Instruction Manual

GROUW LONA TARP

Model: 59566 | Brand: ZLINE

Introduction

This manual provides essential information for the proper use, setup, maintenance, and troubleshooting of your GROUW Lona Tarp, model 59566. Manufactured from durable polyethylene (PE), this waterproof tarp is designed for various outdoor and protective applications. Please read this manual thoroughly before use to ensure safe and effective operation.

Safety Information

Always observe the following safety precautions when handling and using the tarp:

- Ensure the tarp is securely fastened to prevent it from being blown away by wind, which could cause injury or damage.
- Do not use the tarp near open flames or extreme heat sources, as polyethylene is flammable.
- Avoid sharp objects that could puncture or tear the tarp material.
- When using the tarp as a temporary shelter, ensure proper ventilation to prevent condensation buildup.
- Keep out of reach of small children to prevent entanglement hazards.

Setup

The GROUW Lona Tarp is designed for versatile use. Follow these general steps for setup:

1. **Unfold the Tarp:** Carefully unroll and unfold the tarp in the desired area.
2. **Positioning:** Place the tarp over the item or area you wish to cover, ensuring adequate overlap for protection.
3. **Securing:** Utilize the integrated grommets (eyelets) located along the edges of the tarp. Pass ropes, bungee cords, or stakes through these grommets to secure the tarp to anchor points. Ensure tension is evenly distributed to prevent sagging and water pooling.

For covering items like firewood or vehicles, ensure the tarp extends beyond the edges to allow water to run off freely.

Operating

The GROUW Lona Tarp is a passive protective covering. Its operation primarily involves ensuring it remains securely in place and provides the intended coverage.

- **Weather Protection:** The tarp is waterproof and designed to protect against rain, snow, and sun. Regularly check the tarp's tension and position, especially during strong winds or heavy precipitation, to prevent damage or dislodgement.
- **Temporary Shelter:** When used as a temporary shelter (e.g., for camping), ensure the tarp is pitched at an angle to allow water runoff and prevent pooling.

Maintenance

Proper maintenance will extend the lifespan of your GROUW Lona Tarp:

- **Cleaning:** Clean the tarp with mild soap and water. Avoid harsh chemicals or abrasive cleaners, as these can damage the polyethylene material. Rinse thoroughly and allow to air dry completely before folding and storing.
- **Drying:** Always ensure the tarp is completely dry before folding and storing to prevent mold and mildew growth.
- **Storage:** Store the tarp in a cool, dry place, away from direct sunlight and extreme temperatures, when not in use.
- **Inspection:** Periodically inspect the tarp for any signs of wear, tears, or damage to the grommets. Address minor damage promptly to prevent it from worsening.

Troubleshooting

Problem	Possible Cause	Solution
Water pooling on tarp	Insufficient tension or improper angle.	Re-tension the tarp to create a taut surface. Adjust the angle to ensure water runs off. Add support poles if necessary.
Tarp blown away by wind	Inadequate securing or weak anchor points.	Ensure all grommets are used and securely fastened to strong anchor points. Use stronger ropes or stakes if needed.

Problem	Possible Cause	Solution
Tears or punctures	Contact with sharp objects or excessive stress.	For small tears, use a tarp repair kit or strong waterproof tape. For large damage, replacement may be necessary. Avoid dragging the tarp over rough surfaces.
Mold or mildew growth	Tarp stored wet or in a damp environment.	Clean the affected area with a mild bleach solution (diluted) or specialized mold remover. Rinse thoroughly and ensure the tarp is completely dry before storage.

Specifications

Model	59566
Brand	ZLINE
Manufacturer	Schou
Material	Polyethylene (PE)
Color	Green
Size	6 x 10 meters
Fabric Weight	65 Grams per square meter
Water Resistance Level	Waterproof
Included Components	1 x Tarp (6.0 x 10.0 m)
Product Dimensions (folded/packaged)	5 x 5 x 5 cm
Item Weight	8.16 Pounds (approx. 3.7 kg)
