SETUP

What's in the Box

Before you begin, ensure all components are present:

- nooie 360 Cam
- Wall mount + screws
- Power adapter + Type-C Cable
- User manual

Recording & Playback

Cloud or
Store Locally

Image: All components included in the nooie 360 Cam package, neatly laid out.

Initial Setup

1. **Power On:** Connect the nooie 360 Cam to a power outlet using the provided power adapter and Type-C cable. The camera will power on automatically.
2. **Download App:** Download the "nooie" app from the App Store (iOS) or Google Play Store (Android).
3. **Create Account:** Open the nooie app and register for a new account or log in if you already have one.

4. **Add Device:** Follow the in-app instructions to add your nooie 360 Cam. This typically involves scanning a QR code on the camera or manually selecting the device type and connecting to your Wi-Fi network. Ensure your Wi-Fi is 2.4GHz.
5. **Placement:** Place the camera on a flat surface or use the included wall mount and screws to secure it to a wall or ceiling. Ensure it has a clear line of sight to the area you wish to monitor.

Your browser does not support the video tag.

OPERATING YOUR NOOIE BABY MONITOR

Live View and Controls

Once connected, open the nooie app to access the live video feed. You can pan (horizontal rotation up to 355°) and tilt (vertical rotation up to 94°) the camera directly from the app to adjust the viewing angle.

Two-Way Audio

The camera features a built-in microphone and speaker, allowing for two-way communication. Tap the microphone icon in the app to speak through the camera, and listen to audio from the camera's environment.

Motion Tracking and Alerts

Enable AI-Motion Tracking in the app settings. The camera will automatically detect and follow movements within its field of view. You will receive real-time motion and sound alerts on your smartphone.

Real-time Motion & Sound Alerts

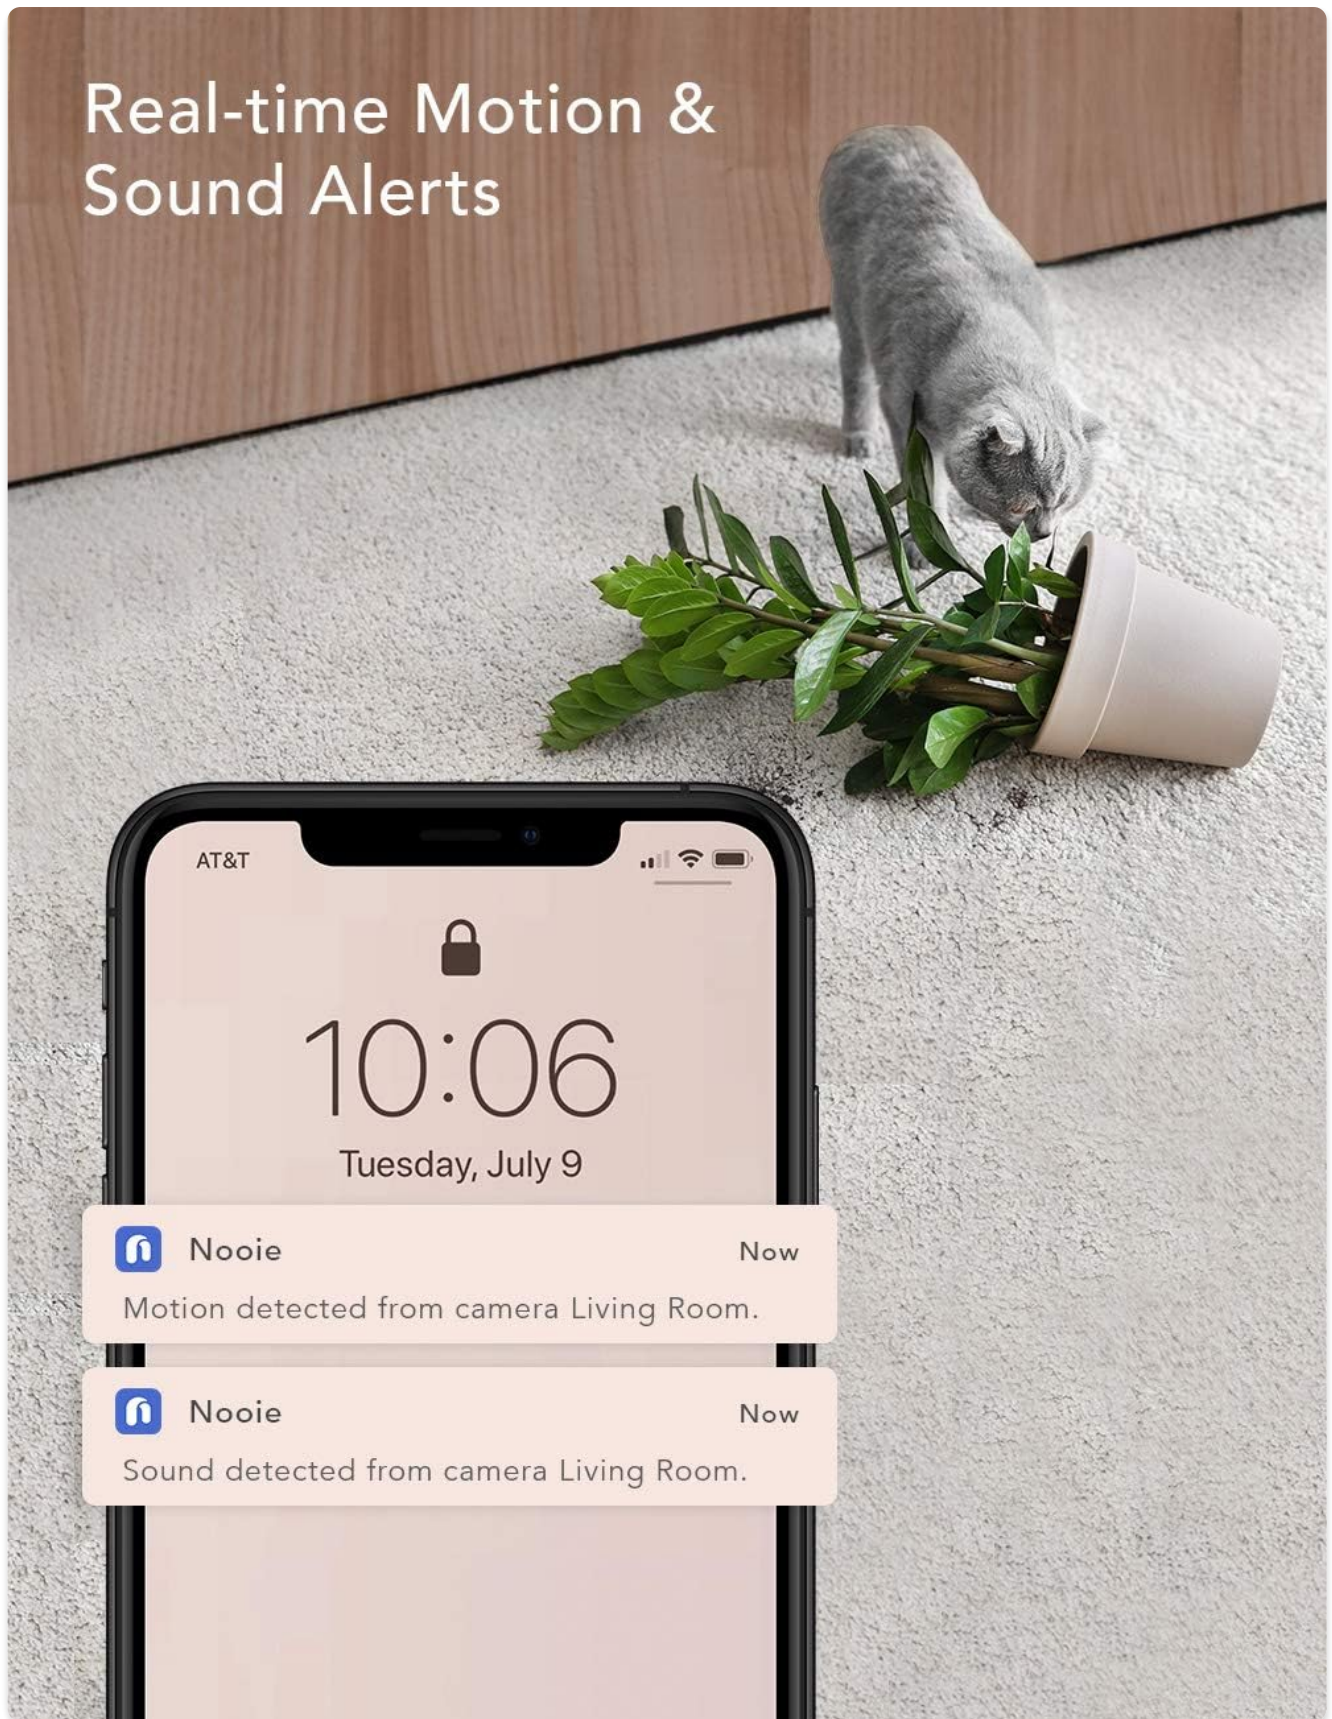

Image: A smartphone displaying push notifications for motion and sound detection from the nooie camera.

Night Vision

The nooie 360 Cam is equipped with two 940nm infrared LEDs, providing clear 2K HD footage up to 32ft (10m) in low light or complete darkness. The status light can be discreetly turned off in the app to avoid disturbing sleep.

Recording and Playback

Recordings can be stored continuously or activated by motion/sound. You have the option to save footage to a Micro SD

card (not included) or utilize the cloud service (subscription may be required). Access and review past recordings through the app's playback feature.

Eco Friendly Packaging

Alexa and Google Home Integration

The nooie 360 Cam is compatible with Amazon Alexa and Google Home, allowing for voice control. For example, you can say "Alexa, show me the Baby Room" to view the camera feed on a compatible smart display.

MAINTENANCE

- **Cleaning:** Use a soft, dry cloth to clean the camera lens and body. Do not use liquid cleaners or aerosols.
- **Software Updates:** Regularly check the nooie app for firmware updates. Keeping your camera's software up-to-date ensures optimal performance and security.
- **Environmental Conditions:** Ensure the camera is used within its specified operating temperature and humidity ranges. Avoid exposing it to extreme temperatures, direct sunlight, or moisture.

TROUBLESHOOTING

Common Issues and Solutions

- **Camera Offline:**
 - Check Wi-Fi connection: Ensure your router is working and the camera is within range.
 - Restart camera: Unplug the power cable, wait 10 seconds, and plug it back in.
 - Check Wi-Fi password: Verify the Wi-Fi password entered in the app is correct.
- **Poor Video Quality:**
 - Check network speed: Ensure your internet connection is stable and fast enough for streaming.
 - Clean lens: Gently wipe the camera lens with a soft, dry cloth.
 - Adjust camera placement: Move the camera closer to the Wi-Fi router if signal strength is weak.
- **No Sound/Two-Way Audio Issues:**
 - Check app volume: Ensure the volume on your smartphone and within the nooie app is turned up.
 - Check camera microphone/speaker settings in the app.
 - Ensure there are no obstructions blocking the camera's microphone or speaker.
- **Motion/Sound Alerts Not Working:**
 - Verify alert settings in the nooie app are enabled.
 - Check your phone's notification settings for the nooie app.
 - Ensure the camera is connected to the internet.
