## BRUNNER Lamar 4 Kuppelzelt 2020

# BRUNNER Lamar 4 Dome Tent User Manual

MODEL: LAMAR 4 KUPPELZELT 2020

---

## 1. Product Overview

The BRUNNER Lamar 4 Dome Tent is designed for comfortable camping, offering a pleasant standing height within a compact footprint. It provides ample space in both the living and sleeping areas, making it suitable for up to 4 people. Key features include two entrances and a roll-up front wall for excellent ventilation, along with a sewn-in tent floor that protects against wind and moisture. A large panoramic window with a gauze opening in the front wall ensures a comfortable indoor climate.

Figure 1.1: The BRUNNER Lamar 4 Dome Tent fully set up in an outdoor environment, showcasing its design and spaciousness.

## 2. Setup Instructions

The Lamar 4 tent is designed for quick and easy assembly due to its small packed size and lightweight construction. Follow these steps for optimal setup:

1. **Unpack Components:** Remove the tent, color-coded fiberglass poles, plastic pegs, storm ropes, and storage bag from the carry bag.
2. **Lay Out Tent:** Spread the outer tent flat on your chosen campsite. Ensure the sewn-in tent floor is positioned correctly.
3. **Assemble Poles:** Connect the color-coded fiberglass pole sections. Match the pole colors to the corresponding sleeves on the tent.
4. **Insert Poles:** Thread the assembled poles through the tent sleeves.
5. **Secure Poles:** Insert the ends of the poles into the grommets or pins at the base of the tent. Gently lift the tent to form its dome shape.
6. **Peg Down Tent:** Secure the tent corners and guy lines with the provided plastic pegs. Ensure the tent is taut to withstand wind.
7. **Attach Storm Ropes:** Extend and peg down the storm ropes for added stability in windy conditions.
8. **Install Inner Tent:** Hang the inner tent (sleeping cabin) inside the outer tent using the toggles or clips provided. Ensure the inner cabin wall with its zipper is accessible.

The tent features taped seams for enhanced waterproofing, ensuring a dry interior even in wet weather.

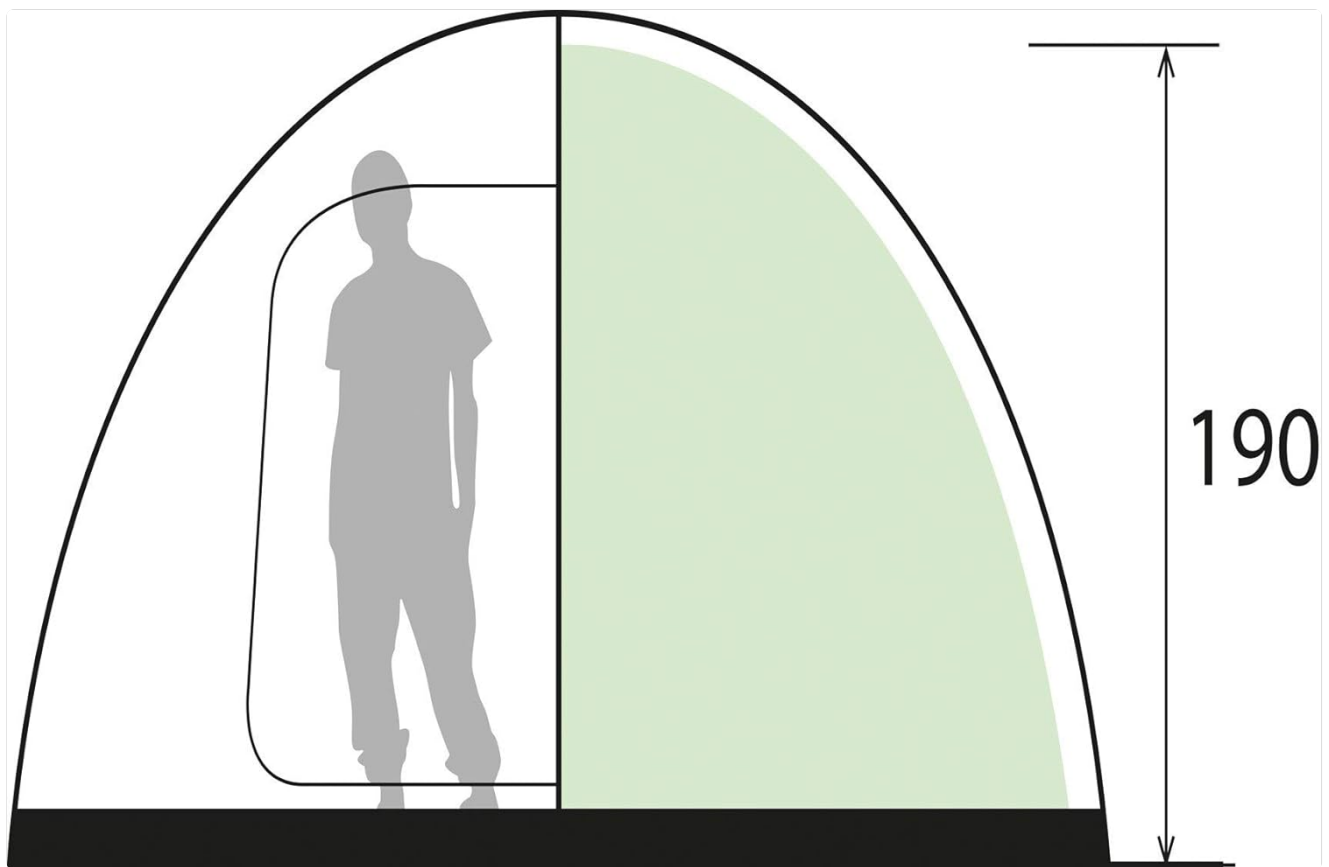

Figure 2.2: Internal height of the tent, indicating the comfortable standing room available within the structure. Height is in centimeters.

### 3. Operating the Tent

The BRUNNER Lamar 4 tent is designed for user comfort and adaptability to various conditions:

- **Ventilation:** Utilize the two entrances and the roll-up front wall to create cross-ventilation, preventing condensation and maintaining a fresh interior. The large panoramic window also features a gauze opening for airflow while keeping insects out.
- **Access:** The two entrances provide convenient access to different areas of the tent. The inner cabin wall is equipped with a zipper for easy entry and exit from the sleeping area.
- **Privacy:** Close the inner tent's zippered wall for privacy in the sleeping compartment.

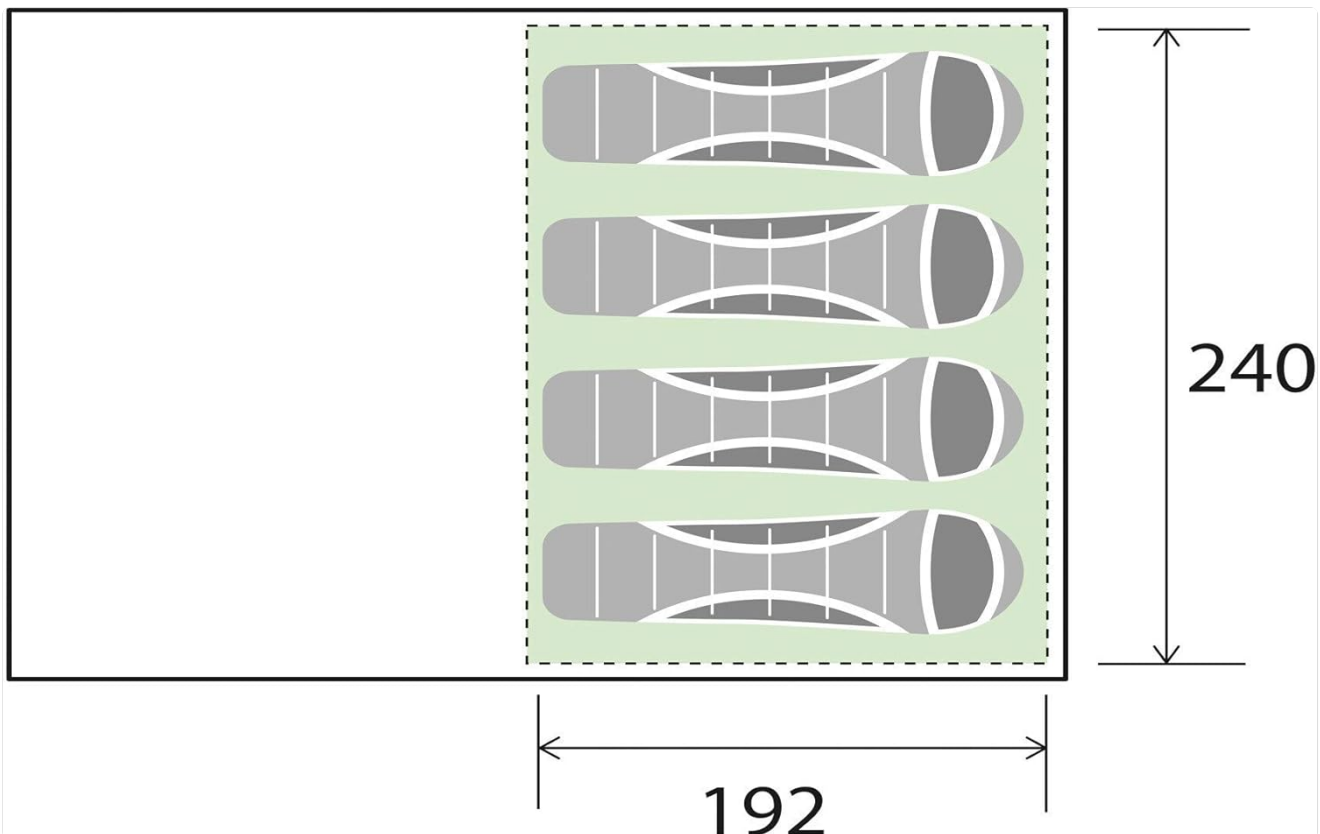

Figure 3.1: Internal layout of the sleeping area, demonstrating how four sleeping mats can be arranged comfortably within the tent's dimensions. Dimensions are in centimeters.

## 4. Maintenance

Proper maintenance will extend the life of your BRUNNER Lamar 4 tent:

- **Cleaning:** Clean the tent with a soft brush or sponge and mild, non-detergent soap. Rinse thoroughly with water. Do not use harsh chemicals or washing machines.
- **Drying:** Always ensure the tent is completely dry before packing it away. Packing a damp tent can lead to mildew, odor, and damage to the fabric and coatings. Air dry in a shaded, well-ventilated area.
- **Storage:** Store the tent in a cool, dry place, away from direct sunlight and extreme temperatures. Keep it in its original storage bag.
- **Zippers:** Keep zippers clean and free of dirt. Lubricate occasionally with a silicone-based zipper lubricant.
- **Poles:** Inspect poles for any signs of damage or splintering before and after each use.

## 5. Troubleshooting

Common issues and their solutions:

- **Condensation Inside Tent:**

*Solution:* Increase ventilation by opening both entrances and the panoramic window's gauze opening. Ensure adequate airflow, especially during humid conditions or when many occupants are inside.

- **Water Leaks:**

*Solution:* While the tent has taped seams, prolonged heavy rain or wear can sometimes lead to minor leaks. Inspect seams for damage. Apply a seam sealer product to affected areas. Ensure the tent is pitched tautly to allow water to run off.

- **Difficulty Assembling Poles:**

*Solution:* Ensure pole sections are fully seated. Check for any bent or damaged sections. The poles are

color-coded; ensure you are matching them to the correct sleeves.

- **Zipper Sticking:**

*Solution:* Clean the zipper teeth with a small brush to remove dirt or debris. Apply a silicone-based zipper lubricant to the teeth and slider.

## 6. Specifications

Feature	Detail
Model Name	Lamar 4 Kuppelzelt 2020
Brand	BRUNNER
Capacity	4 Persons
Number of Rooms	1 (Sleeping Cabin)
Number of Absides	1
Total Dimensions (L x W)	385 cm x 280 cm
