5. OPERATING INSTRUCTIONS

Follow these steps for effective use of your hair straightener brush.

General Use:

1. Ensure your hair is clean, dry, and detangled before use.
2. Press the power button to turn on the appliance. The indicator light will illuminate.
3. Select your desired temperature setting (170°C or 200°C) using the temperature control buttons. The appliance will heat up quickly.
4. Divide your hair into manageable sections.
5. Starting from the roots, slowly brush through each section of hair, ensuring the bristles pass through the hair evenly.
6. Repeat until the desired straightness is achieved for each section.
7. After use, press and hold the power button to turn off the appliance and unplug it from the power outlet.

8. Allow the appliance to cool down completely before storing.

Image: User demonstrating the application of the hair straightener brush.

Temperature Settings:

- **170°C:** Recommended for fine, delicate, or color-treated hair.
- **200°C:** Recommended for normal to thick hair.

Always start with the lower temperature setting and increase if necessary, based on your hair type and desired results.

6. MAINTENANCE AND CLEANING

Regular cleaning ensures optimal performance and extends the life of your appliance.

1. Always unplug the appliance and allow it to cool down completely before cleaning.
2. Wipe the surface of the brush and bristles with a soft, damp cloth.
3. Do not use abrasive cleaning agents or harsh chemicals.
4. Ensure no water enters the appliance.
5. Remove any hair tangled in the bristles using a fine comb or your fingers.

Storage:

Store the appliance in a dry, safe place, away from direct sunlight and moisture. Do not wrap the cord around the appliance as this can damage the cord.

7. TROUBLESHOOTING

If you encounter any issues with your Philips BHH880 Hair Straightener Brush, refer to the table below for common problems and solutions.

Problem	Possible Cause	Solution
Appliance does not turn on.	Not plugged in correctly or no power supply.	Check if the plug is securely inserted into the power outlet. Test the outlet with another appliance.
Appliance is not heating up.	Power button not pressed or internal fault.	Ensure the power button is pressed and the indicator light is on. If not, contact customer support.
Hair is not straightening effectively.	Hair is wet, sections are too large, or temperature setting is too low.	Ensure hair is completely dry. Work with smaller sections. Increase the temperature setting if appropriate for your hair type.
Hair gets tangled in bristles.	Hair is not detangled before use or brushing too quickly.	Ensure hair is thoroughly detangled before using the brush. Brush slowly and steadily.

If the problem persists after trying these solutions, please contact Philips customer support.
