

Yihou 739

Yihou Men's Military Watch

OFFICIAL USER MANUAL

Model: 739 | Brand: Yihou

Introduction

This manual provides comprehensive instructions for the operation and maintenance of your Yihou Men's Military Watch, Model 739. Designed for outdoor sports and tactical use, this watch features both digital and analog displays, offering robust functionality including a stopwatch, alarm, LED backlight, and water resistance. Please read this manual thoroughly to ensure proper use and longevity of your timepiece.

Setup

Your Yihou Military Watch comes with a pre-installed battery. Before first use, it is recommended to set the correct time and date.

Setting Time and Date

- 1. Analog Time Adjustment:** Pull out the crown (the knob on the right side of the watch) to the first position. Rotate the crown to adjust the analog hour and minute hands to the desired time. Push the crown back in to secure the setting.
- 2. Digital Time and Date Adjustment:**
 - Press the **MODE** button repeatedly until the time setting mode is displayed (usually indicated by flashing digits).
 - Use the **RESET** button to cycle through the settings (seconds, hours, minutes, month, date, day of week).
 - Use the **START** button to increase the flashing value.
 - Once all settings are adjusted, press the **MODE** button again to exit the setting mode.

Operating Instructions

The Yihou Military Watch offers multiple functions accessible via its side buttons.

MULTIFUNCTION MILITARY WATCH

Image: Diagram illustrating the various functions of the Yihou Military Watch, including LED backlight, alarm, stopwatch, calendar, dual time display, and shockproof features.

Button Functions Overview

- **LIGHT Button:** Activates the LED backlight for visibility in low-light conditions.
- **MODE Button:** Cycles through different modes: Time Display, Stopwatch, Alarm, Time Setting.
- **START Button:** Used to start/stop the stopwatch, adjust values during setting, or confirm selections.
- **RESET Button:** Used to reset the stopwatch, switch between items during setting, or clear values.

Using the Stopwatch

1. Press the **MODE** button until the stopwatch mode is displayed (usually indicated by "ST" or "STOP").
2. Press the **START** button to begin timing.
3. Press the **START** button again to pause timing.
4. Press the **RESET** button to clear the stopwatch to zero.

Setting the Alarm

1. Press the **MODE** button until the alarm mode is displayed (usually indicated by "AL").
2. Press the **RESET** button to select the hour or minute to set (flashing).
3. Use the **START** button to adjust the hour or minute.
4. Press **MODE** to exit. To activate/deactivate the alarm, press **START** while in alarm mode.

12/24 Hour Format

In the normal time display mode, press the **START** button to toggle between 12-hour (with AM/PM indicator) and 24-hour (military time) formats.

Maintenance

Proper care will ensure the longevity and performance of your Yihou Military Watch.

Cleaning

It is recommended to clean the watch strap and case regularly with a soft, dry cloth. For stubborn dirt, a slightly damp cloth can be used, followed by drying immediately.

Water Resistance Guidelines

This watch is water-resistant up to 30 meters (3 ATM). This means it is suitable for daily use, hand washing, and brief immersion in water. However, it is crucial to observe the following:

- **Do NOT press any buttons while the watch is submerged in water.** This can compromise the water seal.
- Avoid using the watch in hot water, saunas, or steam rooms, as extreme temperatures can damage the seals.
- The watch is not suitable for diving or prolonged underwater activities.

DEPTH OF 30 METERS WATERPROOF

YIHOU'S PROFESSIONAL WATER RESISTANT SYSTEM CAN REALLY RESIST
WATER FROM UP TO 30 METERS.

Image: Water droplets splashing onto the watch face, demonstrating its resistance to splashes and light water exposure.

Troubleshooting

If you encounter any issues with your watch, please refer to the following common problems and solutions.

| Problem | Possible Cause | Solution |
|--|--|---|
| Fog or droplets inside the watch face. | Exposure to extreme temperature changes or compromised water seal. | Contact the manufacturer immediately for maintenance to prevent corrosion of internal components. |
| Digital display is partially dark or unreadable. | This is a known characteristic of some units, as noted in the product description. It may also indicate low battery or internal issue. | Ensure battery is not low. If issue persists and affects functionality, contact support. |

| Problem | Possible Cause | Solution |
|----------------------------------|---|--|
| Watch not keeping accurate time. | Low battery or need for time recalibration. | Check battery life. Re-set analog and digital time as per "Setup" section. |
