MAINTENANCE AND CARE

Proper care ensures the longevity and performance of your Eddy Steaming Pitcher.

- **Cleaning:** Wash the pitcher immediately after each use to prevent milk residue from drying. Use warm water and a mild detergent. A soft brush or sponge is recommended.
- **Dishwasher Safety:** The pitcher is dishwasher safe. However, hand washing is recommended to preserve the finish over time.
- **Drying:** Dry thoroughly after washing to prevent water spots and maintain the polished finish.
- **Material:** Made from 304 18/8 stainless steel. Avoid abrasive cleaners or scouring pads that could scratch the surface.

TROUBLESHOOTING

If you encounter issues with your Eddy Steaming Pitcher, consider the following:

- **Poor Milk Texture:** Ensure your milk is fresh and cold. Verify your steaming technique, including steam wand depth and angle. The pitcher's design aids in creating micro-foam, but proper steaming technique is crucial.
- **Difficulty with Latte Art:** Latte art requires practice. Focus on milk texture first, then experiment with pouring speed, height, and pitcher angle. The Eddy Pitcher's spout is designed for precision, which may require adjustment if you are accustomed to other pitcher types.
- **Water Spots/Stains:** These can occur if the pitcher is not dried immediately after washing. Use a soft cloth to dry thoroughly. For stubborn spots, a stainless steel cleaner can be used sparingly.
