Waterdrop WD-PT-04B

Waterdrop Classic 10-Cup Water Filter Pitcher

MODEL: WD-PT-04B

Introduction

Thank you for choosing the Waterdrop Classic 10-Cup Water Filter Pitcher. This manual provides essential information for the proper setup, operation, maintenance, and troubleshooting of your new water filter pitcher. Please read these instructions carefully before use to ensure optimal performance and longevity of the product.

What's in the Box

Verify that all components are present before proceeding with setup:

- Water Filter Pitcher System (1)
- Pitcher Filter Replacement (1)
- User's Manual (1)

Setup Instructions

1. **Initial Cleaning:** Wash the pitcher, lid, and reservoir with mild detergent and warm water. Rinse thoroughly. Do not wash the filter with detergent.
2. **Filter Preparation:** Submerge the new filter in cold water for 10 minutes to remove any air bubbles. This ensures proper water flow and filtration.

Image: A water filter cartridge being submerged in water to prepare it for use.

3. **Install Filter:** Insert the prepared filter firmly into the designated opening in the reservoir until it is securely seated.

Image: A hand pressing the water filter cartridge into the pitcher's reservoir for installation.

4. **Rinse Pitcher:** Fill the pitcher with tap water and allow it to filter through. Discard the first two pitchers of filtered water to flush out any carbon dust.

Image: A hand holding the pitcher under a running faucet to rinse it.

5. **Reset Filter Indicator:** After installing a new filter, press and hold the button on the lid for 5 seconds until the blue light flashes. This resets the filter life tracking.

Operating Instructions

Using your Waterdrop filter pitcher is straightforward:

- **Filling:** The pitcher features a hands-free automatic water inlet. Simply place the pitcher under a faucet, and the lid will open automatically for refilling. This design helps prevent dust ingress and contact contamination.
- **Filtration:** Water will filter through the cartridge into the main pitcher reservoir. The filtration process is designed to be fast, providing purified water quickly.
- **Pouring:** Pour water as needed. The dust-proof spout helps maintain water purity.

- **Smart Life Indicator:** The LED indicator on the lid monitors the filter's lifespan.
 - **Blue when tapped:** Filter is in good condition (more than 10 days remaining).
 - **Flash red:** Filter needs replacement soon (10 days or less remaining).
 - **Solid red:** Filter needs immediate replacement (0 days remaining).

Maintenance

Cleaning the Pitcher

Regular cleaning of your pitcher ensures optimal hygiene and performance. Wash the pitcher, lid, and reservoir with mild detergent and warm water. Rinse all parts thoroughly. The wooden handle should be wiped clean and not submerged in water for extended periods to preserve its integrity.

Filter Replacement

The filter (Model: WD-PF-01A) has a lifespan of up to 200 gallons or approximately 3 months, depending on water quality and usage. Replace the filter when the Smart Life Indicator shows a solid red light or when you notice a decrease in filtration speed or water quality.

1. Remove the old filter from the reservoir.
2. Prepare the new filter by soaking it in cold water for 10 minutes.
3. Insert the new filter firmly into the reservoir.
4. Discard the first two pitchers of filtered water.
5. Reset the filter indicator by pressing and holding the button on the lid for 5 seconds until the blue light flashes.

Troubleshooting

Problem	Possible Cause	Solution
Slow filtration rate	Filter not properly primed; filter nearing end of life; high sediment in water.	Ensure filter was soaked for 10 minutes before first use. Replace filter if indicator is red.
Water tastes unusual	First few pitchers not discarded; filter nearing end of life; improper filter installation.	Discard the first two pitchers after new filter installation. Replace filter. Re-install filter securely.
Black particles in water	Carbon dust from new filter.	This is normal for the first few uses. Ensure the filter was properly flushed by discarding the first two pitchers of filtered water. Particles should disappear after a few uses.
Indicator light not working	Battery issue; not reset properly.	Ensure the button was held for 5 seconds to reset. If issue persists, contact customer support.

Specifications

Feature	Detail
Model Number	WD-PT-04B
Capacity	10-Cup

Feature	Detail
Product Dimensions (L x W x H)	10.4" x 5" x 10.1"
Item Weight	2.3 Pounds
Filter Lifespan	Up to 200 Gallons or 3 Months
Replacement Filter Model	WD-PF-01A
Certifications	NSF 42, NSF 372
Material	BPA-Free, Food-Grade Materials
Contaminant Reduction	Chlorine (up to 97.4%), PFOA/PFOS, Odor, Iron, Metal Ions (according to third-party testing)
Power Source	Non-Electric
Upper Temperature Rating	100 Degrees Fahrenheit
