SETUP

Connecting to Your TV

The MEGATEK DVD Player offers multiple connection options to suit various television setups:

- **HDMI Connection (Recommended):** For the best audio and video quality, connect the included HDMI cable from the "HDMI OUT" port on the DVD player to an available "HDMI IN" port on your TV. This single cable transmits both high-definition video and digital audio.
- **RCA AV Connection:** For older televisions or alternative setups, use the included 3 x RCA AV cables. Connect the yellow (video), white (left audio), and red (right audio) plugs from the DVD player's "VIDEO" and "AUDIO" outputs to the corresponding inputs on your TV.
- **Coaxial Digital Audio Output:** For enhanced surround sound, connect an optional coaxial digital audio cable (not included) from the "COAXIAL" port on the DVD player to a compatible audio receiver or sound system.

Simple Connections.

Connect to smart HD TV with one HDMI cable, or to older TV with 3 x RCA cables. Enjoy cinematic surround sound with Coaxial digital audio connection to compatible speaker system.

MAINTENANCE

Proper care and maintenance will ensure the longevity and optimal performance of your MEGATEK DVD Player.

- **Cleaning the Unit:** Use a soft, dry cloth to wipe the exterior of the player. Do not use liquid cleaners or aerosol sprays, as they may damage the finish or internal components.
- **Disc Care:** Handle discs by their edges to avoid fingerprints and scratches. Store discs in their cases when not in use. If a disc is dirty, gently wipe it from the center outwards with a soft, lint-free cloth. Do not use abrasive materials.
- **Ventilation:** Ensure the player has adequate ventilation. Do not block the ventilation slots on the sides or back of the unit. Avoid placing the player in enclosed spaces or on soft surfaces that may obstruct airflow.
- **Environmental Conditions:** Keep the player away from direct sunlight, heat sources, and excessive moisture.

TROUBLESHOOTING

If you encounter issues with your MEGATEK DVD Player, please refer to the following common problems and solutions:

Problem	Possible Cause	Solution
No power	Power cord not connected; Power outlet not active.	Ensure the power cord is securely plugged into the player and a working electrical outlet. Try a different outlet.
No picture/sound	Incorrect input selected on TV; Loose/damaged cables; Incorrect connection.	Select the correct input source (e.g., HDMI 1, AV) on your TV. Check all cable connections (HDMI, RCA) are secure. Ensure cables are connected to the correct input/output ports. If using HDMI, try a different HDMI cable as some reviews indicate issues with the supplied one.
Disc not playing/Disc error	Disc is dirty, scratched, or incompatible format; Disc inserted incorrectly.	Clean the disc with a soft cloth. Check for deep scratches. Ensure the disc is inserted label-side up. Verify the disc format is supported (not Blu-ray).
Remote control not working	Batteries are dead or inserted incorrectly; Obstruction between remote and player.	Replace batteries with new AAA batteries, ensuring correct polarity. Remove any obstacles between the remote and the player's sensor.
Intermittent blackouts/picture issues	HDMI cable quality; TV compatibility.	Try using a higher quality HDMI cable. Ensure your TV's firmware is up to date.

If the problem persists after trying these solutions, please contact MEGATEK customer support for further assistance.
