- **Cleaning the Faucet Body:** The faucet's sleek design with reduced steps and gaps makes it easy to wipe clean. Use a soft cloth and a mild, non-abrasive cleaner. Avoid harsh chemicals, abrasive pads, or acidic cleaners, as these can damage the chrome finish.
- **Cleaning the Showerhead:** Periodically clean the nozzles of the showerhead to prevent mineral buildup, which can affect spray patterns. Most showerheads have flexible nozzles that can be wiped clean. For stubborn deposits, a solution of vinegar and water can be used.
- **Check for Leaks:** Regularly inspect all connections for any signs of leaks. Address any leaks promptly to prevent water damage.
