shernbao DHD-2400F

Shernbao DHD-2400F High Velocity Professional Pet Grooming Dryer Instruction Manual

Model: DHD-2400F

INTRODUCTION

This manual provides comprehensive instructions for the safe and effective use of your Shernbao DHD-2400F High Velocity Professional Pet Grooming Dryer. Please read all instructions carefully before operation to ensure proper function and longevity of the product.

Breakthrough Technology to Reduce Noise

There is no silent blowing machine, we are actively working to make our blower even more quiet. . . .

SAFETY INFORMATION

Always follow basic safety precautions when using electrical appliances to reduce the risk of fire, electric shock, and personal injury.

- Read all instructions before use.
- Do not operate the dryer with a damaged cord or plug.
- Keep the dryer away from water and wet surfaces.
- Ensure the air filters are clean before each use to prevent overheating.
- Do not block air openings or place the dryer on a soft surface that may block them.
- Supervise pets during drying to prevent injury or stress.
- Unplug the dryer when not in use and before cleaning.

PACKAGE CONTENTS

Verify that all items are present in the package:

- Shernbao DHD-2400F Dryer Unit
- Flexible Hose (4 ft to 8 ft expandable)

- 3 Nozzles (Circular, Diffuse, Flattened)
- 2 Air Filters (pre-installed or spare)

STRONG WIND, FAST DRYING

Tips: After many experiments and customer feedback, According to different dog breeds, the amount of hair, and the different environments, the drying time will differ.

SETUP INSTRUCTIONS

1. **Attach the Hose:** Align the hose connector with the outlet on the front of the dryer unit. Twist clockwise until securely locked.
2. **Select and Attach Nozzle:** Choose the desired nozzle (circular, diffuse, or flattened) based on your grooming needs. Push the nozzle firmly onto the end of the flexible hose until it clicks into place.
3. **Power Connection:** Ensure the dryer is switched off before plugging the power cord into a standard electrical outlet.

OPERATING INSTRUCTIONS

1. **Power On:** Flip the power switch to the "ON" position. The dryer will start.
2. **Adjust Airflow Speed:** Use the adjustable speed dial to control the airflow from 4921 FPM (Feet Per Minute) to 68000 FPM. Start with a lower speed for sensitive pets or smaller areas, and increase as needed.
3. **Drying Technique:** Direct the airflow towards the pet's coat, moving the nozzle continuously to avoid concentrating heat in one area. The powerful airflow significantly reduces drying time.
4. **Consider Pet Comfort:** For sensitive dogs, begin with the lowest speed setting to accustom them to the dryer's sound and sensation.
5. **Power Off:** Once drying is complete, turn the speed dial to the minimum setting, then flip the power switch to "OFF". Unplug the unit from the power outlet.

MAINTENANCE

Regular maintenance ensures optimal performance and extends the life of your dryer.

- **Clean Air Filters:** The dryer includes two air filters. Regularly check and clean these filters to prevent dust and pet hair buildup, which can restrict airflow and cause overheating. To clean, remove the filter cover, take out the filters, and brush off any debris. Wash with mild soap and water if necessary, ensuring they are completely dry before reinserting.
- **Wipe Down Exterior:** Use a soft, damp cloth to wipe the exterior of the dryer. Do not use harsh chemicals or abrasive cleaners.
- **Inspect Hose and Nozzles:** Periodically check the flexible hose and nozzles for any cracks, blockages, or damage. Replace if necessary.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Dryer does not turn on.	No power, faulty switch, or tripped circuit breaker.	Check power cord connection, ensure outlet is functional, reset circuit breaker if tripped.
Weak airflow.	Clogged air filters, blocked hose/nozzle, or motor issue.	Clean air filters. Check hose and nozzles for obstructions.
Unusual noise or vibration.	Loose components, foreign object in motor, or worn parts.	Turn off and unplug the dryer. Inspect for loose parts or obstructions. If problem persists, contact customer service.
Dryer overheats.	Blocked air intake/exhaust, clogged filters.	Ensure air vents are clear and clean filters thoroughly. Allow dryer to cool down before restarting.
