

## DURGOD K320

# DURGOD Taurus K320 TKL Mechanical Gaming Keyboard Instruction Manual

**Brand:** DURGOD

**Model:** K320

## INTRODUCTION

Welcome to the DURGOD Taurus K320 TKL Mechanical Gaming Keyboard user manual. This guide provides detailed instructions for setting up, operating, and maintaining your new keyboard. The K320 TKL is an 87-key tenkeyless mechanical keyboard featuring Double Shot PBT keycaps, NKRO (N-Key Rollover), and USB Type-C connectivity, equipped with Cherry Silent Red switches for a quiet yet responsive typing experience.

## WHAT'S IN THE BOX

- DURGOD Taurus K320 TKL Mechanical Gaming Keyboard
- USB Type-C to Type-C Cable (3.3FT / 1M)
- USB Type-C to Type-A Cable (5.9FT / 1.8M)
- Keycap Puller
- Logo Sticker

## SETUP

---

### Connecting Your Keyboard

The DURGOD K320 TKL keyboard offers versatile connectivity options:

- **Wired Connection:** Connect the keyboard to your computer using either the provided USB Type-C to Type-C cable or the USB Type-C to Type-A cable. The keyboard features a Type-C interface for a secure and reliable connection.

## Adjustable Holder

## Type-C Interface

### Adjusting Keyboard Angle

The keyboard features adjustable feet on the underside, allowing you to prop it up at two different angles. This helps relieve wrist strain during extended use.

## DURGOD Zeus Engine Software

For advanced customization, download and install the DURGOD Zeus Engine software from the official DURGOD website. This software allows you to:

- Upgrade keyboard firmware.
- Set up complex macros.
- Remap keys to your preference.

## MAINTENANCE

### Cleaning Your Keyboard

To ensure the longevity and optimal performance of your DURGOD K320 TKL, regular cleaning is recommended:

- Disconnect the keyboard from your computer before cleaning.
- Use a can of compressed air to blow away dust and debris from between the keycaps.
- For stubborn dirt, gently remove keycaps using the provided keycap puller. Clean the keycaps with a mild soap solution and a soft cloth, then dry thoroughly before reattaching.
- Wipe the keyboard surface with a slightly damp, lint-free cloth. Avoid excessive moisture.

## TROUBLESHOOTING

- **Keyboard not responding:** Ensure the USB cable is securely connected to both the keyboard and your computer. Try a different USB port or cable.
- **Keys not registering correctly (ghosting/chattering):** The K320 features NKRO to prevent ghosting. If issues persist, ensure your operating system drivers are up to date. Consider updating the keyboard firmware via the DURGOD Zeus Engine software.
- **Software issues:** If the DURGOD Zeus Engine software is not detecting the keyboard or functioning correctly, ensure the keyboard is connected in wired mode. Reinstall the software if necessary.
