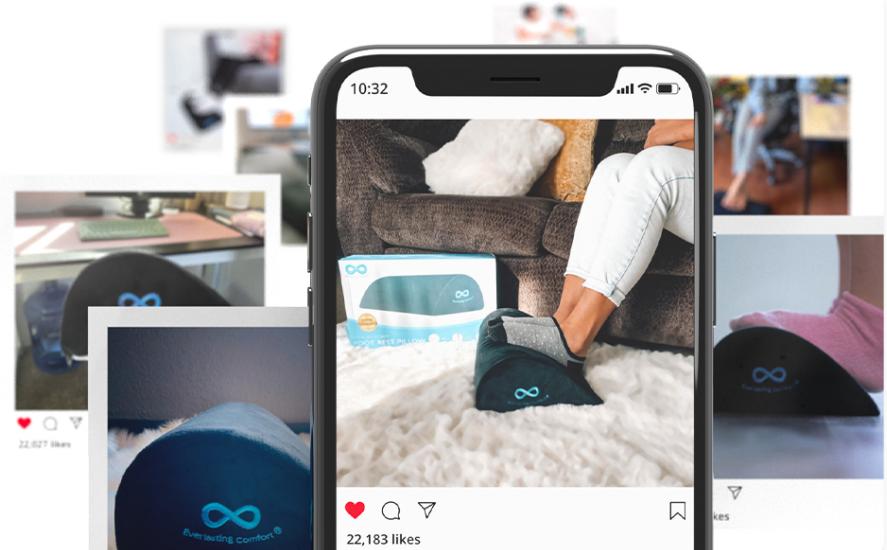

Place the foot rest on the floor with the flatter, textured side facing upwards. Position your feet comfortably on the surface. This mode provides stable elevation, ideal for maintaining proper posture and reducing pressure on your lower back and legs during prolonged sitting.

### Rocking Motion (Curved Side Up)

Flip the foot rest over so the curved side is facing upwards. The non-slip base will ensure stability while allowing for a gentle rocking motion. This can help stimulate circulation in your legs and provide a dynamic way to relieve tension in your feet and ankles.

### Multipurpose Use

Beyond its primary function, the foot rest can also be used to support your legs and knees while lying down, or to provide arch support for your feet when standing or sitting in other positions.
