## SETUP INSTRUCTIONS

### 1. Install the Flexible Smartphone Clamp

The smartphone clamp is designed to securely hold phones with widths ranging from 54mm to 95mm. To install, gently pull apart the clamp and insert your smartphone. Ensure your phone is centered and securely held. The clamp features a 1/4 external port and a hot shoe mount for additional accessories.

## Wideo Compatibility

Fits smartphones from 54mm to 95mm wide,Compatible with phones such as iPhone Galaxy Google Pixel Samsung Huawei etc.

### 2. Attach the Microphone

The CVM-VM10-K2 microphone features a cardioid directional pattern, designed to capture clear audio by minimizing background noise. Attach the microphone to the hot shoe mount on top of the smartphone clamp. The microphone includes a shock-absorption stand to reduce handling noise.

Image: The cardioid directional microphone, highlighting its high sensitivity and ability to reduce background noise for clear audio recording.

### 3. Connect to your Smartphone

Use the provided 3.5mm TRS-TRRS audio output cable to connect the microphone to your smartphone. One end of the cable (TRS) connects to the microphone, and the other end (TRRS) connects to your smartphone's 3.5mm audio jack. If your smartphone does not have a 3.5mm jack (e.g., newer iPhones with Lightning or Type-C interfaces), you will need to purchase a separate 3.5mm to Lightning or 3.5mm to Type-C adapter.

For iOS system smartphones, please prepare a 3.5mm trrs-Lightning adapter by yourself

Image: Step-by-step guide on connecting the microphone to an iOS smartphone, emphasizing the need for a 3.5mm to Lightning adapter.

#### 4. Use the Adjustable Mini Tripod

The mini tripod can be used as a stable base for your smartphone or folded to act as a handheld grip. To adjust the angle of the smartphone kit, press the round button on the tripod before making adjustments. This prevents forced adjustments that could destabilize the tripod.

# Tripod + Selfie Stick Shooting Mode

All-in-one Smartphone Video Kit CVM-VM10-K2 allows your recording with Tripod or Selfie Stick shooting mode

Image: The COMICA CVM-VM10-K2 kit configured for both tripod shooting and handheld selfie stick mode, demonstrating its versatility.

## OPERATING THE KIT

The COMICA CVM-VM10-K2 kit offers flexible operating modes to suit various recording needs:

- **Tripod Mode:** For stable, stationary shots, extend the tripod legs and place it on a flat surface. Adjust the angle as needed.
- **Handheld/Selfie Stick Mode:** Fold the tripod legs together to create a comfortable handheld grip for on-the-go recording or vlogging.
- **External Port & Hot Shoe:** The smartphone clamp includes a 1/4 external port at the bottom for mounting on sliders or dollies, and a hot shoe mount at the top for attaching the microphone or LED video lights.

An enthusiastic review praising the COMICA CVM-VM10-K2 as a top-tier external microphone solution for smartphone vlogging, highlighting its superior performance and value.

## MAINTENANCE

---

- Keep the kit clean by wiping components with a soft, dry cloth.
- Store all components in the provided portable carrying case when not in use to protect them from dust and damage.
- Avoid exposing the microphone and other electronic parts to moisture or extreme temperatures.
- Ensure cables are not bent sharply or tangled to prevent internal damage.

## TROUBLESHOOTING

---

- **No Audio Recording:** Ensure the 3.5mm TRS-TRRS cable is correctly connected (TRS end to microphone, TRRS end to smartphone). For iOS/Type-C phones, verify the adapter is functional and correctly connected.
- **Poor Audio Quality/Background Noise:** Check if the microphone is securely attached and pointed towards the sound source. Use the foam windscreen or wind muff (dead cat) in windy conditions.
- **Unstable Tripod:** Ensure the round button on the tripod is pressed when adjusting angles to allow for proper locking.
- **Smartphone Not Fitting Clamp:** Verify your smartphone's width is within the 54mm to 95mm range.
